## General Information & Sale Notes

**LOCATION:** The Sale will be held in the Borderway Mart, Carlisle Cumbria. Motorists should leave the M6 at Junction 43 and follow CARLISLE signs. The market is on the left hand side of the road within 1/4 mile of M6.

### CONDITIONS OF SALE

**ABERDEEN ANGUS:** The Aberdeen Angus Cattle Society have adopted the Auction Rules and Conditions of Sale drawn up by the N.B.A. This Sale is held subject to these rules and the Auctioneers' General Conditions of Sale, both available on request. In the event of any discrepancy between the two sets of conditions, the N.B.A. Conditions of Sale shall prevail.

**CHAROLAIS:** The British Charolais Cattle Society have adopted the Auction Rules and Conditions of Sale drawn up by the N.B.A. This Sale is held subject to these rules and the Auctioneers' General Conditions of Sale, both available on request. In the event of any discrepancy between the two sets of conditions, the N.B.A. Conditions of Sale shall prevail.

**METHOD OF SALE:** All cattle will be sold in guineas (105 pence) and strictly in catalogue order, unless any alteration is announced by the Auctioneers.

**COMMISSIONS:** The Auctioneers will dutifully execute commissions to purchase for buyers unable to attend the sale personally, upon receipt of written instructions.

**ONLINE BIDDING FACILITY** will be available on MartEye

**REGISTRATIONS:** All pedigree stock in the Sale are registered with their respective breed society.

**SETTLEMENT AND CLEARANCE OF STOCK:** Settlement in full is due immediately at the close of Sale. No animal may leave the Sale Premises without an official 'Pass Slip', obtainable only from the Auctioneers upon settlement.

Purchasers unable to remove their stock on the day of sale can arrange overnight accommodation with the Auctioneers on the understanding that all cattle are at Purchasers' risk.

**PEDIGREE TRANSFERS:** Official Pedigree Transfers will be effected by the Auctioneers and the relevant breed society as soon as possible after the Sale. Full Pedigrees will be transferred free of charge to all members.

**NBA LEVY:** This Sale is held subject to the Special Terms and Conditions of Sale recommended for Sales of Pedigree Beef Cattle by the National Beed Association. The preparation of these Terms and Conditions has proved a lengthy and costly process and, in order to defray the legal and other costs involved, and to provide a continuing source of revenue to assist the Association in its vital work for Pedigree Cattle Breeders, the Council of the Association has decided that a special levy, amounting to £3 per male and £2 per female head/lot sold (plus VAT) shall be charged to each Purchaser & Vendor.

**ANIMAL WELFARE:** Vendors and Purchasers should note the CODE OF PRACTICE published by the Livestock Auctioneers' Market Committee for England and Wales IS OPERATIVE IN BORDERWAY MART and that weakly, unhealthy or injured stock will be refused entry by the Auctioneers. Enquiries should be directed through the market office to the Auctioneers' ANIMAL HEALTH & WELFARE OFFICER (Mr Andrew Templeton).

**EXPORT:** The vendor is willing to offer cattle for export (subject to health requirements). All animals purchased for export will return to Gretnahouse to complete their quarantine period free of charge (food/water/straw) at the buyers risk. The purchaser must pay for all export costs.

## FOREWORD

The Gretnahouse herd is based at Gretna House Farms, a lowland farm of roughly 800 acres on the Scotland border. The farm was purchased in 1885 by Alasdair's great, great maternal grandfather Hugh Mackie. Predominately a grass and cereal farm, the venture into pedigrees started with Charolais, which were imported by Alasdair's father, Adair. In 1970, those four cattle were worth just about half the value of the farm. Adair passed his love for farming and cattle breeding onto Alasdair and when he returned to the farm aged 23, his lifelong passion for selection really took hold. In an article in the Scottish Farmer written by Ken Fletcher just before his death, he explained -

"It gives me a great buzz to see Gretnahouse bulls breeding as predicted in their new herds," But is it figures, or the stockman's eye? "Evaluation by eye is still so important. Charisma is something that doesn't have a figure, but does it have a value? Yes it really does. An animal that carries itself well is a better animal than one that doesn't. "An animal that has that special spark, more often than not also has some other commercially important traits. But, it's essential to use this expertise alongside figures data-driven knowledge is an important third leg on the stool alongside pedigree and eye."

Today, the Gretnahouse herd is one of the most influential in the national Charolais herdbook, with bulls selling to 25,000gns twice at national sales. Added to this achievement was the creation of an Aberdeen Angus herd in 2011, and in just over a decade, Gretnahouse Blacksmith L500 is one of the most sought-after bulls in the breed. In the early stages of the Simmental breed, the Gretnahouse name echoed through sales rings, with Gretnahouse Supersonic gaining widespread distinction, and even today his name is scattered throughout the herd book. More than 2000 head have been registered off him - the second-highest figure between when the Simmentals came into the UK in 1970 and 2019. Many, many herds have him in their background somewhere.

But 20 years ago, foot-and-mouth disease ripped the heart out of the prefix, taking with it all of the the herd. However, with resolution and the conviction of his breeding policies, the Gretnahouse name was re-established by Alasdair using a breeding program by embryo transfer purchasing some of the best genetics from fellow breeders.

Since Alasdair's passing, the Charolais progress at Gretnahouse has also been appreciated by fellow pedigree breeders. Bulls such as Gretnahouse Heman, has done immensely well in the Goldies herd; Gretnahouse Lunar, worked well at Balthayock; Gretnahouse Ivory, at Bonnykelly, and Gretnahouse Jugular, going into the Montgomery herd. Charolais sales since 2001 also include the 25,000gns Ubeauty; the 20,000gns Pouncer and 16,000gns Pimp all at Carlisle; the 25,000gns Lord; the 20,000gns Primate; the 15,000gns Heman, 16,000gns Rosco, and 12,000gns Ready - all at Stirling.

