| Friday 17th May   | Beef Shorthorn Show 8.30am<br>Aberdeen Angus Show 10.30am<br>Beef Shorthorn Sale – 12noon<br>Hereford Sale – 1.15pm approx<br>Aberdeen Angus Sale – 1.30pm approx |

**METHOD OF SALE:** All cattle will be sold in guineas (105 pence) and strictly in catalogue order, unless any alteration is announced by the Auctioneers.

**RESERVE PRICES:** Vendors shall have the right to refuse to accept the final bid for their animals, or to fix a Reserve Price, which must be notified to the Auctioneers in writing before or at the time their animal enters the Sale Ring. The auctioneers reserve the right to charge half commission on the amount of the final bid in the case of animals which fail to reach the Vendors reserve price. All animals will be sold in guineas (105 pence) and a commission of 5.25% will be charged by the Auctioneers on all sales.

**REGISTRATIONS:** All stock in the sale are registered with the respective breed societies unless stated otherwise.

**COMMISSIONS:** The Auctioneers will dutifully execute commissions to purchase for buyers unable to attend the sale personally, upon receipt of written instructions.

**SETTLEMENT AND CLEARANCE OF STOCK:** Settlement in full is due immediately at the close of Sale. No animal may leave the Sale Premises without an official 'Pass Slip', obtainable only from the Auctioneers upon settlement.

**ANIMAL WELFARE:** Vendors and Purchasers should note the CODE OF PRACTICE published by the Livestock Auctioneers' Market Committee for England and Wales IS OPERATIVE IN BORDERWAY MART and that weakly, unhealthy or injured stock will be refused entry by the Auctioneers. Enquiries should be directed through the market office to the Auctioneers' ANIMAL HEALTH and WELFARE OFFICER (Mr Andrew Templeton).

**INSURANCE:** A representative of H & H Insurance Brokers, will be present at the sale and will be pleased to quote Purchasers for transit and other risks.

**UK TAGS/TATTOO MARKS** - All cattle entered for the Sale will have their UK Tags/Tattoo marks examined as an integral part of the pre-sale inspection procedure. Any marks found to have faulty, incorrect or illegible marks will be REJECTED from the Sale. Vendors are therefore urged, in their own best interests, to examine the UK Tags/Tattoo marks of Sale cattle before the animal(s) leave their farm, so that faulty marks can be rectified in accordance with the required Society procedures.

No animal may be sold privately before being passed through the Auction Ring and FULL

**COMMISSION** will be charged on the sale of any animal sold by private treaty after the auction. All such transactions MUST BE PASSED THROUGH THE AUCTIONEERS OFFICE.

**PRIZE MONEY:** (but not trophies) will be withheld unless the winners are sold, either by auction or private treaty.

**NBA WARRANTIES:** This Sale is also held subject to the Special Terms and Conditions of Sale recommended for Sales of Pedigree Beef Cattle by the National Beed Association. The preparation of these Terms and Conditions has proved a lengthy and costly process and, in order to defray the legal and other costs involved, and to provide a continuing source of revenue to assist the association in its vital work for Pedigree Cattle Breeders, the Council of the Association has decided that a special levy, amounting to £3 per male and £2 per female head/lot sold (plus VAT) shall be charged to each Purchaser

### ABERDEEN ANGUS

**CONDITIONS OF SALE:** The Aberdeen Angus Cattle Society have adopted the Auction Rules and Conditions of Sale drawn up by the N.B.A. This Sale is held subject to these rules and the Auctioneers' General Conditions of Sale, both available on request. In the event of any discrepancy between the two sets of conditions, the N.B.A. Conditions of Sale shall prevail.

**PEDIGREE TRANSFERS:** Official Pedigree Transfers will be effected by the Auctioneers and the Aberdeen Angus Society as soon as possible after the Sale. Full Pedigrees will be transferred free of charge to all members.

**MINIMUM SELLING PRICE** - There will be a Minimum Selling Price of 3000 guineas on each bull presented for sale - i.e. if no opening bid of 3000gns is received for any particular lot, that lot will be passed out of the ring unsold.

### **NOTICE TO VENDOR/PURCHASER:**

Any animals that fails the veterinary inspection on dentition and dependent on the veterinary's decision the animal may be offered for sale, but for commercial use only. This must be announced from the rostrum at the time of sale.

### HEREFORD

**CONDITIONS OF SALE:** This Sale is held subject to the conditions of Sale drawn up by the NBA and the Auctioneers' General Conditions of Sale, both available on request. In the event of any discrepancy between the two sets of conditions, the NBA Conditions of Sale shall prevail.

**TRANSFERS:** HEREFORD CATTLE: a fee of £24 + VAT will be charged to the Vendor.

### BEEF SHORTHORN

**CONDITIONS OF SALE:** This Sale is held under the Beef Shorthorn Cattle Society's sale auction rules and subject to recommended Conditions of Sale drawn up by the National Beef Association (NBA). This sale is held subject to these rules and the Auctioneers' General Conditions of Sale, both available on request. In the event of any discrepancy between the two sets of conditions, the NBA Conditions of Sale shall prevail.

**SOCIETY SALE LEVY:** A levy of 3% of the net (after deduction of auctioneers commission) will be deducted from the vendors statements before settlement and paid to the Beef Shorthorn Cattle Society.

**UPSET PRICE** - There will be an 'Upset Price' of 2000gns on each bull entered for the sale, if no opening bid of 2000gns is received for any particular lot, the animal concerned will pass out the sale ring unsold.

**PRE-SALE INSPECTION** – All animals entered for the sale must be available for inspections as per the timetable. The officially appointed Beef Shorthorn Cattle Society stewards will check the animals for any patent defects, such as lameness, etc. The animals will also be weighed to make sure that they comply with the Beef Shorthorn minimum weight for age.

