General Information & Sale Notes

LOCATION: The Sale will be held online via MartEye with a viewing day on farm at Netherton Farm, Blackford, Perthshire, PH14 1QU on Saturday 18th October 2025.

CONDITIONS OF SALE: All animals are sold under The Aberdeen Angus Cattle Society auction rules and conditions of sale drawn up by the N.B.A. These entries will be sold subject to these rules along with the Auctioneers' General Conditions of Sale, both available on request. In the event of any discrepancy between the two sets of conditions, the N.B.A. conditions of sale shall prevail.

METHOD OF SALE: All cattle will be sold in guineas (105 pence) and strictly in catalogue order.

COMMISSIONS: The Auctioneers will dutifully execute commissions to purchase for buyers unable to attend the sale personally, upon receipt of written instructions.

BIDDING FACILITY will be available for this sale via Marteye. Please register 48 hours prior to sale closing.

REGISTRATIONS: All pedigree stock in the Sale are registered with the Aberdeen Angus Cattle Society (Tel. 01738 622477).

PEDIGREE TRANSFERS: Pedigree transfers will automatically be transferred free of charge to all AACs members.

SETTLEMENT AND CLEARANCE OF STOCK: Settlement in full is due immediately at the close of Sale. No animal may leave the Sale Premises without an official 'Pass Slip', obtainable only from the Auctioneers upon settlement.

NBA WARRANTIES: This Sale is also held subject to the Special Terms and Conditions of Sale recommended for Sales of Pedigree Beef Cattle by the National Beed Association. The preparation of these Terms and Conditions has proved a lengthy and costly process and, in order to defray the legal and other costs involved, and to provide a continuing source of revenue to assist the Association in its vital work for Pedigree Cattle Breeders, the Council of the Association has decided that a special levy, amounting to £3 per male and £2 per female head/lot sold (plus VAT) shall be charged to each Purchaser.

FOREWARD

After the success of last year's female sale where we had the breeds top price female of 2024 and buyers from 8 countries, we are delighted to offer a super group of young females for our 5th production sale on the 18th October. We are going to change the format this year after our hugely successful 1st online bull sale in February where we had breed record prices and averages and positive feedback from our customers.

So, this year our female sale will be online only and run from 3pm Thursday 16th October and close 3pm Saturday 18th October. The auction will run on a racehorse style close; this is when the entire sale stays open in extended bidding. This type of sale allows you as the bidder to change to a different lot within the sale, irrespective of where it is in the catalogue. The sale closes following a period of one minute of no further bids after the closing time of 3pm.

We are delighted that Harrison & Hetherington will conduct the sale again this year, with online bidding available through Marteye.

It's a great time to be a beef farmer with high prices in every aspect of the industry and with a shortage of beef worldwide the future looks bright.

With ever increasing costs in farming, we need functional females who are first and foremost structurally correct and fertile, while still having breed character on a moderate balanced frame that can do the work for you and can thrive on a low input system. We feel this group of females offers you some of the best not only in our herd but the breed.

Again, they will be brought out on grass only and have been out wintered, the heifers will only have seen 1kg of grain from 7-11 months of age.

Each year we see significant progress in lowering the amount of input our cattle need, this has allowed us to cut down concentrate costs on our bulls and now cutting out creep in calves while not sacrificing weight and quality. This can only be done by sourcing the top genetics from around the world, for the traits that made the breed famous and we feel these cattle have this in abundance, ease of calving and fleshing, ability to turn poor forage into beef and of course high marbling.

We are really pleased with the feedback from customers regarding how the females have performed in their new herds from the first three sales, with the past 2 years Miss Europe coming from our Sale females in the Angus Breeders World Show and we feel the females in this year's sale can take you in any direction you wish go.

Demand is growing for a more moderate framed, deeper fleshed animal, it's the way the industry needs to go in the future to have a functional, profitable cow herd, so why wait when you can buy the future today.

A warm welcome awaits you if you wish to attend on Saturday 18th October to view the cattle prior to the sale concluding with food and refreshments available.

Visitors are always welcome and please feel free to contact us with any questions you may have.

HERD HEALTH

- TB – 4 YEAR TESTING LAST TEST JANUARY 2022
- BVD – ACCREDITED, ANIMALS BORN BEFORE 1/1/2020 HAVE BEEN VACCINATED PLUS BOUGHT IN ONES

MartEye™

The image shows a hand holding a smartphone displaying the MartEye app interface. The app shows the Harrison and Hetherington logo and a list of auctions, including 'C District Swaledale Ram Sales Day 1: Aged Rams & Ram Lambs (View Only)'. Below the phone, there are two auction cards: 'HW Angus Sale' and 'Jallex Select'. The background is a dark blue gradient with an orange and white diagonal stripe at the bottom left.

AUCTIONEER FOREWARD

Harrison & Hetherington are once again delighted to provide HW Angus with the highly successful MartEye Online Timed Sale Platform to market an outstanding group of Aberdeen Angus Females in the 5th HW Angus Production Sale.

With genetics oozing with the traits that will ensure that your herd is fit to face the future, the catalogue is full of structurally correct, fertile females that consistently produce the goods with minimal intervention and at low cost, together with a number of hand-picked embryo lots containing exciting and unique breeding combinations.