In the Angus herds, the first two Angus bulls sold at Stirling both made 10,000gns, to Idvies and to Rosemead. Subsequent trips there produced sales at 15,000gns for Exocet, to Schivas; 13,000gns to Glympton; 10,000gns to Belhaven plus many other five figure prices privately and sales to other notable herds like Galcantray and Tonley. Recently, the herd has twice set the centre record at Carlisle for A-A, first at 8,000gns and then at 12,000gns, both to pedigree herds and more recently achieved Junior and Overall Male Champion in May 2023.

These full herd dispersals marks another changes in the history of the farm, moving away from pedigrees, whilst it awaits the arrival and input of the next generation of the Houston family in due course.

My decision to disperse the Gretnahouse herds, following Alasdair's passing in 2021 has been very emotional and difficult. His passion and drive in all he did shone through and was reflected back with the achievements that he and the herds had. Not only in his beloved Charolais which his father Adair started as one of the original importers, but also with Simmental's and then latterly following the heart break of FMD, the Aberdeen Angus herd. He talked about cattle breeding being a drug for him - and having seen firsthand that love affair he had for his animals for the 30 years that we were together - I can vouch for that. However, Tara, Rafe and I take comfort knowing that the genetics that he so carefully selected will move into herds right across the country.

Finally, on a personal note, can I thank you all for the overwhelming support I have received - from my incredible family, to all of our fabulous friends, the warmth and generosity given in advice and guidance from cattle breeders, the amazing support I have had from everyone ever involved in Gretna House Farms, and finally to my loyal and hard working team at Gretna House Farms, both past and present, full and part time - you know who you are, and how much you have all done. I could not have survived the last few years without you all. Thank you.

Lucy Houston

09 October 2023

## **GRETNA HOUSE FARMS HEALTH STATUS**

Both Gretnahouse Charolais and Aberdeen Angus herds have had the health of its cows as the top priority over the years. The herds have been health testing as part of the Premium Cattle Health Scheme via SAC since 2005. No commercial cattle have been kept on the farm to maintain biosecurity and the focus has always been entirely on the 2 pedigree herds. Breeding has always been managed using a mixture of AI and Stock Bulls with a small amount of ET work used in previous years.

**TB** – The herd is currently in a routine 48 monthly testing interval, the last herd test date was on 24.11.2020 (**CLEAR TEST**)

**BVD** - The herd is vaccinated yearly with Bovela BVD, last vaccination March 2023. A yearly check test via PCHS is carried out on youngstock every Autumn and is consistently **CLEAR**. Last test was on 31.08.2023

**IBR** – The entire herd is **marker vaccinated** with Bovilis IBR marker Live shortly after birth, moving onto a rigid 6 monthly vaccination program with Hipra IBR marker Live. Sentinel testing of groups of yearlings have shown no seroconversion in them to wild strain IBR virus in the past few years.

**Leptospirosis** – The adult herd and bulling heifers are vaccinated with Spirovac last vaccinated in April 2023 prior to turnout. Sentinel testing of groups of yearlings always have shown negative antibody blood test results.

**Johnes** – Herd Blood Testing since 2011 with Premium Cattle Health Scheme at SAC. Currently Johnes level R3 due to a single animal testing positive December 2022. It was subsequently culled. Over the past 12 years the herd has been RL1 or RL2 in the majority of those years.

**Clostridial Diseases** - The adult herd (and older calves pre-weaning) are vaccinated as a precaution with Bravoxxin.

**Calves & Youngstock** – All calves are vaccinated at around 2-3 weeks old with an Intranasal vaccine (against RSV and PI3) to prevent viral pneumonias and repeated again before high-risk periods in late autumn.

**It has been a pleasure working with Alasdair and the team at Gretna House farms over the years to help maintain a healthy and productive herd he would be very proud of today.**

Kevin Beattie BVMS CertCHP MRCVS

CAPONTREE VETS, BRAMPTON, CUMBRIA.

## ABERDEEN ANGUS

### PREVIOUS HERD SIRES

#### **GRETNAHOUSE BLACKSMITH**

Blacksmith is a bull that doesn't need much of an introduction. He is perhaps recognised as one of the most influential Aberdeen Angus bulls of his generation. Sire to many five figure sum bulls and producing stunning females. The impact he has had on the herd is second to none, this can be seen in the numerous Blacksmith sired cows throughout the sale.

**GRETNAHOUSE BLACKSMITH**

### **STOUPHILL LORD RAMON**

12,000gns Lord Ramon was a correct bull of great length and impressive shape not often seen in the breed. He had fantastic breeding out of a Rawburn cow and by Duncanziemere Jigsaw. He has bred some lovely daughters making great milky cows with fantastic udder conformation. Daughters of his have sold into pedigree herds to £5000 and multiple sons sold privately to 5 figures.

**STOUPHILL LORD RAMON**

### **BLELACK PRINCE**

Prince was a moderate sized bull with fantastic soft flesh, great length and even better performance traits. One of the easiest calving bulls we've had at Gretnahouse. Unfortunately Prince's career was cut short due a back injury although the females he left are showing great promise. Prince is by Oneills Black Bardolier who's daughters sold to 32,000gns at Blelack.

**BLELACK PRINCE**

## SERVICE SIRES

### RAWBURN JUMBO ERIC T627

A fantastic son of Gretnahouse Blacksmith L500, out of a great Rawburn Joy Erica line, Jumbo Eric's dam is a performance giant and has bred multiple 5 figure bulls. We have AI'd a small number of cows to Jumbo Eric this year.

RAWBURN JUMBO ERIC T627

### HAYMOUNT PRECURSOR M255

18,000gns Supreme Champion, Precursor didn't have many calves at Gretnahouse, although they have sold extremely well. Multiple bulls to five figures he also left tremendous cows. He is seen in the back pedigree in some of the cows here, Precursor has been used in our AI program this year.