**CUTTHORN CAMILLA'S SHIELA** is the first daughter of **Cairnsmore Phenomenal** and what a cracker she is. Would make a smashing show heifer for the season or a special stock heifer for someone. She has structure, balance, good figures and a splash of colour. We really like this lady!

## DRAFT SALE OF FEMALES FROM F J HUGILL (BALLARD)

This year we offer our annual draft of heifers free of the bull, to fit with a spring calving system. We have been regular supporters of the Carlisle spring Beef Shorthorn sale since its inception and return each year to sell our surplus breeding heifers from our 50 cow herd. We run a low input, low labour system, producing heifers suited to both the pedigree and commercial breeder looking for functional low maintenance suckler cows. This years heifers include a cohort from from Oakleigh Kildale Lad and Fearn Muir. We offer a range of proven family lines including a set of Floss twins.

## HEREFORD VENDORS INDEX

### FLETCHER, CS (PEN: 65)

### BARWISE

83, 84, 86

BARWISE HALL, APPLEBY IN WESTMORLAND, CA16 6TD

- Consigned from a 1 year TB testing area – last tested 26/02/24
- Member of HiHealth Herdcare
- BVD accredited free
- IBR accredited free
- BVD vaccinated (Bovela)
- Johnne's risk level 1

### HEWSON, A (PEN: 69)

### AMBERFIELD

81

PARTON FARM, WIGTON, CUMBRIA, CA7 0HE

- Consigned from a 1 year TB testing area – last tested 20/02/24
- Member of HiHealth Herdcare
- BVD accredited free
- BVD vaccinated
- Johnne's risk level 1

### WILSON, JRB & SONS (PEN: 67)

### ROMANY

82, 85

COWBOG FARM, KELSO, ROXBURGHSHIRE, TD5 8EH

- Consigned from a 4 year TB testing area – last tested 15/02/23
- Member of SAC Premium Cattle Health Scheme
- BVD accredited free
- BVD vaccinated
- Johnne's risk level 1

ST FORT ESCORT has a great temperament and with his dam's pedigree being 50% 'Native' Aberdeen Angus this makes his genetics fairly unique. He is semen tested and has a very good showing record including the RHS in 2023. St Fort Edwin (sire) was bred out of the outstanding cow – Moncur Edwina R258.

**ST FORT PRINCE MONTY** is from the first offering of bulls by our stock bull **Idvies Pink Purveyor** and gsire **Idvies Ferrari**. He has a lovely calm nature bred by our cow **St Fort Primrose May**. Her calving record is excellent and her sire was the outstanding **Wedderlie Fantastic**. He has been semen tested. His DLWG is well worth noting.

**HAROLD BOSS HOFF** sired by £25,000 **Linton Gilbertines Elgin** and out of the **Rawburn Boss Lady** line. Gdam is full sister to **Braw Lad**. A pedigree full of great genetics. Full brother is at Housesteads Angus. A great set of figures and a very stylish bull with lots of natural shape and length.

**BOREWELL MONARK** is an interesting mix of genetics with **Rawburn Boss Hogg** and our American donor **Ankony Miss Effie**. This female line has performed very well in the Nethererton and HW herds. Pedigree also contains the Royal Cornwall Show Champion **Tibbie H224** who won as a yearling heifer and produced us **Borewell Try** who won best bull calf in the Border Angus herd competition.

ST FORT ENDEAVOUR is sired by our stock bull **St Fort Edwin**. This young bull shows enormous promise. **St Fort Equidamself's** (dam) pedigree goes way back to the famous Strathburn Herd started by Mr R Thompson. **St Fort Edwin's** (sire) pedigree shows his gsire as being **Logie Lord Bruce**. A bull with an excellent future. Has been semen tested.

 Paragon Advanced Breeding

At UK Sires, we offer breeders and bull owners the complete service, from collecting, processing and storing semen at the UK's largest independent EU-licensed Stud and Semen Store, to helping market sales, both domestically and internationally.

**WE COLLECT SEMEN ON FARM...**

ANYWHERE IN GB, for processing in our lab down in Devon, for domestic use in England, Scotland and Wales only.

**THE BEST VALUE BULL INSURANCE IS PROTECTING THE VALUABLE GENETICS!** To start the application process, contact our Administration Manager Liz Harvey on 01803 863 560

**SCOTLAND & NORTHERN ENGLAND**  
Jim Cameron & David Fleming

**NORTHERN ENGLAND**  
North Midlands, East of M5/M6, East Anglia  
Naim Wyllie

**NORTH WALES**  
& Cheshire  
Owen Tunney

**SOUTHERN ENGLAND**  
Richard Edwards

**ON STUD**

**WHY NOT** bring your bull to our Stud so semen can be collected at **EXPORT STANDARD!**

UK Sires have exported semen from over 40 breeds, all over the world. We collect and process at our modern facility on the Stud in Dartington, Totnes, before storing ready for distribution to individual farmers and breeding operatives in the UK or marketing through our own retail service both here and overseas

## BEEF SHORTHORN

### UNDERSTANDING THE BREEDPLAN PERFORMANCE RECORDING INFORMATION IN THIS CATALOGUE

Only Beef Shorthorn GROUP BREEDPLAN EBVs or INTERIM EBVs with Accuracy (Acc) can be validly compared between herds.

#### ESTIMATED BREEDING VALUES (EBVs)

The EBV is the best estimate of an animal's genetic merit for that trait.

#### ACCURACY

An accuracy value is presented with every EBV and gives an indication of the amount of information that has been used in the calculation of that EBV. The higher the accuracy the lower the likelihood of change in the animal's EBV as more information is analysed for that animal or its relatives. Accuracy below 75% should be considered low.

#### CALVING EASE

Calving Ease EBVs are based on calving difficulty scores, birth weights and gestation length information. More positive EBVs are favourable and indicate easier calving.