Any breeder looking to produce a moderate framed, functional cow should be sure and take a run to Netherton Farm and see the cattle in the flesh, they won't disappoint.

We will be at Netherton on Saturday the 18th of October to welcome buyers and assist with the online buying process, however if we can help with any queries running up to the date, please do not hesitate to contact us.

Service Sires

Sire Reference:

HW MR EQUILIBRIUM W202

gs: Te Mania Berkley B1 (AI) (IMP)

Sire: Te Mania Emperor E343 (AI) (IMP)

gd: Te Mania Lowan Z74

gs: SAV Providence 6922

Dam: Netherton Miss Effie M726

gd: Ankony Miss Effie 8433 (ET) (IMP)

A great chance here to get some calves of this exciting young sire whose first calves are born easy and grow quick with good muscle expression. Sired by one of Australia's highest ever performance sires and still appears in the pedigree many of the highest selling Angus still in Australia, His daughters at HW are some of our hardest working females we have and produce the goods every year that's why we are so excited about this young sire. Add in Netherton Miss Effie M726 one of our most consistent breeding donors ever bred at Netherton producing top sons sired by several sires to average over £5000 and daughters that are easy fleshed and maternal, she is sired by SAV Providence 6922 and out of Ankony Miss Eiffie 8433 both exceptional cattle and admired by cattlemen from all around the world. Progeny have been topping our scan data for both EMA and IMF the past few years, his daughters now in production are making super cows with great udders and his sons in our 1st Bull Sale were the highest averaging sire group.

HW MR EQUILIBRIUM W202

Herd Sire

Sire Reference:

RAWBURN BANNOCKBURN T628

gs: MCC Daybreak

Sire: Quaker Hill Rampage 0A36 (SS) (IMP)

gd: QHF Blackcap 6E2 OF4V16 4355

gs: Nichols Steadfast T139

Dam: S A V Elba 1407 (ET) (IMP)

gd: Nichols Bonnie P55

Bannockburn is designed for maximum feed efficiency without compromising on growth and breed character he really has suited our females with his first sons selling easily due to their performance, easy calving and phenotype, his first daughters have calved now and are just outstanding with perfect udders, milk and easy fleshing ability. His dam Nichols Bonnie has shattered every record in the Nichols herd for Residual Average Daily Gain (feed efficacy and growth). His sire Quaker Hill Rampage is one of the most dominant sires ever in the US, A bull renowned for growth, structural soundness and fertility. Bannockburn will give you calves that will be born easy, grow quick with an unrivalled ability to turn grass or feeding into red meat. His figures are some of the best in the breed.

RAWBURN BANNOCKBURN T628

Herd Sire

Sire Reference:

HW EVANDER S051

gs: S A V Heritage 6295 (SS) (IMP)

Sire: S A V Harvester 0338 (SS)(IMP)

gd: S A V Emblynette 7749

gs: Rito 707 of Ideal 3407 7075

Dam: S A V Elba 1407 (ET) (IMP)

gd: S A V Elba 1094

Evander is a result of an embryo from SAV Angus in America likely the most influential Angus herd in the world at present. He has proven himself to be a producer of high performance, maternal and functional cattle his daughters in the sale are fertile, easy fleshing with perfect udders. Progeny from Evander can be found in many countries and his sons are the first sire group to sell each year. His sire SAV Harvester sold for \$285,000 and carries two of the most sought after sires on the bottom side of his pedigree for producing great females Rito 707 of Ideal and SAF Bando 5175. Worldwide semen available from HW ANGUS and GHYLL BECK GENETICS

HW EVANDER S051

Herd Sire

Sire Reference:

HW AUGUSTUS X462

gs: G A R Grid Maker (SS) (IMP)

Sire: TC Grid Topper 355 (SS) (IMP)

gd: TC Pride 8067

gs: TC Freedom 104 (SS) (IMP)

Dam: Southland Awestruck 117R (ET) (IMP)

gd: SCA 56F of Ideal 7258 (ET) (IMP)

From maybe one of the breeds top performance families who don't compromise on calving ease and birth weight in the chase for figures. Augustus is full brother to all our original Annie's and Netherton Archie who did so well not only for us and other breeders that 9 years after flushing Southland Awestruck one of the top TC Freedom daughters we've ever seen that we tracked her down in Texas to flush again to the original mating. His first calves from our 2 year olds are catching visitor's eyes for their character and fleshing ability.

HW AUGUSTUS X462

Herd Sire

Sire Reference:

HW FABULOUS R565

A sire who's sons in Ai studs HW Farghal and HW Lord Horatio are doing a great job. Kracker a son of our National Cow Champion in 2014 and sired by the cow maker SAV Brave. His maternal sister sold for 8000gns to Rawburn at last year's sale and in this year's sale you can see the strength of the Karama family in depth. We highly recommend his daughters in the sale for fleshing ability, good growth and milk.

HW FABULOUS R565

Herd Sire

Sire Reference:

HW RED LOUISIANNA X270

A real meat machine of a bull with lovely soft flesh and thickness, this easy calving sire is an outcross sire for everyone in the UK, sired by the multi winning Lazy MC Tradition and out of a Red Ter-Ron Parker. Sons have averaged over £5000.