HAYMOUNT PRECURSOR M255

**RODMEAD PRIMERO R746**

Primero was bought from Blelack ahead of their dispersal where his calves at foot looked impressive. Before this he has been with the McCombie family where his sons had sold to 13,000gns and bred the Overall Champion at the May 2021 bull sales at Carlisle. Primero is an impressive size, correct, has great locomotion and has an outstanding temperament. Main service sire at Gretnahouse, he is also the sire of most of the calves at foot, his calves are fantastic and are showing great promise.

**GRETNAHOUSE EVAS HONEY Y452** is a heifer's calf who is tremendously fleshy with great figures to match. By the very easy calving **Blblack Prince V963**, whose sire **Oneills Black Bardolier** bred daughters to 32,000gns. Out of **Evas Honey W240** who is great daughter by **Greटनाhouse Lord Hornall U011**. Animals of this breeding are smaller, productive types of cows who always wean heavy calves.

**GRETNAHOUSE ELIZA Y461** is our first daughter by **Rodmead Primero R746** and what a heifer she is, we believe she is something special. Tremendous depth, correct and very well fleshed not to mention her great breed character. Her dam **Eliza U048** is by **Gretnahouse Blacklight R806** who sold for £10,000 to the Tynet herd, his sons from Gretnahouse have sold to a top of £7700. The 'Eliza' family has bred **Gretnahouse Exocet R770** who sold for 15,000gns and the 7000gns **Gretnahouse Eiger V147**. We think this heifer has a great future ahead of her and would be a real asset to any herd.

**GRETNAHOUSE KAY PRIDE Z487** is correct and stylish with some great breeding, cows like **Blelack Blackbird J131** the mother of **Blacksmith L500** and **Wall Kay Pride L858**, with daughters to £7000 and closely related to 8000gns **Gretnahouse KP P710**. Unfortunately, **Kay Pride Z487's** mother can't make it to the sale due to a hip injury sustained at housing. This heifer should hopefully follow in her mother's footsteps being a big correct, very well fleshed animal.

**Service Details:** Embryo implanted on 27/06/23 and scanned in calf. Due April 2023.

This is the first mating of its kind; we were really looking forward to this. **Gretnahouse Blacksmith L500** x **Gretnahouse Fleur L533**.

**Gretnahouse Blacksmith L500** (*sire*) is one of the most dominant sires in the breed to date. He combines performance with faultless breed character and style. His sons have been amongst the most sought after in the UK in recent years.

**Gretnahouse Fleur L533** (*dam*) goes back to the Netherton Fleur family, with **Netherton Fleur G413** 25,000gns Winter Show Champion, **Netherton Fleur D334** 2010 Royal Highland Show Champion and Netherton Fleur Y298 first cow in the breed to sell over 20,000gns. The Gretnahouse Fleur family bred well at Brailes Livestock producing 12,000gns **Brailes Fabulous**.

## CHAROLAIS

### PREVIOUS HERD SIRES

#### **WELSEY EQUINOX**

Equinox has been one of the most influential bulls of his generation for calving ease, with now over 650 calves registered in the national herdbook. At Gretnahouse he has bred multiple sons to £10,000 +, with numerous bulls working in pedigree herds. Not only that, the females he has left in the herd are performing incredibly well, they are milky, easily fleshed with good size and bone. His impressive daughters can be seen throughout the catalogue.

**WELSEY EQUINOX**

**BATHAYOCK GLADIATOR**

Gladiator was bought for 17,000gns and was a powerful bull with great length and style whilst maintaining all round good performance traits. Selling numerous bulls to five figures including the standout 25,000gns Gretnahouse Lord. His females have made serious breeding cows.

**BATHAYOCK GLADIATOR****WESTCARSE JIMMY**

What can we say about Jimmy that hasn't already been said. This bull has been influential for Gretnahouse in recent years. His highlights being 20,000gns Gretnahouse Primate, 20,000gns Gretnahouse Pouncer, 16,000gns Gretnahouse Pimp, 16,000gns Gretnahouse Rosco and many more five figure bulls. Jimmy has left some fantastic breeding females in the herd which can be seen throughout the catalogue.

**WESTCARSE JIMMY**

## SERVICE SIRES

### LOCHEND NIGHTHAWK

Nighthawk has proven himself invaluable at Gretnahouse and has a fantastic temperament. He is very easily calved with a short gestation meaning we have had great success using him on heifers. His calves all possess his quality head, tremendous top and length as well as his bone. Nighthawk's sons to date have sold to a top of 16,000gns into commercial and pedigree herds. Nighthawk has a pedigree packed with some of the best cows in the breed over the last decade including; Balmyre Paradise, Lochend Molly, dam of Apache; Thrunton Inspiration, dam of Socrates and Camelot. On the bull side; Hofmeister, Egbert, Major, Dickler, Archangel, General, Lombardo, Victorious and Nacodar. Semen and royalties have been retained by Gretna House Farms.

**LOCHEND NIGHTHAWK**

### GLENERICHT SUPERB

Superb was bought for 20,000gns at Stirling October 2022, where he was crowned Overall Champion. A very correct bull, with a great top, shape and tons of breed character, we think he was the perfect bull to follow on from Lochend Nighthawk and Westcarse Jimmy. Superb at the time of writing has a handful of calves on the ground, these have been calved easily with great vigour, a very promising start to this young bull's career.

**GLENERICHT SUPERB**

(UK581747501498) MBF0096175

Born 02/04/2023

Myostatin: F94L-1, Q204X-0

**Sire: LOCHEND NIGHTHAWK**

**GREтнаHOUSE HARLEM** is a cow of tremendous size and length by the 11,000gns **Balthayock Adonis**. Her calving record shows her consistency at Gretnahouse with daughters retained in the herd and her sons selling to a top of 7800gns. **Harlem's** breeding goes back to one of the foundation cows, **Westcarse Ovation (ET)**. Unfortunately, **Harlem** is only milking on 3 quarters, despite this she is still a fantastic mother and rears her calves well. She also has one cleat removed on her front right foot, she has been like this for quite a few years and manages well.

