Stronger, healthier lambs: How SCCL Colostrum transformed our colostrum protocols at lambing time

As pedigree Suffolk and Beltex breeders, our farm has always prided itself on producing healthy, robust lambs. However, in the past we have faced challenges during the lambing season, particularly with cases of watery mouth. We originally relied on frozen cow colostrum from our next door dairy farm, as a substitute for ewes' colostrum. However, we were concerned about disease transmission so decided to look into other options. Last year, we were introduced to SCCL Lamb & Kid colostrum by our vet, and it has truly been a game changer for our farm. From the moment we began using SCCL, we noticed a remarkable improvement.

The quality and effectiveness of this colostrum has exceeded our expectations. We now feed 200ml of SCCL colostrum to every single lamb at birth, and for any ewes that have poorer quality, we use the handy SCCL calculator app to calculate how much SCCL powder we need to add to the dam colostrum to ensure our lambs are getting our target for quality. Since starting this protocol, the results have been nothing short of phenomenal.

Our lambs appear healthier and more vigorous right from the start. The ease of use and consistency of SCCL colostrum has made it an essential part of our lambing routine and we are incredibly grateful for the recommendation and the positive impact it has had on our flock's health.

We wholeheartedly believe that SCCL Lamb & Kid colostrum will remain a staple on our farm for years to come. It has transformed our approach to lamb care, and we can't thank the SCCL team enough for providing such an outstanding product. If you're looking for a reliable solution for your lambs, we cannot recommend SCCL highly enough.

EASY-SAFE-IDENTIFICATION
T: 01765 530296 info@caisleytags.co.uk

Caisley DNA tag is designed to take a tissue sample at the point of tagging. This means that you can tag your lambs as normal at birth, but you are able to take a tissue sample whilst doing so.

The system used is 'tamper proof', because the sample is sealed at the same time that the tag is inserted into the animal's ear. All details on the tag are also present on the tissue sample vial that is left firmly in the applicator after tagging. Sample vials can then be sent off for DNA analysis.

DNA TAGGING PROCEDURE

1

ORDER OFFICIAL TAGS FOR NEW-BORNS

For every animal, you will receive two tags: an EID tag and a DNA tag. The DNA tag is designed to collect tissue samples for testing upon insertion into the animal's ear.

2

CAISLEY PROCESS THE ORDER

The Caisley team will manage the processing. Tags for newborn animals will be registered with the Government (LUIS), printed with your flock number, and given sequentially assigned individual animal IDs. Included with the tags, you will find pre-addressed envelopes for sending DNA vials to Grassroots Systems Ltd.

3

TAG YOUR ANIMALS AND LOG INTO THE GRASSROOTS ONLINE REGISTRY

Please carefully read and follow the provided instructions for tissue tagging. Tag your animals and collect tissue samples. ***Log into the Grassroots Online Registry and log the lambs with their name, flock number, and individual animal number.*** Place the vials into the provided small plastic bag, and then into the pre-addressed jiffy envelopes. Take the prepared package to the post office and affix the appropriate postage. Minimum large letter postage.