**DIR:** Direct calving ease indicates how this animal influences the birth of its progeny.

**DTRS:** Daughter's calving ease indicates how well the animal produces daughters that have easier calving.

#### BIRTH AND FERTILITY

**GL:** Gestation Length EBV (days) is based on AI records. Lower (negative) GL EBVs indicate shorter gestation lengths which generally relate to easier calving and increased growth after birth.

**BWT:** Birth Weight EBV (kg) is based on the measured birth weight of animals, adjusted for dam age. The lower the value the lighter the calf at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers.

**SS:** Scrotal Size EBV (cm) is an indicator of male fertility in regards to semen quality and quantity. Higher (positive) EBVs indicate higher fertility. There is also a small negative correlation with age of puberty in female progeny.

#### GROWTH

**MILK:** 200-Day Milk EBV (kg) is an estimate of an animal's milking ability. For sires, this EBV is indicative of their daughter's milking ability as it affects the 200-day weight of their calves.

**200:** 200-Day Growth EBV (kg) is calculated from the weight of animals taken between 80 and 300 days of age. Values are adjusted to 200 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for growth to early ages.

**400:** 400-Day Weight EBV (kg) is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for yearling weight.

**600:** 600-Day Weight EBV (kg) is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

**MWT:** Mature Cow Weight EBV (kg) is an estimate of the genetic difference in cow weight at 5 years of age. Smaller, or more moderate EBVs are generally more favourable.

## CARCASE

**CWT:** Carcase Weight EBV (kg) estimates the genetic difference in carcase weight at a standard age of 650 days.

**EMA:** Eye Muscle Area EBV (cm<sup>2</sup>) estimates genetic differences in eye muscle area of a 300kg dressed carcase. More positive EBVs indicate better muscling on animals.

**FAT:** Rib Fat EBV (mm) estimates the genetic differences in fat depth at the rib in a 300kg dressed carcase. More positive EBVs indicate more subcutaneous fat and earlier maturity.

**RBV%:** Retail Beef Yield Percent EBV (%) represents total (boned out) meat yield as a percentage of a 300kg dressed carcase. A more positive EBV indicates higher percentage yield for the 300kg carcase size.

**IMF%:** Intra-muscular Fat Percent EBV (%) is an estimate of the genetic difference in the percentage of intra-muscular fat at the 12/13<sup>th</sup> rib site in a 300kg carcase. Depending on market targets, larger more positive values are generally more favourable.

## Terminal index

The Shorthorn Terminal index is aimed at a commercial herd using Shorthorn bulls over dairy cross cows to breed steers and heifers to turn off at 19 months of age. All progeny are destined for slaughter and no replacement females are selected from within the herd. There is some emphasis on calving ease while finishing steers at around 580 kg live weight (310 kg carcase weight) using a pasture based production system.

Use this index in a commercial herd to produce progeny for slaughter. The index has moderate emphasis on easier calving (ie getting a live calf with minimal human interference) while producing calves that will then grow quickly to market specifications at around 19 months of age. The index is focused on slaughter animals and does not account for maternal traits and is therefore not suited to breeding replacement females.

If you are using smaller framed cows or heifers in your herd, then you should also put extra emphasis on a higher Calving Ease Direct EBV when selecting a sire using this index.

**Self Replacing index** - The Shorthorn Self Replacing index is aimed at a Shorthorn herd selecting replacement females from within the herd while breeding steers and excess heifers to turn off at 19 months of age. There is emphasis on calving ease and maternal traits while also looking to finish steers for slaughter at around 580 kg live weight (310 kg carcase weight) using a pasture based production system supplemented with extra rations during the finishing phase.

This Self Replacing index is also suitable to using Shorthorn sires over mixed breed cows where replacement females are sourced from within the herd. There may be some hybrid vigour expressed in the progeny depending on the breed type of the cows used. Therefore you should consider placing extra emphasis on the Calving Ease EBVs (more positive) of the sire to allow for possible heavier birth weights of his calves due to hybrid vigour.

Use this index in both commercial and pedigree herds where you are balancing the requirements of selecting replacement females while also producing animals for slaughter.

**Maternal Index** - The Maternal Index is designed for a commercial Beef Shorthorn cross herd that is focussed on breeding herd replacements and on weaning as many and as heavy calves as possible at 8 months of age. It estimates the genetic differences between animals in net profitability per cow mated, for an example Beef Shorthorn Euro cross commercial cow herd targeting the production of pasture grown calves. Steers and heifers are weaned and marketed at an average of 350kg live weight at 8 months of age for further finishing or as replacement heifers.

The Beef Shorthorn GROUP BREEDPLAN Estimated Breeding Values contained in this Sale Catalogue were compiled by the Agricultural Business Research Institute (ABRI) from data supplied by the breeders. Neither the Beef Shorthorn Cattle Society nor the ABRI oversee or audit the collection of this data.

## Beef Shorthorn Cattle Society Sale Regulations

### Notes for Sale/Auction Catalogues

Whilst every effort is made to ensure the accuracy of the information contained on the website database and the pedigree certificate, the information is not warranted by the Society as it is based on data supplied by members and/or third parties. Purchasers should check the animal enquiry screen of the Society website for sire or parentage verification. Where this field is blank the animal has not been verified. In the case of females that are neither embryos nor imports and with no parentage queries this field will not be completed and will be left intentionally blank as verification is not required. The Society and its officers shall not have any liability for the accuracy of the information contained within either the website database or the pedigree certificate.

The Beef Shorthorn Cattle Society has previously sanctioned the use of Maine Anjou cattle (a French breed of Shorthorn derivatives) in a controlled breed improvement programme. That successful programme is now complete and has been closed (Oct 1999).