**Gretnahouse Urbana** (*calf at foot*) is a very stylish daughter of **Lochend Nighthawk**, full sister to **Gretnahouse Tuscany** a standout heifer in her group.

**Flushed 28/07/22 with WESTCARSE JIMMY (UK542908200278) MBM0064341. Produced 9 Grade A embryos, 7 Embryos are in storage and will be retained by Gretna House Farms.**

**GREтнаHOUSE JANNABEL** is one of the biggest cows on the farm by the easy calving **Blelack Digger**, she goes back to the tremendous foundation cow **Balmyle Paradise**. **Jannabel** bred 16,000gns **Gretnahouse Pimp** who is breeding exceptionally well for **Haughhead** and **Lookaboutye**. Unfortunately, **Jannabel** has been unsuccessful at maintaining a pregnancy post 4 weeks but is healthy and cycles regularly. We think **Jannabel** is a tremendous cow, worthy of being an embryo donor.

**Jannabel will be sold with 1 embryo sired by Westcarse Jimmy.**

**47A GRETNAHOUSE UNIQUE DNA Status: PV**

(UK581747201523) MBM0092761 Born 05/05/2023

Myostatin: F94L-0, Q204X-1

**Sire - LOCHEND NIGHTHAWK (MBM0074638)**

**GRETNAHOUSE NANEL** is a fantastic, moderately framed **Westcarse Jimmy** daughter who rears a strong calf and was able to rear both of her twins in 2022. Her breeding goes back to a foundation female, **Gower Romance (ET)**, some of the breed greats in this family line include **Major**, **Hofmeister**, and **Talisman**. This is a consistently hardworking family that has been getting the job done at Gretnahouse.

**Gretnahouse Unique** (calf at foot) is a bull with great potential, a **Lochend Nighthawk** son out of a **Westcarse Jimmy** Daughter, a cross proving to be very promising. He has great length and end and brings together the best of **Jimmy** and **Nighthawk**.

**Sire - LOCHEND NIGHTHAWK (MBM0074638)**

**GRETNAHOUSE PARIS** is a brilliant daughter of **Westcarse Houdini**, she oozes style, soft flesh and good shape. **Houdini**, the popular AI sire has bred multiple sons who went on to sell for 5 figures. **Paris** is out of **Memphis** who goes back to **Harlem**, a prolific family at Gretnahouse. Paris' first calf **Snowman** sold for 7000gns to the Belan pedigree herd at Carlisle in May 23.

**Gretnahouse Uteille** (*calf at foot*) is another very strong, stylish heifer by **Lochend Nighthawk**, the heifers he is breeding really are special. **Uteille** is full sister to **Gretnahouse Snowman** who sold for 7000gns to the Belan pedigree herd.

**Service Details:** Served by **GRETNAHOUSE THANOS**. Scanned in calf on 22/09/23. Due approx. 25/03/24.

**GRETNAHOUSE SCARLET** is a stylish, deep bodied daughter of **Wesley Equinox** and is looking to turnout like so many of our other fantastic daughters by him. She is a heifer's calf from a line of hard working cows going back to the 'esse' family foundation cow, **Moyness Sagesse**, with bulls selling to 5 figures. **Gretnahouse Thanos** (service sire) is a high performance **Bleblack Fabulous** x **Baywatch (ET)** son.

**GRETNAHOUSE TUSCANY** what a start to the heifers. She has style, length, top and a perfect head like so many of these **Nighthawk** daughters. She carries two copies of the F941 myostatin and is out of **Gretnahouse Harlem** who is by the 11,000gns **Bathayock Adonis**. **Tuscany**'s breeding goes back to foundation cow **Westcarse Ovation (E7)**, a fantastic opportunity to get into some great genetics.

**GRETNAHOUSE TOGARADISE** is a real powerhouse on paper and in the flesh. She has serious end with a tremendous head. **Togaradise** is a chance to add the 'Paradise' family to your herd, a family which has produced the 25,000gns **Ubeauty**, 15,000gns **Ferdinand** and the 10,000gns **Vigorous** to name a few. There are not many heifers that come available like her.

**GRETNAHOUSE TALLAHASSEE** is one of our favourites, just look at the length, bone and style of this **Nighthawk** heifer. Reared as a twin on her dam, **Ontario** is by the easy calving **Wesley Equinox** and out of **Gretnahouse Japan** who is the mother of the recent 20,000gns **Gretnahouse Pouncer**.

**GRETNAHOUSE TENNESSEE** is another great heifer by **Nighthawk**, not to be outdone by her sister **Tallahassee**. Both reared on their dam **Ontario**, this speaks volumes of the sort of cows these heifers will make. **Ontario** is by the easy calving **Wesley Equinox** and out of **Gretnahouse Japan** who is the mother of the recent 20,000gns **Gretnahouse Pouncer**.

**GRETNAHOUSE TOOTSIE** has tremendous depth and style and is the only daughter of **Gretnahouse Lookout**, a ginormous **Balthayock Gladiator** daughter with sons selling to £6500. By **Wesley Equinox**, **Tootsie** was a standout heifer in her age group with weight for age, recording the highest weaning weight. We were excited to see what she can do; this heifer is sure to perform.

**1200 straws of semen retained. The semen royalty rights for current and future registrations by use of semen (irrespective of whether taken by the current or future owners) will be retained by the vendor. Purchaser of the bull will be exempt from Semen Royalty charges.**

**LOCHEND NIGHTHAWK**, with just shy of 100 calves born to date, has proven himself invaluable at Gretnahouse and has a fantastic temperament. This bull is getting better and better with age as do each crop of calves, he is very easily calved with a short gestation allowing us to use him on heifers proving to be very successful. His first daughters now have calves on the ground and are as equally impressive as him, his females have tremendous heads, good bone and conformation as well as a square frame. The offering of **Nighthawk** daughters in the sale will make tremendous cows that would be an asset at any herd. His sons to date have sold to a top of 16,000gns into commercial and pedigree herds. **Nighthawk** has a pedigree packed with some of the best cows in the breed over the last decade including; **Balmyle Paradise**, **Lochend Molly**, dam of **Apache**; **Thrunton Inspiration**, dam of **Socrates** and **Camelot**. On the bull side; **Hofmeister**, **Egbert**, **Major**, **Dickler**, **Archangel**, **General**, **Lombardo**, **Victorious** and **Nacodar**.

