General Information & Sale Notes

LOCATION: The Sale will be held online via MartEye with a viewing day on farm at Netherton Farm, Blackford, Perthshire, PH14 1QU on Saturday 17th October 2026.

CONDITIONS OF SALE: All animals are sold under The Aberdeen Angus Cattle Society auction rules and conditions of sale drawn up by the N.B.A. These entries will be sold subject to these rules along with the Auctioneers' General Conditions of Sale, both available on request. In the event of any discrepancy between the two sets of conditions, the N.B.A. conditions of sale shall prevail.

METHOD OF SALE: All cattle will be sold in guineas (105 pence) and strictly in catalogue. The auction will operate under a racehorse-style closing system, where all lots close simultaneously after 40 seconds have passed without any bids. This format enables buyers to switch between lots freely throughout the sale order.

COMMISSIONS: The Auctioneers will dutifully execute commissions to purchase for buyers unable to attend the sale personally, upon receipt of written instructions.

BIDDING FACILITY will be available for this sale via Marteye. Please register 48 hours prior to sale closing.

REGISTRATIONS: All pedigree stock in the Sale are registered with the Aberdeen Angus Cattle Society (Tel. 01738 622477).

PEDIGREE TRANSFERS: Pedigree transfers will automatically be transferred free of charge to all AACCS members.

SETTLEMENT AND CLEARANCE OF STOCK: Settlement in full is due immediately at the close of Sale. No animal may leave the Sale Premises without an official 'Pass Slip', obtainable only from the Auctioneers upon settlement.

NBA WARRANTIES: This Sale is also held subject to the Special Terms and Conditions of Sale recommended for Sales of Pedigree Beef Cattle by the National Beed Association. The preparation of these Terms and Conditions has proved a lengthy and costly process and, in order to defray the legal and other costs involved, and to provide a continuing source of revenue to assist the Association in its vital work for Pedigree Cattle Breeders, the Council of the Association has decided that a special levy, amounting to £10 + VAT per Bull (£5 paid by vendor & £5 paid by purchaser) and £10 + VAT per Female (£5 paid by vendor & £5 paid by purchaser) as of the 1st of May 2025

ABERDEEN ANGUS CATTLE SOCIETY

FOREWORD

After the success of last year's female sale where we had the breeds top price female of 2025, which will be for the 3rd year in a row and buyers from 8 countries, we are delighted to offer a super group of young females for our 6th production sale on the 17th October.

Many of them have been our top donor females over the years and have been an integral part in taking the herd forward, progeny from these females have helped us have exceptional private sales and 2 phenomenal Bull Sales where this year we had a 100% clearance of 30 bulls to average over £9500.

Again, our female sale will be online only and run from 3pm Thursday 15th October and close 3pm Saturday 17th October. The auction will run on a racehorse style close; this is when the entire sale stays open in extended bidding. This type of sale allows you as the bidder to change to a different lot within the sale, irrespective of where it is in the catalogue. The sale closes following a period of one minute of no further bids after the closing time of 3pm.

We are delighted that Harrison & Hetherington will conduct the sale again this year, with online bidding available through Marteye.

It's still a great time to be a beef farmer with high prices in every aspect of the industry and with a shortage of beef worldwide the future looks bright.

With ever increasing costs in farming, we need functional females who are first and foremost structurally correct and fertile, while still having breed character on a moderate balanced frame that can do the work for you and can thrive on a low input system. We feel this group of females offers you some of the best not only in our herd but the breed.

Again, they will be brought out on grass only and have been out wintered, the heifers will only have seen 1kg of grain from 7-9 months of age.

Each year we see significant progress in lowering the amount of input our cattle need, this has allowed us to cut down concentrate costs on our bulls and now cutting out creep in calves while not sacrificing weight and quality. This can only be done by sourcing the top genetics from around the world, for the traits that made the breed famous and we feel these cattle have this in abundance, ease of calving and fleshing, ability to turn poor forage into beef and of course high marbling.

We are really pleased with the feedback from customers regarding how the females have performed in their new herds from our sales, with the past 3 years Miss Europe coming from our Sale females in the Angus Breeders World Show and we feel the females in this year's sale can take you in any direction you wish go.

Demand is growing for a more moderate framed, deeper fleshed animal, it's the way the industry needs to go in the future to have a functional, profitable cow herd, so why wait when you can buy the future today.

A warm welcome awaits you if you wish to attend on Saturday 17th October to view the cattle prior to the sale concluding with food and refreshments available.

Visitors are always welcome and please feel free to contact us with any questions you may have.