All calves born on or after 1 January 2001 shall be registered in the Coates Herd Book (Beef) with no mention of percentage (pertaining to Maine Anjou influence) provided that both parents are previously registered in Coates Herd book (Beef). Purchasers who are interested in the influence of Maine Anjou in any prospective purchase are invited to inspect the four-generation pedigree certificate or contact the Secretary for further details. Cattle born before 1 January 2001 will continue to display the percentage of pure Shorthorn blood on their certificate.

### Other Society rules as follows:

- By a ruling of the Directors of the Beef Shorthorn Cattle Society a levy of three per cent of the net sale price (after deduction of auctioneers' commission) will be deducted from the vendors statements before settlement and paid to the Beef shorthorn Cattle Society.
- All Cattle will be sold with an NBA fertility warranty. The cost of this warranty is £6 + vat per male animal and £4 + vat per female animal. This cost will be divided equally between the vendor and the purchaser and collected by the auctioneer at the time of sale. The auctioneer will pay this money directly to the NBA.
- Animals will be inspected in the sale premises and, by a ruling of the Directors, the inspector(s) is empowered to instruct any exhibitor to withdraw from the show and sale any animal they consider not to be of the required standard. Bulls will be inspected by a vet appointed by the Society. Bulls not attaining the required minimum testicle size or displaying irregular testicular conformation or displaying overshot or undershot jaws will be rejected from the sale.
- There will be a minimum selling price of 1800gns on each bull entered for sale. Bulls not attracting a bid of 1800gns will be passed out of the ring unsold.
- All show animals must be halter led.
- Grading register animals will be sold at the end of the sale.
- The Beef Shorthorn Cattle Society operates a compulsory health testing scheme at all Society sales listed below.

### Health Testing Requirements for Beef Shorthorn Society Sales

*Amended January 2020*

- 1) All animals entered for Beef Shorthorn Society Sales must come from herds which are members of a registered CHecs health scheme and must have been testing for BVD and Johnes Disease for a minimum of 12 months.
- 2) All animals must be individually blood tested no more than 3 months prior to the sale for BVD antigen and IBR antibody unless coming from a herd which has accredited status for the relevant disease. Accredited herds do not need individual animal tests for the diseases for which they are accredited.

- 3) All females whether from an accredited herd or not must be vaccinated against BVD to provide cover for the relevant period (ie, the sale date) relating to the type of vaccine. The vaccination date must be submitted to the relevant health scheme provider when the pen card is requested. It is recommended that males should also be vaccinated as above.
- 4) Animals testing antigen positive (PI) for BVD will not be accepted for sale.
- 5) The results of the blood tests must be displayed at the sale on a health pen card supplied by a CHeCS accredited health scheme.
- 6) All animals must have a risk level for Johne's displayed on the pen card and this must be a minimum level 4.
- 7) All animals must have an individual pen card with the date of the last TB test and the testing interval (or completed as 'TB exempt' where applicable). The box must not be left blank.
- 8) Calves under 1 month old cannot be accepted for sale.
- 9) Calves at foot over 1 month from non BVD Accredited herds need to be tested for BVD antigen. Calves from BVD accredited herds do not need to be tested.
- 10) No other health information will be allowed to be displayed.
- 11) It is the responsibility of the vendor to ensure that the correct tests have been carried out and that the health pen cards are available for the sale.

#### Advisory checklist for vendors

- 1) Blood test all animals bound for sale (including calves over 1 month old which need only be tested for BVD antigen) no more than 3 months prior to the sale and at least 1 month prior to sale.
- 2) Vaccinate all animals bound for the sale against BVD. Ask your vet for advice on when to vaccinate.
- 3) Send the blood samples to one of the CHeCS accredited health schemes (details on website) stating that tests are required for BVD antigen and IBR antibody and **request a health pen card stating clearly that the animals are entered for sale at a Beef Shorthorn Society Sale**. If your vet is sending off the samples on your behalf, ensure they see a copy of this letter and that all the required tests are requested on the sample submission form.
- 4) If herd accredited for BVD and IBR, request pen cards at least 4 weeks prior to sale with vaccination information.
- 5) Make sure you have received the cards before you arrive at the sale and check that all the relevant information is displayed on the card.

If you have any questions about these requirements, please contact the Society office.

#### Herd Health Declaration

In order to give prospective purchasers as much information as possible about the health status of cattle for sale, we are also including a Herd Health Declaration. The Herd Health Declaration should be returned to the auctioneers with the entries. This information will be printed in the front of the sale catalogue under the vendor's name.

**ANIMALS ARRIVING AT A SALE WITHOUT A COMPLETED HEALTH PEN CARD WILL NOT BE ALLOWED IN THE SALE. IT IS ALSO THE VENDOR'S RESPONSIBILITY TO ENSURE THE CARDS ARE CORRECT.**

### March 2024 Beef Shorthorn Single-Step BREEDPLAN - Percentile Bands for all 2022 born animals

Use this table as a guide to compare individual animals with the current genetic level of the breed

## HEREFORD

### Understanding Breedplan performance information

Only Hereford group Breedplan EBVs or interim EBVs with accuracy (Acc) can be validly compared between herds.

#### Estimated breeding values (EBVS)

The EBV is the best estimate of an animal's genetic merit for that trait.

#### Accuracy

An accuracy value is presented with every EBV and gives an indication of the amount of information that has been used in the calculation of that EBV. The higher the accuracy the lower the likelihood of change in the animal's EBV as more information is analysed for that animal or it's relatives. Accuracy below 75% should be considered low.

#### Calving ease

Calving ease EBVs are based on calving difficulty scores, birth weights and gestation length information. More positive EBVs are favourable and indicate easier calving.