**LOCHEND NIGHTHAWK**  
Lot 107

## REMAINING COWS

The welfare of our cows is extremely important to us, so the following cows are not travelling to the market due to either being heavily in calf or are due the week of the sale. They will be entered to the February Stirling 2024 bull sales if not sold privately after the sale. If you would like to arrange viewing of these animals, please get in touch after the Dispersal.

### Gretnahouse Sirene

**Sirene** is a typical heifer by **Westcarse Jimmy** who himself has bred sons to 20,000gns, her Dam **Irene** is a consistent breeder of quality females who feature heavily in the herd. **Sirene** is full sister to **Gretnahouse Pinceton** who sold for £8000 at 12 months old to a pedigree herd. **Sirene** is in calf to **Lochend Nighthawk**, due to calve the week of the sale.

### Gretnahouse Sheauty (ET)

**Sheauty (ET)** is the only daughter by **Lochend Apache** we have had from this line. **Sheauty (ET)** is out of **Gretnahouse Beauty (ET)** a cow that needs very little introduction, known for being the mother of 15,000gns **Gretnahouse Heman**, this line goes back to the famous Paradise family. **Sheauty (ET)** is in calf to **Glenericht Mecca**, due to calve the week of the sale.

### Gretnahouse Orangina

**Orangina** is a great breeder of females, rearing twins **Sangria** and **Sprite** in 2021, **Sangria** was retained and can be seen in the catalogue. **Sprite** was bought by the Starlight herd and has been shown successfully picking up multiple interbreed titles. Her 2022 calf **Tequila** is showing real potential and is the pick of her age group. **Orangina** is from the Gretnahouse 'drink' family going back to foundation female **Gower Sherry**, bulls from this line have sold to 5 figures. **Orangina** is in calf to **Lochend Nighthawk**, due just after the sale.

### Gretnahouse Rio

**Rio** is by the great **Westcarse Jimmy**, whose sons have sold to a top of 20,000gns. Her dam **Memphis** is a tremendous breeder with all daughters retained, **Memphis** is another great daughter out of **Gretnahouse Harlem** who's breeding goes back to a foundation female, **Westcarse Ovation (ET)**. **Rio** is full sister to 7000gns **Gretnahouse Smasher**. **Rio** is in calf to **Lochend Nighthawk**, due the week before the sale.

## CHAROLAIS

### EXPLANATORY NOTES FOR CATALOGUES

Only British Charolais BREEDPLAN EBVs can be validly compared between Charolais herds.

#### ESTIMATED BREEDING VALUES (EBVs)

The EBV is the best estimate of an animal's genetic merit for that trait.

#### ACCURACY

An accuracy value (Acc) is presented with every EBV and gives an indication of the amount of information that has been used in the calculation of that EBV. The higher the accuracy the lower the likelihood of change in the animal's EBV as more information is analysed for that animal or its relatives.

#### CALVING EASE

Calving Ease EBVs are based on calving difficulty scores, birth weights and gestation length information. More positive EBVs are favourable and indicate easier calving.

**DIR:** Direct calving ease indicates how this animal influences the birth of its progeny. Using a bull in the Top 1% for CE direct (+16.7) is predicted to result in approximately 15% fewer assisted calvings in 2 year old heifers compared with using a bull in the Bottom 1% (-14.7). This range is predicted to be smaller in cows. **Remember that the dam's genetics and management are significant factors influencing calving ease in any mating.**

**DTRS:** Daughter's calving ease indicates how well the animal produces daughters that have easier calving.

#### BIRTH AND FERTILITY

**GL:** Gestation Length EBV (days) is based on AI records. Lower (negative) GL EBVs indicate shorter gestation lengths which generally relate to easier calving and increased growth after birth.

**BWT:** Birth Weight EBV (kg) is based on the measured birth weight of animals, adjusted for dam age. The lower the value the lighter the calf at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers.

**SS:** Scrotal Size EBV (cm) is an indicator of male fertility in regards to semen quality and quantity. Higher (positive) EBVs indicate higher fertility. There is also a small negative correlation with age of puberty in female progeny.

#### GROWTH

**MILK:** 200-Day Milk EBV (kg) is an estimate of an animal's milking ability. For sires, this EBV is indicative of their daughter's milking ability as it affects the 200-day weight of their calves.

**200:** 200-Day Growth EBV (kg) is calculated from the weight of animals taken between 80 and 300 days of age. Values are adjusted to 200 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for growth to early ages.

**400:** 400-Day Weight EBV (kg) is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for yearling weight.

**600:** 600-Day Weight EBV (kg) is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

**MWT:** Mature Cow Weight EBV (kg) is an estimate of the genetic difference in cow weight at 5 years of age. Moderate or larger EBVs are generally more favourable.

## **CARCASE**

**EMA:** Eye Muscle Area EBV (cm<sup>2</sup>) estimates genetic differences in eye muscle area of a 300kg dressed carcass. More positive EBVs indicate better muscling on animals.

**FAT:** Rib Fat EBV (mm) estimates the genetic differences in fat depth at the rib in a 300kg dressed carcass. More positive EBVs indicate more subcutaneous fat and earlier maturity.

**RBV%:** Retail Beef Yield Percent EBV (%) represents total (boned out) meat yield as a percentage of a 300kg dressed carcass. A more positive EBV indicates higher percentage yield for the 300kg carcass size.

**IMF%:** Intra-muscular Fat Percent EBV (%) is an estimate of the genetic difference in the percentage of intra-muscular fat at the 12/13<sup>th</sup> rib site in a 300kg carcass. Depending on market targets, larger more positive values are generally more favourable.