HW RED LOUISIANNA X270

Herd Sire

Sire Reference:

HW BLACKBUDDY Y722

We just love to see Te Mania Emperor and SAV Harvester in the pedigree of our females as these are the cows that work for us. So when we got this son by the high performance bull Quaker Hill Dead Centre it was a non brainer not to keep this son. Blackbuddy has good growth and length and is out of a super donor female who was Galawater Angus's pick of the herd, Grand dam was sold to Bryon O'Halloran and was an embryo brought in from the famous SAV Herd in America. His calves are born easy and have explosive growth and great muscle expression they are the stand out calves of 2025

HW BLACKBUDDY Y722

Sire Reference:

NETHERTON FAMOUS Z019

One of the top sons of HW Abacus out of a cow line that produce the goods his great grand dam Netherton Frances P832 is in the pedigree of a lot of the best females we have. Like his sire Famous will be an easy calving sire that will leave plenty of growth and daughters you will want to keep. This is backed up with his figures with all calving, growth, milk and indexes in the top 10% of the breed.

World wide semen for sale which can be purchased through UK Sires

Our last Kracker daughter we have in the herd and what a cow she is from our SAV lines, she typifies everything we have come to expect from this family, moderate framed, deep bodied and full of thickness. Her dam was sold to Ireland and her maternal sister to Galawater Angus who also is the dam of HW Blackbuddy whose first calves at HW are just outstanding. One daughter retained, sons have been among our high sellers with her calf this year maybe the best to date. This is a female not to miss you all know what influence Kracker had in moving our herd to where it is today and add in these SAV greats like Net Worth, Harvester, Bismark and Brave then you have something really special here.

I know I will sound like a broken record but this is the type of cow that works for us and this sale really shows where we are at, moderate framed, depth, thickness with a super udder and still correct on feet and legs that know how to work, 5 year old and 4 calves these are the cows that pay the bills. This family traces back to Ranui in New Zealand and have had a huge impact in our herd from high sellers to show winners for Netherton and producing sires like Ranui W Impact and Netherton Royal Sovereign. Dam sold to Palmallet Angus and a much admired son sold to G Dunbar in this year's bull sale.

A big deep sided Evander daughter here that traces back to one of Canada's Elite Performance Cows Big Sky Beauty 009 who produced many Herd Sires in the breed. Dam sold to Banbury Angus and a maternal brother to Aln Angus for 7500gns. W179 has bred well with a high selling son to Quanterness Angus and a daughter was our second highest selling heifer in last year's sale when she sold for 5200gns to Latvia.

It's never easy selling these top cows but it's our policy to sell them at 5-6 years of age. This one we might regret what a cow from performance to pedigree and a phenotype that we love, just a tank of a cow with her deep body but still retaining feminine look that we like. These Bannockburn daughters have had such an impact for us breeding many of our top cattle over the last few years. Dam was our lead of female of 2023 and was a daughter of our 2021 high selling female who sold for 9500gns to Glasnant Angus, a maternal brother sold to Fursdon Angus. W196 has proved to be an exceptional breeder her first daughter topped our 2023 sale at 13,000gns to Barningham Angus and went on to be voted Miss Europe 2023 in Angus Breeders World Show, her only son was our second highest selling private sale bull of his crop and we have retained her last daughter. It was no wonder W196 became a Donor for us producing very well and embryos can be found in several countries.

W201 just oozes femininity, she may well be moderate framed but she is a big breeder her 2 daughters retained will likely be the best of their years and her son was the highest selling bull of his crop. From a family that traces back to Coldstream in Canada and did so well at Bleack then add in the Netherton Fleur line that includes a 25,000 Winter National Cow Champion, a Royal Highland Champion and the first cow in the breed to sell for over 20,000 then this is a special cow here. Another top Donor for us who flushed well for us and again embryos sold to several countries. 10 embryos retained

A typical Fabulous daughter big, long and full of flesh, this 2020 crop of females have always been admired as a group and they never disappointed us from there super calving records to producing the top ones each year. W211 is no exception to this but when your'e from the Annie family we wouldn't expect anything different, with one daughter retained and her sons selling well for us. Grand-dam sold to Spain and was a full sister to Netherton Archie and HW Augustus.

A fairly new family for us and a unique chance to buy one of the foundation females from this line that produced the breed’s highest selling female from last year when HW Blackclass Z995 sold for 18,000gns to Angus House Farms Romania. This family which comes from Canada’s top carcass herd when we bought the pick of the 2014 born heifers at Cudlobe for \$17,000 who happened to be the highest IMF female in the whole of Canada that year, then add in she is only one of two daughters of the high American performance sire Sydgen Enhance then you have something very special here. You can see that performance in her pedigree come through with 14 traits in the breeds 30%. W236 is a real meat machine but still retains a perfect udder, she has been a Donor cow for us last year and we have two daughters retained. 2 embryos retained.

This cow from a flush of females that have bred so well for HW, they are the type that thrives on our conditions being moderate framed, fertile and full of flesh. Sired by Fordel Minnesota Prime who is behind many of our top breeding females and out a female who was a prolific donor for us before selling to Ireland where she continued to produce top quality progeny. This line can be found in many herds in Europe and N America. Two flush sister last year both sold for 6500gns in our sale and W238 has continued this great line of top breeding females with a son selling for 7000 in our bull sale this year and we also have 3 outstanding daughters retained.