HERD HEALTH

- TB – 4 YEAR TESTING LAST TEST February 2026
- BVD – ACCREDITED
- LEPTO – HERD TESTING
- IBR – all lots have tested negative in 2026, except lot 13 who was inconclusive and is now IBR marker vaccine
- JOHNES – RISK LEVEL 1*
- NEROSPIROSIS- RISK LEVEL 1
- Bluetongue – all animals over eight weeks of age have been double vaccinated

CATTLE CAN STAY AFTER THE SALE AT BUYERS RISK UNTIL TRANSPORT CAN BE ARRANGED

EXPORT

ANY OVERSEAS BUYERS WISHING TO PURCHASE A FEMALE FOR FLUSHING, WE ARE OFFERING AS EXPORTS ARE CLOSED THE NOW THAT ANY FEMALE BOUGHT CAN STAY AT NETHERTON FREE OF CHARGE WITH ONLY FLUSHING COSTS TO PAY, ANY PROGENY WILL ONLY BE CHARGED AT COST OF PRODUCTION ONCE IT WAS SOLD.

HW Angus Sale

Jallex Select

AUCTIONEER FOREWORD

The 6th HW Angus Female Sale promises to be one of the best and H+H are once again delighted to provide the highly successful Mart Eye Online Timed Sale Platform to market another outstanding group of Aberdeen Angus Females.

With genetics oozing with the traits that will ensure that your herd is fit to face the future, the catalogue is full of structurally correct, fertile females packed with unrivalled growth and performance figures in cattle requiring minimal intervention and at low cost. In addition, we will offer several hand-picked embryo lots, and 20 straws of semen, containing exciting and unique breeding combinations.

Any breeder looking to produce a moderate framed, functional cow should be sure and take a run to Netherton Farm and see the cattle in the flesh, they won't disappoint, William and Seonaid are always on hand to show interested parties round the sale cattle.

The H+H team will be at Netherton on the day to welcome buyers and assist with the online buying process, however if we can help with any queries running up to the date, please do not hesitate to contact us.

Auctioneer and H&H Group Director

Herd Sire

Sire Reference:

HW MR EQUILIBRIUM W202

gs: Te Mania Berkley B1 (AI) (IMP)

Sire: Te Mania Emperor E343 (AI) (IMP)

gd: Te Mania Lowan Z74

gs: SAV Providence 6922

Dam: Netherton Miss Effie M726

gd: Ankony Miss Effie 8433 (ET) (IMP)

Equilibrium has proved to be one of the most popular bulls in recent years with daughters selling to £20,000 and 15,000gns and sons to 38,000gns with many more selling for over £10,000 and are the most sought-after sire group in bull sales. Sired by one of Australia's highest and most used ever performance sires, and from one of the most consistent breeding donors ever at Netherton who bred several Herd Sires for Pedigree Herds. Equilibrium is a moderate framed bull who is full of breed character and muscle, his daughters now in production are greatly admired for their soft flesh, correctness and super udders.

HW MR EQUILIBRIUM W202

Herd Sire

Sire Reference:

RAWBURN BANNOCKBURN T628

gs: MCC Daybreak

Sire: Quaker Hill Rampage 0A36 (SS) (IMP)

gd: QHF Blackcap 6E2 OF4V16 4355

gs: Nichols Steadfast T139

Dam: S A V Elba 1407 (ET) (IMP)

gd: Nichols Bonnie P55

Bannockburn is designed for maximum feed efficiency without compromising on growth and breed character he really has suited our females with his first sons selling easily due to their performance, easy calving and phenotype, his first daughters have calved now and are just outstanding with perfect udders, milk and easy fleshing ability. His dam Nichols Bonnie has shattered every record in the Nichols herd for Residual Average Daily Gain (feed efficacy and growth). His sire Quaker Hill Rampage is one of the most dominant sires ever in the US, A bull renowned for growth, structural soundness and fertility. Bannockburn will give you calves that will be born easy, grow quick with an unrivalled ability to turn grass or feeding into red meat. His figures are some of the best in the breed.

RAWBURN BANNOCKBURN T628

Herd Sire

Sire Reference:

HW FABULOUS R565

A sire who's sons in Ai studs HW Farghal and HW Lord Horatio are doing a great job. Kracker a son of our National Cow Champion in 2014 and sired by the cow maker SAV Brave. His maternal sister sold for 8000gns to Rawburn at last year's sale and in this year's sale you can see the strength of the Karama family in depth. We highly recommend his daughters in the sale for fleshing ability, good growth and milk.

HW FABULOUS R565

Herd Sire

Sire Reference:

HW RED LOUISIANNA X270

A real meat machine of a bull with lovely soft flesh and thickness, this easy calving sire is an outcross sire for everyone in the UK, sired by the multi winning Lazy MC Tradition and out of a Red Ter-Ron Parker. He is the sire of the Record priced Red bull in the UK when a son sold for 13,000gns this year to Cogent, he has also sired several other bulls who have sold for five figures.

HW RED LOUISIANNA X270

Herd Sire

Sire Reference:

HW BLACKBUDDY Y722

We just love to see Te Mania Emperor and SAV Harvester in the pedigree of our females as these are the cows that work for us. So when we got this son by the high performance bull Quaker Hill Dead Centre it was a non brainer not to keep this son. Blackbuddy has good growth and length and is out of a super donor female who was Galawater Angus's pick of the herd, Grand dam was sold to Bryon O'Halloran and was an embryo brought in from the famous SAV Herd in America. His calves are born easy and have explosive growth and great muscle expression they are the stand out calves of 2025.