### **Terminal Index**

The BCCS Terminal index is aimed at a commercial herd using Charolais bulls over large framed, mixed breed cows to breed steers and heifers to finish at 18 months of age. All progeny are destined for slaughter and no replacement females are selected from within the herd. There is some emphasis on calving ease while finishing steers at around 680 kg live weight (375 kg carcass weight) using a pasture based production system supplemented with extra rations during the finishing phase.

Use this index in a commercial herd to produce progeny for slaughter. The index has moderate emphasis on easier calving (ie getting a live calf with minimal human interference) while producing calves that will then grow quickly to market specifications at around 18 months of age. The index is focused on slaughter animals and does not account for maternal traits and is therefore not suited to breeding replacement females.

If you are using smaller framed cows or heifers in your herd, then you should also put extra emphasis on a higher calving ease direct EBV when selecting a sire using this index.

### **Self Replacing Index**

The BCCS Self Replacing index is aimed at a Charolais herd breeding steers to finish at 16 months of age. Replacement females are selected from within the herd. There is some emphasis on calving ease and maternal traits while finishing steers for slaughter at around 680 kg live weight (375 kg carcass weight) using a pasture based production system.

This Self Replacing index is also suitable to using Charolais sires over mixed breed cows where replacement females are sourced from within the herd. There may be some hybrid vigour expressed in the progeny depending on the breed type of the cows used. Therefore you should consider placing extra emphasis on the Calving Ease EBVs (more positive) of the sire to allow for possible heavier birth weights of his calves due to hybrid vigour.

Use this index in both commercial and pedigree herds where you are balancing the requirements of selecting replacement females while also producing animals for slaughter.

**Charolais EBV ratios have been incorporated with the Estimated Breeding Values (EBV) to assist breeders in making their selection decisions when purchasing Charolais cattle. The Charolais EBV ratio for each trait shows that animal's breeding value for that trait in relation to the current published breed average. The average for each trait is 100, and the approximate range between the bottom 1% and the top 1% is between 70 and 130.**

The British Charolais BREEDPLAN Estimated Breeding Values contained in this Sale Catalogue were compiled by the Agricultural Business Research Institute (ABRI) from data supplied by the breeders. Neither the British Charolais Cattle Society nor the ABRI oversee or audit the collection of this data.

October 2023 BRITISH CHAROLAIS BREEDPLAN - Percentile Bands for all 2021 born animals

Use this table as a guide to compare individual animals with the current genetic level of the breed

## British Charolais Myostatin Guide

### What is Myostatin?

Myostatin is a gene that influences the production of proteins which control muscle development. When an animal is identified as having one of the mutations it means that they have inactive genes which do not control muscle growth as effectively, this can result in increased muscle mass. Currently in cattle, there are 19 known mutations of the gene and after extensive testing for the nine most common variants, we have concluded that the British Charolais cattle population only contains two - F94L & Q204X.

### Why are we testing for Myostatin?

Knowing the myostatin status of your animals will help you to select bulls with the most appropriate myostatin traits for your breeding programme. This will lead to better calving ease and help with the ever-present trend to improve carcase conformation and quality. However, it is just one tool which should be used in conjunction with the wider information available such as Estimated Breeding Values (EBV's) – which predict the performance of the animal based on its back pedigree, accurate measurements and the performance of its herd mates – and your own judgement on type and pedigree.

### How are these genes inherited?

All reproducing species have two copies of each gene – called alleles. If your Charolais has one copy of the myostatin variant (one allele) it is classed as **heterozygous**, if it has two copies (two allele) it is classed as **homozygous**.

**The table to below shows the chances of inheriting depending on the status of the parents:**

2 Homozygous Parents	→	100% chance of Homozygous offspring
1 Homozygous Parent 1 Heterozygous Parent	→	50% chance of Homozygous offspring 50% chance of Heterozygous offspring
1 Homozygous Parent 1 Non-carrier Parent	→	100% chance of Heterozygous offspring
2 Heterozygous Parents	→	25% chance of Homozygous offspring 50% chance of Heterozygous offspring 25% chance of non-carrying offspring
1 Heterozygous Parent 1 Non-carrier Parent	→	50% chance of Heterozygous offspring 50% chance of non-carrying offspring
2 Non-carrier Parents	→	100% chance of non-carrying offspring

**Below is a quick guide to the traits that are likely to be evident in homozygous and heterozygous calves born compared to calves with no myostatin:**

	Increased Beef Yield %	Increased High Value Meat Area	Reduced Carcase Fat	Reduced Subcutaneous Fat Depth	Reduced Intramuscular Fat Depth	Increased Meat Tenderness	Increased Muscle Mass	Reduced Fertility in Females	Reduced Calf Viability	Reduced Calving Ease	Increased Birth Weight	Reduced Stress Tolerance
1 x F94L (Heterozygous)	■	■	■	■	■	■	■	□	□	□	□	□
2 x F94L (Homozygous)	■	■	■	■	■	■	■	□	□	□	□	□
1 x Q204X (Heterozygous)	■	■	■	■	■	■	■	□	□	□	■	□
2 x Q204X (Homozygous)	■	■	■	■	■	■	■	■	■	■	■	■
Key	<div> <div>Less</div> <div> <div>□</div> <div>■</div> <div>■</div> <div>■</div> </div> <div>More</div> </div>											

**Do you know what genes your cows are carrying?  
Don't forget that the bull is only half the story.**

## ABERDEEN ANGUS

### UNDERSTANDING THE BREEDPLAN PERFORMANCE RECORDING INFORMATION IN THIS CATALOGUE

Only Aberdeen-Angus GROUP BREEDPLAN EBVs or INTERIM EBVs with Accuracy (Acc) can be validly compared between herds.

#### ESTIMATED BREEDING VALUES (EBVs)

The EBV is the best estimate of an animal's genetic merit for that trait.