This cow would be admired in any pasture around the world for her length, depth of body and easy fleshing and I'm sure we are going to hear more of her in the future. This high performance daughter of Bannockburn out of a full SAV embryo is just something special. Her dam sold to Galawater Angus and maternal sisters last year to Rull Angus (12,00gns) and Calfward Angus (4000gns). Two daughters are retained. Please note that she is safely in calf to HW Ernesto who is a full brother to Netherton Eclipse which sold for a breed record price of 65,600 this year, this could be something very special she is carrying.

These are just young females with lots of breeding in front of them, but look at how she has developed even though she has had 3 calves by her fourth birthday, these are the cows that pay the bills, and if they can thrive on our low input system them they will anywhere. Sired by Black Blizzard who has left us super females but that's no surprise with his being a Millah Murrah Klooney son and out of the 9500gns Blackbird cow who was sired by Ranui W Impact from New Zealand, this family also produced Netherton Black Rain (Genus) and Netherton Black Lightning (Norbreck) two very popular Ai Sires. Dam sold to Fingask Angus and we have 3 daughters retained of X467.

Another super phenotype cow of moderate frame, depth, softness of flesh and lovely udder who had her third calf by her fourth birthday, these Black Blizzard daughters really catch the eye, and no need to worry about moo calls or cameras at calving time either. Dam sold to Ysgawen Angus and this cow line goes back several times to the legendary Cee Bar Favorite who has had such a huge impact in the breed from champions to high sellers from the 80's until present day. Please note the great bulls also in this pedigree. One daughter retained and another sold to Germany in last year's sale.

We sure are going to miss these Bannockburn daughters and here’s another one full of performance and still feminine, long and deep with a great udder. Dam sold to Hendy Angus and this family which goes back to MAC Angus have really left their mark in the herd, they know how to wean the good ones. Fertility is the only trait that matters when paying the bills and X535 calved at 22 months and has come forward every year, these are the cows you want that go unnoticed as they go about their business. One daughter retained

 - 2. 07-MAY-2024 F

X560 may be a smaller framed female but she did calf at 20 months old the first time and still came forward with her second calf now that's fertility that we at HW talk about. You have to admire her thickness and balance as she matures out. Sired by Millah Murrah Nugget who sold for \$54,000 in 2018 for a then all breed's record price for a yearling bull, known for his fleshing abilities and maternal qualities which you can see in X560. Her dam sold to Galawater Angus and is a full sister to the hugely successful Netherton Americano who sold to Genus ABS, this female line with Netherton Missie A114 (30,000gns), Netherton Annie H474 and Southland Awestruck in the pedigree just can't fail not to breed the good ones. Flush mates of X560 include our Annie X557 our second high seller in 2022 when she sold for 6200gns to Barningham Angus and HW Apache who was retained as a herd sire before selling to Shanford Angus. X560 has been a Donor cow for us last year and we have two daughters retained. 3 embryo retained

- Calving Record:**
- 1. 11-JAN-2024 F
 - 2. 11-JAN-2025 M

This young hard working cow with two calves before her second birthday will mature into a good sized cow with thickness and good udder, with high performance figures behind her she will be another Bannockburn daughter that knows how to breed the good ones. Her dam sold to Ysgawen Angus and we have a daughter retained. She is in calf to HW Famous who sold for 30,000 this year to Ince Castle Angus and whose first calves are born unassisted and are looking very smart, he is a Rawburn Baltimore son out of HW Fleur W136 regarded by many as the top cow in the herd.

Sire HW BLACKBUDDY Y722 (ET)
(UK546977503722)

We have tried to retain as many Mr Equilibrium daughters as possible but we have been asked to put some in the sale and we've not just put any daughter up for sale but one of his top ones. You really have to love the phenotype of this heifer I wish my whole herd looked like her, moderate, deep bodied and full of thickness and with the super udder you are seeing on all Equilibrium daughters. Add in her top performance figures with 13 traits in the top 30% along with her pedigree stacked with the great ones who have not only shaped our herd but the breed worldwide then you have something special here. Dam we will flush this year and her grand-dam was sold to Ireland was described as maybe the best daughter of Boss. This family traces right back to our 2010 Royal Highland Champion. Due August/September to HW Blackbuddy Y722 and will be sold with calf at foot and open to go straight into a flush program as that's where I think she belongs.

We have decided to sell our 2024 red heifers as we still have their sire who is breeding well for us. We have tried to breed the same type in our reds as our blacks of moderate frame and easy fleshing and we feel Red Louisiana is doing this as good as any red bull about. He is sired by the multiple Champion Bull Lazy MC Tradition and is the only son in the UK from him so offers a total outcross for all. Dam line goes back to Gannon Red Angus who we bought 6 females from to help us build up our red herd, A029's dam is stacked with the best of Windy Gowl breeding and has many top bulls in the pedigree. This young heifer will make a real smart cow.

Now when you talk about red angus in the UK one family stands out Red Essence no other family has had such an impact in the breed from the foundation female Netherton Red Essence H483 who produced over 300,000 in progeny sales and voted Miss Europe in 2018 for her new owners in Spain, and now a granddaughter for Mosshall Angus was Champion at the Royal Highland Show this year. This real smart young heifer out of a Red Six Mile Grand Slam daughter of H483 shows all the qualities that make this family special.