**DIR:** Direct calving ease indicates how this animal influences the birth of its progeny.

**DTRS:** Daughter's calving ease indicates how well the animal produces daughters that have easier calving.

#### Birth and fertility

**GL:** Gestation length EBV (days) is based on AI records. Lower (negative) GL EBVs indicate shorter gestation lengths which generally relate to easier calving and increased growth after birth.

**BWT:** Birth weight EBV (kg) is based on the measured birth weight of animals, adjusted for dam age. The lower the value the lighter the calf at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers.

**SS:** Scrotal size EBV (cm) is an indicator of male fertility in regards to semen quality and quantity. Higher (positive) EBVs indicate higher fertility. There is also a small negative correlation with age of puberty in female progeny.

#### Growth

**MILK:** 200-day milk EBV (kg) is an estimate of an animal's milking ability. For sires, this EBV is indicative of their daughter's milking ability as it affects the 200-day weight of their calves.

**200:** 200-day growth EBV (kg) is calculated from the weight of animals taken between 80 and 300 days of age. Values are adjusted to 200 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for growth to early ages.

**400:** 400-day weight EBV (kg) is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for yearling weight.

**600:** 600-day weight EBV (kg) is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

**MWT:** Mature cow weight EBV (kg) is an estimate of the genetic difference in cow weight at 5 years of age. Smaller, or more moderate EBVs are generally more favourable.

#### Carcase

**CWT:** Carcase weight EBV (kg) estimates the genetic difference in carcase weight at a standard age of 650 days.

**EMA:** Eye muscle area EBV (cm<sup>2</sup>) estimates genetic differences in eye muscle area of a 300kg dressed carcass. More positive EBVs indicate better muscling on animals.

**FAT:** Rib fat EBV (mm) estimates the genetic differences in fat depth at the rib in a 300kg dressed carcass. More positive EBVs indicate more subcutaneous fat and earlier maturity.

**RBV%:** Retail beef yield percent EBV (%) represents total (boned out) meat yield as a percentage of a 300kg dressed carcass. A more positive EBV indicates higher percentage yield for the 300kg carcass size.

**IMF%:** Intra-muscular fat percent EBV (%) is an estimate of the genetic difference in the percentage of intra-muscular fat at the 12/13<sup>th</sup> rib site in a 300kg carcass. Depending on market targets, larger more positive values are generally more favourable.

Indexes combine the EBVs with economic information for specific market and production systems to rank animals based on relative profit values.

#### Terminal index

The Hereford terminal index is aimed at a commercial herd using Hereford bulls over dairy cross cows to breed steers and heifers to turn off at 16 months of age. All progeny are destined for slaughter and no replacement females are selected from within the herd. There is some emphasis on calving ease while finishing steers at around 600 kg live weight (330 kg carcass weight) using a pasture-based production system.

Use this index in a commercial herd to produce progeny for slaughter. The index has moderate emphasis on easier calving (i.e., getting a live calf with minimal human interference) while producing calves that will then grow quickly to market specifications at around 16 months of age. The index is focused on slaughter animals and does not account for maternal traits and is therefore not suited to breeding replacement females.

If you are using smaller framed cows or heifers in your herd, then you should also put extra emphasis on a higher calving ease direct EBV when selecting a sire using this index.

#### Self replacing index

The Hereford self replacing index is aimed at a Hereford herd selecting replacement females from within the herd while breeding steers and excess heifers to turn off at 22 months of age. There is emphasis on calving ease and maternal traits while also looking to finish steers for slaughter at around 620 kg live weight (320 kg carcass weight) using a pasture-based production system supplemented with extra rations during the finishing phase.

This self replacing index is also suitable to using Hereford sires over mixed breed cows where replacement females are sourced from within the herd. There may be some hybrid vigour expressed in the progeny depending on the breed type of the cows used. Therefore, you should consider placing extra emphasis on the calving ease EBVs (more positive) of the sire to allow for possible heavier birth weights of his calves due to hybrid vigour.

Use this index in both commercial and pedigree herds where you are balancing the requirements of selecting replacement females while also producing animals for slaughter.

The Hereford group Breedplan estimated breeding values contained in this sale catalogue were compiled by the Agricultural Business Research Institute (ABRI) from data supplied by the breeders. Neither the Hereford Cattle Society nor the ABRI oversee or audit the collection of this data.

## Percentile bands for 2022 born calves

| Percentile Band | Calving Ease DIR (%) | Calving Ease DTRS (%) | Gestation Length (days) | Birth Wt. (kg) | 200 Day Wt. (kg) | 400 Day Wt. (kg) | 600 Day Wt. (kg) | Mat. Cow Wt. (kg) | 200 Day Milk (kg) | Scrotal Size (cm) | Carcass Wt. (kg) | Eye Muscle Area (sq cm) | Rib Fat (mm) | Retail Beef Yield (%) | IMF (%) | Hereford Terminal Index (GBP) | Hereford Self Replacing Index (GBP) |

## Superior carcass sire scheme

Hereford Cattle Society is offering a financial incentive to users of certified superior carcass sires. These are bulls which have been identified from their Breedplan records as having potential to produce improved carcass quality in their progeny.

Purchasers of a superior carcass sire will be eligible to claim £5 per calf on the progeny of the bull – confined to a maximum of 100 calves during a claim period of up to four years (three crops of calves) from the purchase date of the bull.

The incentive may only be claimed once in the bull's life and is confined to the original purchaser.

Claims to be submitted by the owner of the bull at six monthly intervals for calves up to six months of age by 30 June and 31 December each year – no payments will be made in respect of any calf that is over six months of age at the time the claim is received.

All claims must be supported by an official list obtained by the owner of the bull from, in the case of England, Scotland and Wales – BCMS (British Cattle Movement Service) and in Northern Ireland – APHIS (Animal and Public Health Information Service).

Calves will be subject to a random DNA test for sire verification and checks will be made with the appropriate authorities that the bull was present on the farm at the time of conception of the calves.