#### ACCURACY

An accuracy value (Acc) is presented with every EBV and gives an indication of the amount of information that has been used in the calculation of that EBV. The higher the accuracy the lower the likelihood of change in the animal's EBV as more information is analysed for that animal or its relatives.

#### CALVING EASE

Calving Ease EBVs are based on calving difficulty scores, birth weights and gestation length information. More positive EBVs are favourable and indicate easier calving.

**DIR:** Direct calving ease indicates how this animal influences the birth of its progeny. Using a bull in the Top 1% for CE direct (+7.0) is predicted to result in approximately 15% fewer assisted calvings in 2 year old heifers compared with using a bull in the Bottom 1% (-10.2). This range is predicted to be smaller in cows.

**Remember that the dam's genetics and management are significant factors influencing calving ease in any mating.**

**DTRS:** Daughter's calving ease indicates how well the animal produces daughters that have easier calving.

#### BIRTH AND FERTILITY

**GL:** Gestation Length EBV (days) is based on AI records. Lower (negative) GL EBVs indicate shorter gestation lengths which generally relate to easier calving and increased growth after birth.

**BWT:** Birth Weight EBV (kg) is based on the measured birth weight of animals, adjusted for dam age. The lower the value the lighter the calf at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers.

**SS:** Scrotal Size EBV (cm) is an indicator of male fertility in regards to semen quality and quantity. Higher (positive) EBVs indicate higher fertility. There is also a small negative correlation with age of puberty in female progeny.

#### GROWTH

**MILK:** 200-Day Milk EBV (kg) is an estimate of an animal's milking ability. For sires, this EBV is indicative of their daughter's milking ability as it affects the 200-day weight of their calves.

**200:** 200-Day Growth EBV (kg) is calculated from the weight of animals taken between 80 and 300 days of age. Values are adjusted to 200 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for growth to early ages.

**400:** 400-Day Weight EBV (kg) is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for yearling weight.

**600:** 600-Day Weight EBV (kg) is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

**MWT:** Mature Cow Weight EBV (kg) is an estimate of the genetic difference in cow weight at 5 years of age. Smaller, or more moderate EBVs are generally more favourable.

## **CARCASE**

**CWT:** Carcase Weight EBV (kg) estimates the genetic difference in carcase weight at a standard age of 650 days.

**EMA:** Eye Muscle Area EBV (cm<sup>2</sup>) estimates genetic differences in eye muscle area of a 300kg dressed carcase. More positive EBVs indicate better muscling on animals.

**FAT:** Rib Fat EBV (mm) estimates the genetic differences in fat depth at the rib in a 300kg dressed carcase. More positive EBVs indicate more subcutaneous fat and earlier maturity.

**RBV%:** Retail Beef Yield Percent EBV (%) represents total (boned out) meat yield as a percentage of a 300kg dressed carcase. A more positive EBV indicates higher percentage yield for the 300kg carcase size.

**IMF%:** Intra-muscular Fat Percent EBV (%) is an estimate of the genetic difference in the percentage of intra-muscular fat at the 12/13<sup>th</sup> rib site in a 300kg carcase. Depending on market targets, larger more positive values are generally more favourable.

**Indexes** combine the EBVs with economic information for specific market and production systems to rank animals based on relative profit values.

## **Terminal index**

The Angus Terminal index is aimed at a commercial herd using Angus bulls over dairy cross cows to breed steers and heifers to turn off at 16 months of age. All progeny are destined for slaughter and no replacement females are selected from within the herd. There is some emphasis on calving ease while finishing steers at around 600 kg live weight (330 kg carcase weight) using a pasture based production system.

Use this index in a commercial herd to produce progeny for slaughter. The index has moderate emphasis on easier calving (ie getting a live calf with minimal human interference) while producing calves that will then grow quickly to market specifications at around 16 months of age. The index is focused on slaughter animals and does not account for maternal traits and is therefore not suited to breeding replacement females.

If you are using smaller framed cows or heifers in your herd, then you should also put extra emphasis on a higher Calving Ease Direct EBV when selecting a sire using this index.

## **Self Replacing index**

The Angus Self Replacing index is aimed at an Angus herd selecting replacement females from within the herd while breeding steers and excess heifers to turn off at 18 months of age. There is emphasis on calving ease and maternal traits while also looking to finish steers for slaughter at around 615 kg live weight (330 kg carcase weight) using a pasture based production system supplemented with extra rations during the finishing phase.

This Self Replacing index is also suitable to using Angus sires over mixed breed cows where replacement females are sourced from within the herd. There may be some hybrid vigour expressed in the progeny depending on the breed type of the cows used. Therefore you should consider placing extra emphasis on the Calving Ease EBVs (more positive) of the sire to allow for possible heavier birth weights of his calves due to hybrid vigour.

Use this index in both commercial and pedigree herds where you are balancing the requirements of selecting replacement females while also producing animals for slaughter.

The Aberdeen-Angus GROUP BREEDPLAN Estimated Breeding Values contained in this Sale Catalogue were compiled by the Agricultural Business Research Institute (ABRI) from data supplied by the breeders. Neither the Aberdeen-Angus Cattle Society nor the ABRI oversee or audit the collection of this data.

All bulls entered at official Society sales have their Myostatin status displayed in the catalogue.  
The Myostatin nt821 gene is responsible for double muscling.

**Myostatin Status No Carrier**, means the bull does not carry the Myostatin nt821 gene.

**Myostatin Status Single Version Carrier** means the bull carries a single version of the Myostatin nt821 gene, but still accepted for registration by the Aberdeen-Angus Cattle Society

**MartEye™**

## QR CODES

In this catalogue we have printed QR code for each animal, this will take you to the web page which will give you full information on pedigree, bar charts and photographs if available

### Step 1

Download and install a QR code app on your smartphone if you don't yet have one. Open your App Store, Market, Marketplace or App World application (for the iPhone, Android, Windows Mobile and BlackBerry platforms, respectively).

### Step 2

Search for "QR code reader," and then download and install a free app. The app should be named something to the effect of "QR Code Scanner" or "QR Scanner." There are paid versions of these kinds of apps, but the free ones work just as well.