This twin heifer is maybe a little bit more finer than the other red heifers but is stacked with the best outcross genetics in the UK. A pedigree of the who's who in Canadian Red Angus with many sires who have produced show champions and high sellers, then add in SAV Net Worth then this makes this heifer something special genetic wise. Her dam is the only Razor daughter in the UK and has been a top donor for us.

This very stylish daughter of Mr Pride is all you would expect from an animal with three top SAV lines in the pedigree, moderate framed, full of flesh and thickness and very correct. We think this heifer will have a great future ahead of her. Dam is line bred to the great \$285,000 SAV Harvester who has had a huge impact in our herd, when we visited SAV the first time we were so impressed that all the embryos we bought were sired by him to start these families in the UK.

One of the highest performance heifers of the crop and the only daughter of HW Magnificent Prince who sadly hurt himself just after going with heifers. He was sired by Rawburn Baltimore who has bred well for many and out of S153 now at Galawater Angus, he was our top performance bull of his year. As we have said these Bannockburn daughters know how to breed as you can see with this young heifer who will mature into some female. A lot of arguments whether to sell this heifer or not.

What a heifer we have here, at weaning maybe the best Mr Equilibrium daughter we have bred, definitely the heaviest weaned at HW and the stand out in her batch. We don't say those words lightly so you know how much we rate this heifer. From our famous Fleur line which is stacked with National and Highland Show Champions and high sellers.

This boss daughter is right up there with the best he has produced, big long and deep bodied this cow will take you in any direction you want to go in. Dam we sold for 7000gns to Reathorn Angus and in 2020 was voted Miss Europe and Overall Runner up in the world show for Angus Breeders, she also has bred an All Ireland Champion and progeny can be found in many European counties doing well. V922 is due to calf in September to HW Evolution Z825 who is now at Galawater Angus, he is a SAV Bloodline son out of a SAV Renown daughter and his first calves have great thickness and growth as you would expect from Bloodline who has bred so well in N America. She will be sold empty so ready to flush for her new owner. Two daughters retained

Maybe the most admired and talked about female at Netherton in the last few years, she has been a stand out from day one and one of our top donors for the past couple of years. She is an original Annie out of Southland Awestruck who is one of the top TC Freedom daughter we have ever seen in our travels, such has been the impact she has had in the breed since we imported embryos close to 20 years ago, we went back to and tracked her down again in Texas and flushed her again to the original mating, embryos from this second mating have sold up to 2500 at auction. Sired by TC Grid Topper the high performance meat machine from America it's no wonder the Annie's have great performance data without sacrificing calving ease and W940 has 16 traits above breed average with 11 in the top 30% of the breed. Her first son sold to Harewood Farming Company and her daughter was the choice for Ince Castle Angus when we gave them the pick of the heifers earlier this year. This line had produced many Herd Sires for us. We have flushed successfully Annie over the last few years with embryos in several countries and we are flushing her most of the summer with IVF now while she runs with the bull to get as many different matings as possible before she sells. We have 28 embryos retained of which the buyer can have a choice of 3 along with Annie.

A real eye-catching cow full of flesh and thickness, maybe one of the top Fabulous daughters in the herd. Her dam was an embryo imported from Canada sired by the Legendary TLA Northern Samurai who dominated the breed in the UK in the 90's and is regarded as one of the bulls that saved the breed and she has had receipts carrying embryos from her sell to 4000 in Ireland. A maternal sister to W950 sold for 5000 and went on to win numerous prizes at shows in the UK. This line which traces back to the great Knights Blackbird 9Y who can be found in the background of many top animals in the UK. One daughter retained and she is due later this year to HW Evolution Z825 which could be something special.

Her Male Calf
NETHERTON FANTASTIC B112
(UK542697501112), Born 12/08/2025
Sire HW EVOLUTION Z825 (ET)
(UK546977303825)

Maybe the top daughter of HW Aranguez in the herd, she is full of breed character and flesh which you would expect from the Frances line. Arangeuz was the top son of Kracker out of the 7000gns Annie R488 who sold to Norbreck Genetics and was a very easy calving sire that we used. This female line is one of the most famous at Netherton and has consistently bred the show winners and high sellers for us W952's grand dam was Female Champion at the Royal Highland Show. A daughter has been retained and her son sold for 6000 in our bull sale in February. Sold with an absolute cracking bull calf at foot Netherton Fantastic B112 sired by HW Evolution which is a herd sire in the making even at such a young age, a pair not to miss.

Her Female Calf
NETHERTON MISSIE B107
(UK542697701107), Born 06/06/2025
Sire NETHERTON KENOBI Y000
(542697501000)

This young cow with a pedigree full of all our who's who of Champions when we were showing. If you are looking for a cow with more frame, then Missie is for you. A daughter of the much admired multi winning show heifer Missie P820 who was Reserve Junior Female Champion at the Royal Highland Show at just over 12 months of age and then went on to be a top donor for us as she knew how to breed the good ones, with daughters selling to 8000 and high selling sons to Genus (Machua), Greenacres Angus (Mr McLaren) and Luxemburg (Mattie) who was also placed in the Mr Europe Competition. Add in sired by fabulous who's daughters have really bred well for us suiting our new herd sires well, but wait, if you thought it was good already Missie sells with a heifer calf at foot Netherton Missie B107 sired by Netherton Kenobi. We don't sell many Missies and here you have a chance to buy two in one lot what an opportunity not to be missed. W953 is blind of a front teat but as you can see by her calf she has loads of milk to rear a good calf.