**Bulls qualifying for this incentive will be highlighted within the notes of the sale catalogue.**

## Completeness of performance recording

One of the key factors underpinning the accuracy of EBVs is the quantity of performance information recorded with Breedplan. 'Completeness of performance' assesses the quantity of pedigree and performance information submitted to Breedplan by an individual herd.

### Star rating

The star rating for each herd is calculated based on the proportion of calves within the herd born in a fixed five year period which have been performance recorded for each trait. Different criteria are used within each individual breed depending on the traits for which EBVs are calculated within the breed. Each herd receives a star rating on a 0 – 5 scale (including half stars) that summarises the 'completeness' of their performance information.

Herds with a star rating of 5 are considered to be gold standard and are recording 'complete' performance information for all traits for which EBVs are available.

While ultimately EBV accuracy values provide an indication of the reliability an animal's EBVs, the completeness of performance star rating provides both pedigree and commercial producers alike with an assessment of how much performance has been submitted to Breedplan by a herd when looking at the EBVs for animals within their herd.

| Star Rating | Description                                                                                                                                                                                                                                                               |
|-------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 5.0         | Herds with a star rating of "5" are gold standard. They are considered to be recording "complete" performance information with BREEDPLAN for all animals across all traits for which EBVs are available.                                                                  |
| 4.0 or 4.5  | Herds with a star rating of "4" or "4.5" are silver standard. They are considered to be recording comprehensive performance information with BREEDPLAN for most animals and traits, but are recording less performance than a 5 star herd.                                |
| 3.0 or 3.5  | Herds with a star rating of "3" or "3.5" are considered bronze standard. They are considered to be recording performance information with BREEDPLAN for a reasonable number of traits or animals, but are recording less performance information than a 4 or 5 star herd. |
| 2.5 or less | Herds with a rating of "2.5" or less are recording information with BREEDPLAN but not for all animals or traits. They are recording less performance information than a 3, 4 or 5 star herd.                                                                              |

**Important rule about buying and selling and risk status**

It is important to remember that if an animal of a lower risk status level is added to your herd, if it is ever sold on from your holding it must be sold as its original risk level status (i.e. a risk level 3 animal added to a risk level 2 herd must remain as risk level 3 if sold again).

However, animals added from a higher risk level status herd to a lower risk level status herd take on the status of the herd that they are added to and must be sold as such (i.e. a risk level 1 animal added to a risk level 4 herd would then have to be sold as risk level 4 in the future).

If you are looking to buy or sell stock it is important to know your own herd's Johnes's disease risk level, as well as that of any cattle that you might add to your herd.

**Level 1** – There have been at least three clear annual herd tests and there is a Johnes's disease herd health plan in place. This is the lowest level of risk

**Level 2** – There has been at least one clear herd test but the herd does not yet qualify for level 1 status. There is a Johnes's disease herd health plan in place

**Level 3** – 3% or less of the herd were identified as reactors at the most recent herd test. There is a Johnes's disease herd health plan in place

**Level 4** – More than 3% of the herd were identified as reactors at the most recent herd test. There is Johnes's disease herd health plan in place

**Level 5** – This includes herds without a health plan for Johnes's disease, herds that do not adhere to the mandatory elements of the health plan and herds that do not carry out the required testing. This is the highest level of risk.

**Please note: Important rule about buying and selling and risk status**

Selling on animals that have been purchased from another herd: When an animal is purchased from a herd with an inferior Johnes's disease risk level than the herd to which it is added, the purchased animal retains the risk level of the herd of origin should it be sold on. For example it cannot be sold as risk level 1 if purchased as risk level 2, 3, 4 or 5. Animals that are purchased from a herd with a superior risk level can be sold only at the risk level that applies to the purchasers herd at the time of subsequent sale. For example, an animal purchased as risk level 1 into a risk level 4 herd can only be sold at the risk level that applies to the level 4 receiving herd at the time of subsequent sale. Purchased animals are described on sale certificates as 'not-homebred' and cannot be sold with a herd status, with the exception of animals sourced from 25 Risk Level 1 herds that have remained throughout their lives in a Risk Level 1 herd and appropriate evidence of this is provided to their health scheme provider. This is at the discretion of the health scheme provider and assessed on a case by case basis.

**ABERDEEN ANGUS****UNDERSTANDING THE BREEDPLAN PERFORMANCE RECORDING INFORMATION IN THIS CATALOGUE**

Only Aberdeen-Angus GROUP BREEDPLAN EBVs or INTERIM EBVs with Accuracy (Acc) can be validly compared between herds.

**ESTIMATED BREEDING VALUES (EBVs)**

The EBV is the best estimate of an animal's genetic merit for that trait.

**ACCURACY**

An accuracy value (Acc) is presented with every EBV and gives an indication of the amount of information that has been used in the calculation of that EBV. The higher the accuracy the lower the likelihood of change in the animal's EBV as more information is analysed for that animal or its relatives.

**CALVING EASE**

Calving Ease EBVs are based on calving difficulty scores, birth weights and gestation length information. More positive EBVs are favourable and indicate easier calving.

**DIR:** Direct calving ease indicates how this animal influences the birth of its progeny. Using a bull in the Top 1% for CE direct (+7.0) is predicted to result in approximately 15% fewer assisted calvings in 2 year old heifers compared with using a bull in the Bottom 1% (-10.2). This range is predicted to be smaller in cows.

**Remember that the dam's genetics and management are significant factors influencing calving ease in any mating.**

**DTRS:** Daughter's calving ease indicates how well the animal produces daughters that have easier calving.

**BIRTH AND FERTILITY**

**GL:** Gestation Length EBV (days) is based on AI records. Lower (negative) GL EBVs indicate shorter gestation lengths which generally relate to easier calving and increased growth after birth.

