FORWARD

The **BRACK A BROOM** herd of Blonde d'Aquitaine cattle was founded in the late 1980's on the Isle of Man with purchases from Carlisle sales of foundation females

Mr & Mrs Crellin Frost registered their first home bred female in 1990 and so began the herd. The Frosts enjoyed much success in the show ring on the island and sold bulls to other beef producers here. Crellin was diligent in his research of bloodlines and used AI to improve and build on his existing genetics, mainly pure French, chosen for structure, fleshing and shape.

As the years went on the couple had a few health problems and Mrs Frost passed on some years ago after ill health. Crellin, whilst not as mobile in latter years, kept a sharp eye and keen interest in his herd up to his unanticipated death in January this year. The herd in its entirety was bequeathed to a family member who, due to other commitments, had no wish to continue with livestock farming. Thus the herd is offered for sale as a genuine dispersal rather than be sold piecemeal with the loss of Mr Frost's bloodlines which may be found desirable by other breeders.

The herd is a member of the High Health scheme (CHECS I believe) it is TB free, IBR free and Johnes free. The last clear TB test was in November 2020 and all animals are BVD tested negative. It is illegal on the island to retain a BVD positive animal (they must be destroyed)

All cows are fully pedigree registered and pedigree certificates can be collected with the passports. This year's calves have not been registered but they are a maximum of 6 weeks of age or thereabouts.

Carol Kermode

CONDITIONS OF SALE

The herd will be sold under Dispersal Sale rules and no warranties of any sort are implied or given