Calving Record: 1. 14-JUN-2024 F

This family is as maternal as we have the daughters are great breeders and put everything into their calves and over the last few years many of our top selling bulls has come from this them. Sired by another high maternal bull HW Abacus who is a son of the popular Rawburn Boss Hogg and is now breeding so well in Ireland at Druncrow Angus where sons have been topping many sales. Her grand dam was an embryo from MillerWilson in Canada out of one of their top Show Females DMM Top Lass 22W and sired by the high performance and maternal king Sitz Upward who sold for \$85,000 and was sold to Barningham Angus. Y991's daughter has been retained and this high performance female sell in calf to Mr Equilibrium which has the makings of something special.

This cow was sold in our sale in 2023 where we described her as an Angus cow for the future with the whole package, phenotype feminine, top line, udder and depth of body, performance all but one trait above breed average and 5 calves by the time she is 6 years old, pedigree sired by Kracker and traces back to CEE BAR Favorite who was recognised as one of the world’s most influential females by the Angus Hall of Fame in America. Not much has changed. She stayed at HW like many of our customer’s females until transport could be arranged but as they have daughters now from Frances they have decided to sell her and keep the daughters.

Fleur W136 is regarded by many as the best cow at HW, this Millah Murrah Klooney daughter has a pedigree stack with the top females in the breed with a Miss Europe Champion, Winter National Champion, Royal Highland Show Champion and a Breed Record Price Female. Already she has bred sons to £30,000 for HW Famous. Add in Rawburn Bannockburn who's daughters have been the backbone of the herd for the last few years then you have something special here.

This top Bannockburn daughter is as deep ribbed as any and is stacked with performance on a moderate frame. A maternal sister to HW Blackbuddy who's calves are just everyone favorites at HW this year and out of our top Te Mania Emperor daughter who we sold privately to Galawater Angus. Granddam was an embryo bought from the famous SAV herd in America sired by SAV Harvester who has made an impact not only in our herd but around the world for producing quality females. Iceman was the \$225,000 high seller in Australia in 2021 and is breeding exceptional with the breeds highest priced female being a daughter when she sold for 18,000gns

One of the top young females in the herd with a perfect udder we believe Y007 has a big future ahead of her. This HF Alcatraz daughter is full of style and maternal qualities, add in that her grand dam is DMM Blackbird 105A who is one of Canada's top females not only a multi supreme champion at some of Canada's biggest shows but he has also bred many high sellers and show champions. Now what makes this mating so special is we used our last HF El Tigre semen on it, a bull who was Yearling Champion at the World Angus Forum Show in Canada in 2009 and a full brother to HF Tigre who was Supreme Champion that day. El Tigre left us great females and one of his daughters went on to be All Ireland Champion in N Ireland last year. Don't miss this unique mating to produce top females.

Another real high performance daughter of Bannockburn that oozes style and class from our sought after Top Lass family who have had a huge impact in our herd in such a short time, Y984's dam was sired by the high maternal and \$85,000 Sitz Upward who sold to Housesteads Angus out of another famous DMM Donor 22W who successfully shown in Canada, she was sired by a bull you can find in many Champions in Canada from DMM. Add in Mr Equilibrium who is breeding so well for us, his sons were the highest averaging sire group in our first bull sale and his daughters are calving down with super flesh and udders. He is leaving lots of muscle and thickness in his calves but still on a low BW.

A maternal sister to HW MR Equilibrium here sired by Rawburn Boss this real meat machine of a cow will give you the growth you would expect from Boss. Quaker Hill Rush is a real performance sire from America and we are lucky to have his semen in the UK and these will be some of the first calves born to him in Europe.

NOTES

NOTES

QR CODES

In this catalogue we have printed QR code for each animal, this will take you to the web page which will give you full information on pedigree, bar charts and photographs if available

Step 1

Download and install a QR code app on your smartphone if you don't yet have one. Open your App Store, Market, Marketplace or App World application (for the iPhone, Android, Windows Mobile and BlackBerry platforms, respectively).

Step 2

Search for "QR code reader," and then download and install a free app. The app should be named something to the effect of "QR Code Scanner" or "QR Scanner." There are paid versions of these kinds of apps, but the free ones work just as well.

Step 3

Open the QR barcode app on your smartphone, and choose "scan from camera" or "scan QR code" from the main menu. A new window should open with a square in the middle of it.

Step 4

Center the QR code in the middle of the square that's currently displayed by your QR barcode app. The app should automatically take a picture of the QR code for you when it has finished scanning the code. A new pop-up menu will appear, with the QR code information on it.

Step 5

Click the link that was embedded in the QR code, this will direct you to the Society website.

UNDERSTANDING THE BREEDPLAN PERFORMANCE RECORDING INFORMATION IN THIS CATALOGUE

Only Aberdeen-Angus GROUP BREEDPLAN EBVs or INTERIM EBVs with Accuracy (Acc) can be validly compared between herds.

ESTIMATED BREEDING VALUES (EBVs)

The EBV is the best estimate of an animal's genetic merit for that trait.

ACCURACY

An accuracy value (Acc) is presented with every EBV and gives an indication of the amount of information that has been used in the calculation of that EBV. The higher the accuracy the lower the likelihood of change in the animal's EBV as more information is analysed for that animal or its relatives.