### Step 3

Open the QR barcode app on your smartphone, and choose "scan from camera" or "scan QR code" from the main menu. A new window should open with a square in the middle of it.

### Step 4

Center the QR code in the middle of the square that's currently displayed by your QR barcode app. The app should automatically take a picture of the QR code for you when it has finished scanning the code. A new pop-up menu will appear, with the QR code information on it.

### Step 5

Click the link that was embedded in the QR code, this will direct you to the Society website.

**HEALTH AND SAFETY RULES  
HARRISON & HETHERINGTON LIMITED  
NOTICE TO ALL VISITORS AND TRADERS  
PLEASE READ AND OBSERVE  
THE FOLLOWING**

All visitors and traders on site will be responsible for ensuring that they and their employees or sub-contractors engaged by them comply with all legal requirements, including the Health and Safety At Work etc., Act 1974, The Management of Health and Safety At Work Regulations, The Provision And Use of Work Equipment Regulations, etc.

All visitors and traders will be responsible for ensuring that their operations in no way affect the integrity of the company or its fire, safety or security arrangements and in no way compromise the health and safety and welfare of other visitors to and or employees of Harrison & Hetherington.

Although it is the visitors and traders responsibility to ensure that plant, equipment and systems in work are safe, Harrison & Hetherington Limited reserve the right to ask any visitor or trader to leave the market for any breaches in the Health and Safety Rules and/or Regulations.

Vendors must inform Harrison & Hetherington Limited of any livestock due to attend the market whose temperament, behaviour or condition may call for additional precautions for its safe handling.

When loading or unloading livestock handlers must ensure that the dock and vehicle gates are securely fixed so as to prevent the escape of animals.

Traders are responsible for providing and maintaining suitable livestock handling equipment. They should ensure that livestock handlers are fit, experienced in livestock handling and familiar with the livestock in their charge.

Children must not be permitted in any area where they may be at risk from livestock or machinery.

In the case of bulls, during the period when the show/sale is open to visitors, bulls in stalls or pens should not be left unattended. If the handler is temporarily absent, arrangements should be made with another vendor, steward or member of Harrison & Hetherington staff to oversee the bull until the handler returns.

Handling of Livestock at shows and sales: Harrison & Hetherington Limited recommend that an adult person should accompany any junior person during the showing/sale of livestock in the ring and reserves the right to intervene at any point if, in the company's opinion, the person showing the livestock is at risk in undertaking that activity.

Passageways must be kept clear at all times during the auction sale. **PLEASE DO NOT STAND IN THE SALE RING ENTRANCE AND EXIT PASSAGES.**

The auction ring man escapes and refuges must be kept clear at all times.

All portable electrical equipment supplied and/or used by visitors and traders must be safe and fit for the purpose and should have a valid portable appliance test certificate.

**AUCTIONEER'S TERMS & CONDITIONS OF SALE**

(Incorporating the Auctioneer's  
Terms and Conditions )

1. The biddings to be regulated by the Auctioneers and the highest bidder, subject to the Vendor's reserve (if any), to be the purchaser. No bid shall be retracted and if any dispute should arise between two or more bidders, the Lot in dispute to be put up again and resold, or the Auctioneers may determine the dispute at their own discretion and their decision shall be final. The Auctioneers reserve the right to refuse the bid of any person without being called upon to give reason for such action.
2. The Purchaser to give his full name and dwelling place and pay for all Lots purchased immediately at the close of sale. No Lot or Lots shall be removed from the sale premises until paid for and a pass-out slip obtained from the Auctioneer's clerk but each and every Lot shall immediately at the fall of the hammer be considered as delivered and be and remain in every respect at the absolute risk and expense of the respective purchaser or purchasers thereof and shall be removed from the sale premises at the purchaser's expense. The right of property shall not pass until the full purchase price is paid.
3. Purchasers paying by cheque must be prepared, if required, to produce a banker's reference. As a result of the Money Laundering Regulations (2003) the auctioneers are unable to accept cash payments in excess of nine thousand pounds sterling for any single or linked purchase transaction.
4. All statements in the catalogue, or made by the Auctioneers at the time of sale, also the correct identification of the animals, are the entire responsibility of the Vendors. The Auctioneers take no personal responsibility for the correctness of such statements or identities.
5. All statements in the catalogue, or any made by the Auctioneers at the time of sale relating to any veterinary or other tests are to be taken as statements of fact only. No such statements shall guarantee the purchaser of any animal against loss arising from the subsequent reaction of such animal to any test administered after the sale and the Vendors shall not be liable in any way should this occur.
6. All stock is sold subject to the Conditions of Sale recommended for use at markets by the Livestock Auctioneers' Markets Committee for England and Wales except in so far as these conflict with any Special Conditions applicable to the sale of pedigree stock, when the latter Conditions shall prevail.
7. Neither the Vendors nor the Auctioneers will be responsible for any accident or injury to persons or property, through fire or any other cause whatsoever, nor for any damage by animals prior to, during or after the sale.
8. No undertaking by the Auctioneers or their servants to take charge of any Lot or Lots after the sale or to forward them to their destination shall be held to impose upon the Auctioneers any legal obligation or vitiate any of these Conditions.
9. Inasmuch as the Auctioneers act as agents for a disclosed principal they shall not be considered personally responsible for any default on the part of either purchasers or Vendors and the remedy shall be against them only and not against the Auctioneers.
10. If these conditions are unfulfilled, the Vendors or Auctioneers shall have the power to resell the Lots, retaining any surplus and charging any deficiency and expense to the defaulter.
11. You have a right to know how we will use the information you have provided to us. We may share the information with other members of our group and may make this information available to relevant media groups and other interested parties on request. We and other members of the group may contact you by telephone, e-mail, post or fax to inform you of products or services available. If you do not want to be contacted for marketing purposes or do not wish your information to be made available to any other parties please notify us in writing.