**BWT:** Birth Weight EBV (kg) is based on the measured birth weight of animals, adjusted for dam age. The lower the value the lighter the calf at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers.

**SS:** Scrotal Size EBV (cm) is an indicator of male fertility in regards to semen quality and quantity. Higher (positive) EBVs indicate higher fertility. There is also a small negative correlation with age of puberty in female progeny.

**GROWTH**

**MILK:** 200-Day Milk EBV (kg) is an estimate of an animal's milking ability. For sires, this EBV is indicative of their daughter's milking ability as it affects the 200-day weight of their calves.

**200:** 200-Day Growth EBV (kg) is calculated from the weight of animals taken between 80 and 300 days of age. Values are adjusted to 200 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for growth to early ages.

**400:** 400-Day Weight EBV (kg) is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for yearling weight.

**600:** 600-Day Weight EBV (kg) is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

**MWT:** Mature Cow Weight EBV (kg) is an estimate of the genetic difference in cow weight at 5 years of age. Smaller, or more moderate EBVs are generally more favourable.

**CARCASE**

**CWT:** Carcase Weight EBV (kg) estimates the genetic difference in carcase weight at a standard age of 650 days.

**EMA:** Eye Muscle Area EBV (cm<sup>2</sup>) estimates genetic differences in eye muscle area of a 300kg dressed carcase. More positive EBVs indicate better muscling on animals.

**FAT:** Rib Fat EBV (mm) estimates the genetic differences in fat depth at the rib in a 300kg dressed carcase. More positive EBVs indicate more subcutaneous fat and earlier maturity.

**RBV%:** Retail Beef Yield Percent EBV (%) represents total (boned out) meat yield as a percentage of a 300kg dressed carcase. A more positive EBV indicates higher percentage yield for the 300kg carcase size.

**IMF%:** Intra-muscular Fat Percent EBV (%) is an estimate of the genetic difference in the percentage of intra-muscular fat at the 12/13<sup>th</sup> rib site in a 300kg carcase. Depending on market targets, larger more positive values are generally more favourable.

**Indexes** combine the EBVs with economic information for specific market and production systems to rank animals based on relative profit values.

**Terminal index**

The Angus Terminal index is aimed at a commercial herd using Angus bulls over dairy cross cows to breed steers and heifers to turn off at 16 months of age. All progeny are destined for slaughter and no replacement females are selected from within the herd. There is some emphasis on calving ease while finishing steers at around 600 kg live weight (330 kg carcase weight) using a pasture based production system.

Use this index in a commercial herd to produce progeny for slaughter. The index has moderate emphasis on easier calving (ie getting a live calf with minimal human interference) while producing calves that will then grow quickly to market specifications at around 16 months of age. The index is focused on slaughter animals and does not account for maternal traits and is therefore not suited to breeding replacement females.

If you are using smaller framed cows or heifers in your herd, then you should also put extra emphasis on a higher Calving Ease Direct EBV when selecting a sire using this index.

**Self Replacing index**

The Angus Self Replacing index is aimed at an Angus herd selecting replacement females from within the herd while breeding steers and excess heifers to turn off at 18 months of age. There is emphasis on calving ease and maternal traits while also looking to finish steers for slaughter at around 615 kg live weight (330 kg carcase weight) using a pasture based production system supplemented with extra rations during the finishing phase.

This Self Replacing index is also suitable to using Angus sires over mixed breed cows where replacement females are sourced from within the herd. There may be some hybrid vigour expressed in the progeny depending on the breed type of the cows used. Therefore you should consider placing extra emphasis on the Calving Ease EBVs (more positive) of the sire to allow for possible heavier birth weights of his calves due to hybrid vigour.

Use this index in both commercial and pedigree herds where you are balancing the requirements of selecting replacement females while also producing animals for slaughter.

The Aberdeen-Angus GROUP BREEDPLAN Estimated Breeding Values contained in this Sale Catalogue were compiled by the Agricultural Business Research Institute (ABRI) from data supplied by the breeders. Neither the Aberdeen-Angus Cattle Society nor the ABRI oversee or audit the collection of this data.

## Aberdeen-Angus

### Percentile Bands for 2022 Born Calves

| Percentile Band | Calving Ease DIR (%) | Calving Ease DTRS (%) | Gestation Length (days) | Birth Wt. (kg) | 200 Day Wt (kg) | 400 Day Wt (kg) | 600 Day Wt (kg) | Mat Cow Wt (kg) | Milk (kg) | Scrotal Size (cm) | Carcase Wt (kg) | Eye Muscle Area (sq cm) | Fat Depth (mm) | Retail Beef Yield (%) | IMF (%) | Terminal Index | Self Replacing Index |

All bulls entered at official Society sales have their Myostatin status displayed in the catalogue.  
**Myostatin Status No Carrier**, means the bull does not carry the Myostatin variance gene.  
**Myostatin Status Single Version Carrier** means the bull carries a single version either Myostatin NT821 or F94L genes, but still accepted for registration by the Aberdeen-Angus Cattle Society

## QR CODES

In this catalogue we have printed QR code for each animal, this will take you to the web page which will give you full information on pedigree, bar charts and photographs if available

### Step 1

Download and install a QR code app on your smartphone if you don't yet have one. Open your App Store, Market, Marketplace or App World application (for the iPhone, Android, Windows Mobile and BlackBerry platforms, respectively).

### Step 2

Search for "QR code reader," and then download and install a free app. The app should be named something to the effect of "QR Code Scanner" or "QR Scanner." There are paid versions of these kinds of apps, but the free ones work just as well.

### Step 3

Open the QR barcode app on your smartphone, and choose "scan from camera" or "scan QR code" from the main menu. A new window should open with a square in the middle of it.