CALVING EASE

Calving Ease EBVs are based on calving difficulty scores, birth weights and gestation length information. More positive EBVs are favourable and indicate easier calving.

DIR: Direct calving ease indicates how this animal influences the birth of its progeny. Using a bull in the Top 1% for CE direct (+7.0) is predicted to result in approximately 15% fewer assisted calvings in 2 year old heifers compared with using a bull in the Bottom 1% (-10.2). This range is predicted to be smaller in cows.

Remember that the dam's genetics and management are significant factors influencing calving ease in any mating.

DTRS: Daughter's calving ease indicates how well the animal produces daughters that have easier calving.

BIRTH AND FERTILITY

GL: Gestation Length EBV (days) is based on AI records. Lower (negative) GL EBVs indicate shorter gestation lengths which generally relate to easier calving and increased growth after birth.

BWT: Birth Weight EBV (kg) is based on the measured birth weight of animals, adjusted for dam age. The lower the value the lighter the calf at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers.

SS: Scrotal Size EBV (cm) is an indicator of male fertility in regards to semen quality and quantity. Higher (positive) EBVs indicate higher fertility. There is also a small negative correlation with age of puberty in female progeny.

GROWTH

MILK: 200-Day Milk EBV (kg) is an estimate of an animal's milking ability. For sires, this EBV is indicative of their daughter's milking ability as it affects the 200-day weight of their calves.

200: 200-Day Growth EBV (kg) is calculated from the weight of animals taken between 80 and 300 days of age. Values are adjusted to 200 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for growth to early ages.

400: 400-Day Weight EBV (kg) is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for yearling weight.

600: 600-Day Weight EBV (kg) is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

MWT: Mature Cow Weight EBV (kg) is an estimate of the genetic difference in cow weight at 5 years of age. Smaller, or more moderate EBVs are generally more favourable.

CARCASE

CWT: Carcase Weight EBV (kg) estimates the genetic difference in carcase weight at a standard age of 650 days.

EMA: Eye Muscle Area EBV (cm²) estimates genetic differences in eye muscle area of a 300kg dressed carcase. More positive EBVs indicate better muscling on animals.

FAT: Rib Fat EBV (mm) estimates the genetic differences in fat depth at the rib in a 300kg dressed carcase. More positive EBVs indicate more subcutaneous fat and earlier maturity.

RBV%: Retail Beef Yield Percent EBV (%) represents total (boned out) meat yield as a percentage of a 300kg dressed carcase. A more positive EBV indicates higher percentage yield for the 300kg carcase size.

IMF%: Intra-muscular Fat Percent EBV (%) is an estimate of the genetic difference in the percentage of intra-muscular fat at the 12/13th rib site in a 300kg carcase. Depending on market targets, larger more positive values are generally more favourable.

Indexes combine the EBVs with economic information for specific market and production systems to rank animals based on relative profit values.

Terminal index

The Angus Terminal index is aimed at a commercial herd using Angus bulls over dairy cross cows to breed steers and heifers to turn off at 16 months of age. All progeny are destined for slaughter and no replacement females are selected from within the herd. There is some emphasis on calving ease while finishing steers at around 600 kg live weight (330 kg carcase weight) using a pasture based production system.

Use this index in a commercial herd to produce progeny for slaughter. The index has moderate emphasis on easier calving (ie getting a live calf with minimal human interference) while producing calves that will then grow quickly to market specifications at around 16 months of age. The index is focused on slaughter animals and does not account for maternal traits and is therefore not suited to breeding replacement females.

If you are using smaller framed cows or heifers in your herd, then you should also put extra emphasis on a higher Calving Ease Direct EBV when selecting a sire using this index.

Self Replacing index

The Angus Self Replacing index is aimed at an Angus herd selecting replacement females from within the herd while breeding steers and excess heifers to turn off at 18 months of age. There is emphasis on calving ease and maternal traits while also looking to finish steers for slaughter at around 615 kg live weight (330 kg carcase weight) using a pasture based production system supplemented with extra rations during the finishing phase.

This Self Replacing index is also suitable to using Angus sires over mixed breed cows where replacement females are sourced from within the herd. There may be some hybrid vigour expressed in the progeny depending on the breed type of the cows used. Therefore you should consider placing extra emphasis on the Calving Ease EBVs (more positive) of the sire to allow for possible heavier birth weights of his calves due to hybrid vigour.

Use this index in both commercial and pedigree herds where you are balancing the requirements of selecting replacement females while also producing animals for slaughter.

The Aberdeen-Angus GROUP BREEDPLAN Estimated Breeding Values contained in this Sale Catalogue were compiled by the Agricultural Business Research Institute (ABRI) from data supplied by the breeders. Neither the Aberdeen-Angus Cattle Society nor the ABRI oversee or audit the collection of this data.

All bulls entered at official Society sales have their Myostatin status displayed in the catalogue.

Myostatin Status No Carrier, means the bull does not carry the Myostatin variance gene.

Myostatin Status Single Version Carrier means the bull carries a single version either Myostatin NT821 or F94L genes, but still accepted for registration by the Aberdeen-Angus Cattle Society

HEALTH AND SAFETY RULES HARRISON & HETHERINGTON LIMITED NOTICE TO ALL VISITORS AND TRADERS PLEASE READ AND OBSERVE THE FOLLOWING

All visitors and traders on site will be responsible for ensuring that they and their employees or sub-contractors engaged by them comply with all legal requirements, including the Health and Safety At Work etc., Act 1974, The Management of Health and Safety At Work Regulations, The Provision And Use Of Work Equipment Regulations, etc.

All visitors and traders will be responsible for ensuring that their operations in no way affect the integrity of the company or its fire, safety or security arrangements and in no way compromise the health and safety and welfare of other visitors to and or employees of Harrison & Hetherington.

Although it is the visitors and traders responsibility to ensure that plant, equipment and systems in work are safe, Harrison & Hetherington Limited reserve the right to ask any visitor or trader to leave the market for any breaches in the Health and Safety Rules and/or Regulations.

Vendors must inform Harrison & Hetherington Limited of any livestock due to attend the market whose temperament, behaviour or condition may call for additional precautions for its safe handling.

When loading or unloading livestock handlers must ensure that the dock and vehicle gates are securely fixed so as to prevent the escape of animals.

Traders are responsible for providing and maintaining suitable livestock handling equipment. They should ensure that livestock handlers are fit, experienced in livestock handling and familiar with the livestock in their charge.

Children must not be permitted in any area where they may be at risk from livestock or machinery.

In the case of bulls, during the period when the show/sale is open to visitors, bulls in stalls or pens should not be left unattended. If the handler is temporarily absent, arrangements should be made with another vendor, steward or member of Harrison & Hetherington staff to oversee the bull until the handler returns.

Handling of Livestock at shows and sales: Harrison & Hetherington Limited recommend that an adult person should accompany any junior person during the showing/sale of livestock in the ring and reserves the right to intervene at any point if, in the company's opinion, the person showing the livestock is at risk in undertaking that activity.

Passageways must be kept clear at all times during the auction sale. **PLEASE DO NOT STAND IN THE SALE RING ENTRANCE AND EXIT PASSAGES.**

The auction ring man escapes and refuges must be kept clear at all times.

All portable electrical equipment supplied and/or used by visitors and traders must be safe and fit for the purpose and should have a valid portable appliance test certificate.

AUCTIONEER'S TERMS & CONDITIONS OF SALE

(Incorporating the Auctioneer's
Terms and Conditions)

1. The biddings to be regulated by the Auctioneers and the highest bidder, subject to the Vendor's reserve (if any), to be the purchaser. No bid shall be retracted and if any dispute should arise between two or more bidders, the Lot in dispute to be put up again and resold, or the Auctioneers may determine the dispute at their own discretion and their decision shall be final. The Auctioneers reserve the right to refuse the bid of any person without being called upon to give reason for such action.
2. The Purchaser to give his full name and dwelling place and pay for all Lots purchased immediately at the close of sale. No Lot or Lots shall be removed from the sale premises until paid for and a pass-out slip obtained from the Auctioneer's clerk but each and every Lot shall immediately at the fall of the hammer be considered as delivered and be and remain in every respect at the absolute risk and expense of the respective purchaser or purchasers thereof and shall be removed from the sale premises at the purchaser's expense. The right of property shall not pass until the full purchase price is paid.
3. Purchasers paying by cheque must be prepared, if required, to produce a banker's reference. As a result of the Money Laundering Regulations (2003) the auctioneers are unable to accept cash payments in excess of nine thousand pounds sterling for any any single or linked purchase transaction.
4. All statements in the catalogue, or made by the Auctioneers at the time of sale, also the correct identification of the animals, are the entire responsibility of the Vendors. The Auctioneers take no personal responsibility for the correctness of such statements or identities.
5. All statements in the catalogue, or any made by the Auctioneers at the time of sale relating to any veterinary or other tests are to be taken as statements of fact only. No such statements shall guarantee the purchaser of any animal against loss arising from the subsequent reaction of such animal to any test administered after the sale and the Vendors shall not be liable in any way should this occur.
6. All stock is sold subject to the Conditions of Sale recommended for use at markets by the Livestock Auctioneers' Markets Committee for England and Wales except in so far as these conflict with any Special Conditions applicable to the sale of pedigree stock, when the latter Conditions shall prevail.
7. Neither the Vendors nor the Auctioneers will be responsible for any accident or injury to persons or property, through fire or any other cause whatsoever, nor for any damage by animals prior to, during or after the sale.
8. No undertaking by the Auctioneers or their servants to take charge of any Lot or Lots after the sale or to forward them to their destination shall be held to impose upon the Auctioneers any legal obligation or vitiate any of these Conditions.
9. Inasmuch as the Auctioneers act as agents for a disclosed principal they shall not be considered personally responsible for any default on the part of either purchasers or Vendors and the remedy shall be against them only and not against the Auctioneers.
10. If these conditions are unfulfilled, the Vendors or Auctioneers shall have the power to resell the Lots, retaining any surplus and charging any deficiency and expense to the defaulter.
11. You have a right to know how we will use the information you have provided to us. We may share the information with other members of our group and may make this information available to relevant media groups and other interested parties on request. We and other members of the group may contact you by telephone, e-mail, post or fax to inform you of products or services available. If you do not want to be contacted for marketing purposes or do not wish your information to be made available to any other parties please notify us in writing.