### Step 4

Center the QR code in the middle of the square that's currently displayed by your QR barcode app. The app should automatically take a picture of the QR code for you when it has finished scanning the code. A new pop-up menu will appear, with the QR code information on it.

### Step 5

Click the link that was embedded in the QR code, this will direct you to the Society website.

## Beef Shorthorn Prize List

Judge – Mr Tom Elliot, Kislingbury Herd

**HEALTH AND SAFETY RULES  
HARRISON & HETHERINGTON LIMITED  
NOTICE TO ALL VISITORS AND TRADERS  
PLEASE READ AND OBSERVE  
THE FOLLOWING**

All visitors and traders on site will be responsible for ensuring that they and their employees or sub-contractors engaged by them comply with all legal requirements, including the Health and Safety At Work etc., Act 1974, The Management of Health and Safety At Work Regulations, The Provision And Use of Work Equipment Regulations, etc.

All visitors and traders will be responsible for ensuring that their operations in no way affect the integrity of the company or its fire, safety or security arrangements and in no way compromise the health and safety and welfare of other visitors to and or employees of Harrison & Hetherington.

Although it is the visitors and traders responsibility to ensure that plant, equipment and systems in work are safe, Harrison & Hetherington Limited reserve the right to ask any visitor or trader to leave the market for any breaches in the Health and Safety Rules and/or Regulations.

Vendors must inform Harrison & Hetherington Limited of any livestock due to attend the market whose temperament, behaviour or condition may call for additional precautions for its safe handling.

When loading or unloading livestock handlers must ensure that the dock and vehicle gates are securely fixed so as to prevent the escape of animals.

Traders are responsible for providing and maintaining suitable livestock handling equipment. They should ensure that livestock handlers are fit, experienced in livestock handling and familiar with the livestock in their charge.

Children must not be permitted in any area where they may be at risk from livestock or machinery.

In the case of bulls, during the period when the show/sale is open to visitors, bulls in stalls or pens should not be left unattended. If the handler is temporarily absent, arrangements should be made with another vendor, steward or member of Harrison & Hetherington staff to oversee the bull until the handler returns.

Handling of Livestock at shows and sales: Harrison & Hetherington Limited recommend that an adult person should accompany any junior person during the showing/ sale of livestock in the ring and reserves the right to intervene at any point if, in the company's opinion, the person showing the livestock is at risk in undertaking that activity.

Passageways must be kept clear at all times during the auction sale. **PLEASE DO NOT STAND IN THE SALE RING ENTRANCE AND EXIT PASSAGES.**

The auction ring man escapes and refuges must be kept clear at all times.

All portable electrical equipment supplied and/or used by visitors and traders must be safe and fit for the purpose and should have a valid portable appliance test certificate.

**AUCTIONEER'S TERMS & CONDITIONS OF SALE**

(Incorporating the Auctioneer's  
Terms and Conditions )

1. The biddings to be regulated by the Auctioneers and the highest bidder, subject to the Vendor's reserve (if any), to be the purchaser. No bid shall be retracted and if any dispute should arise between two or more bidders, the Lot in dispute to be put up again and resold, or the Auctioneers may determine the dispute at their own discretion and their decision shall be final. The Auctioneers reserve the right to refuse the bid of any person without being called upon to give reason for such action.
2. The Purchaser to give his full name and dwelling place and pay for all Lots purchased immediately at the close of sale. No Lot or Lots shall be removed from the sale premises until paid for and a pass-out slip obtained from the Auctioneer's clerk but each and every Lot shall immediately at the fall of the hammer be considered as delivered and be and remain in every respect at the absolute risk and expense of the respective purchaser or purchasers thereof and shall be removed from the sale premises at the purchaser's expense. The right of property shall not pass until the full purchase price is paid.
3. Purchasers paying by cheque must be prepared, if required, to produce a banker's reference. As a result of the Money Laundering Regulations (2003) the auctioneers are unable to accept cash payments in excess of nine thousand pounds sterling for any any single or linked purchase transaction.
4. All statements in the catalogue, or made by the Auctioneers at the time of sale, also the correct identification of the animals, are the entire responsibility of the Vendors. The Auctioneers take no personal responsibility for the correctness of such statements or identities.
5. All statements in the catalogue, or any made by the Auctioneers at the time of sale relating to any veterinary or other tests are to be taken as statements of fact only. No such statements shall guarantee the purchaser of any animal against loss arising from the subsequent reaction of such animal to any test administered after the sale and the Vendors shall not be liable in any way should this occur.
6. All stock is sold subject to the Conditions of Sale recommended for use at markets by the Livestock Auctioneers' Markets Committee for England and Wales except in so far as these conflict with any Special Conditions applicable to the sale of pedigree stock, when the latter Conditions shall prevail.
7. Neither the Vendors nor the Auctioneers will be responsible for any accident or injury to persons or property, through fire or any other cause whatsoever, nor for any damage by animals prior to, during or after the sale.
8. No undertaking by the Auctioneers or their servants to take charge of any Lot or Lots after the sale or to forward them to their destination shall be held to impose upon the Auctioneers any legal obligation or vitiate any of these Conditions.
9. Inasmuch as the Auctioneers act as agents for a disclosed principal they shall not be considered personally responsible for any default on the part of either purchasers or Vendors and the remedy shall be against them only and not against the Auctioneers.
10. If these conditions are unfulfilled, the Vendors or Auctioneers shall have the power to resell the Lots, retaining any surplus and charging any deficiency and expense to the defaulter.
11. You have a right to know how we will use the information you have provided to us. We may share the information with other members of our group and may make this information available to relevant media groups and other interested parties on request. We and other members of the group may contact you by telephone, e-mail, post or fax to inform you of products or services available. If you do not want to be contacted for marketing purposes or do not wish your information to be made available to any other parties please notify us in writing.