HW BLACKBUDDY Y722

Herd Sire

Sire Reference:

HW BLACK ICE A095

This super young herd sire is gaining a lot of friends for his growth, correctness, length and shape, he is sired by Texas Iceman who sold for a then record price of \$225,000 in Australia, his dam line is stacked with many of our top lines and sires who have shaped the herd. We really rate this young bull and his calves are looking good at this young age, a great chance to have progeny from a bull who we feel will have a major impact in the HW/Netherton Herd.

If you're looking for a female that oozes style and class then this top daughter of Rawburn Boss has it along with loads of growth, length and depth of body she could easy be fed into a show cow for someone, sold in our 4th sale to Ireland for flushing and bought back by HW. Boss daughters know how to breed and have done so well for us and our customers add in her dam is HW Miss Effie M726 who produced herd sires for fun with 7 found in Pedigree herds including HW Mr Equilibrium who is maybe one of the best breeding bulls around at present with sons selling to 38,000gns. V735 sells with a stonker of a bull calf at foot sired by HW Blackbuddy, real herd sire material here. One embryo retained

Chances like this come around very rarely in the breed, so don't regret not building your herd around this outstanding female who has always been described as our best female in the herd. Her pedigree is a who's who of some of the most influential lines worldwide, sired by the maternal masterclass Millah Murrah Klooney and out of a female who was voted Miss Europe in 2022 and bred the top Ai Sire HW Fletcher for Genus ABS and high selling embryo lots in America. This family recognized by the American Hall of Fame as one of the breeds most influential in the breeds history has certainly lived up to its reputation with numerous Highland, Royal, Perth Supreme Champions and High Sellers over the years. Fleur W136 has been a top donor for us and has a daughter sold to Greenacres Angus in Ireland and numerous high selling sons including the 30,000 HW Famous to Ince Castle. Fleur calved twins at the end of July and will sell with bull calf at foot sired by HW Blackbuddy, the heifer calf was taken of her to give this super bull calf a better chance, even at this young age he is a stand out calf with herd sire potential and full brother to him will be retained as a stock bull for us next year.

FLEUR WILL BE SOLD OPEN READY TO FLUSH. FOUR EMBRYOS RETAINED.

Another top donor for us and some real great bulls coming from her in our next bull sales. This top daughter of Rawburn Bannockburn is as deep ribbed as any and is stacked with performance on a moderate frame. A maternal sister to HW Blackbuddy who is breeding so well for us, is sired by the great Australian bull Te Mania Emperor who is as proven as any in the breed for performance and maternal qualities. Dam was sold privately to Galawater Angus, granddam and was an embryo bought from one of the worlds top herds SAV and sired by one of the best bulls I've seen on my travels SAV Harvester.

2 EMBRYOS RETAINED.

This is the type of female that keeps you in business calved at 24 months and has calved earlier each year, we are getting to the end of our Rawburn Bannockburn daughters in the herd and they will be greatly missed and they have bred so well for us and Prauline is a typical daughter with a great udder, size, length, depth of body and super performance data to go along with those looks. Add in the power and thickness of HW Harvester and TC Stockman 365 on her dam side then you can see why you have a great breeding female here. Her first two sons can be found in pedigree herds Kilravok Angus and Kelton Angus all have been some of our high sellers of that year.

Her Male Calf
HW FREEDOM C828
(UK546977504828), Born 16/08/2026
Sire **HW BLACKBUDDY Y722 (ET)**
(UK546977503722)

Bought and owned by Bruzilu Liellopps in Latvia at our 4th sale Frances has now been flushed successfully and calves are due later this year in Latvia, not much needs to change from our notes back then where we described her as my type of female, feminine, fertile and full of flesh. Frances has some real growth bulls in her pedigree with HW Fabulous as her sire and her dam sired by 007 you just know she will wean you one of your heaviest calves. This female knows how to breed top bulls and she produced one of her high sellers this year and sells with an outstanding bull calf at foot which is likely her best to date.

FRANCES SELLS FREE OF THE BULL.

Another female that was sold in last year sale by overseas buyers who are now finished flushing her and they have decided to put her back into this year's sale. This fairly a new family for us has already had an impact in the herd when it produced the breeds highest sailing female from 2024 when HW Blacklass Z995 sold for 18,000gns to Angus House Farms Romania. This family which comes from Canada's top carcass herd when we bought the pic of the 2014 heifers at Cudlobe for \$17,000 who happened to be the highest IMF female in the whole of Canada that year, then add in she is only one of two daughters of the high American performance sire Sydgen Enhance in the UK then you have something very special here. W236 is a real meat machine, but still retained a perfect other and reared twin heifer calves this year.

This I believe has the potential to be one of the most influential red females in Europe, she is as maternal as any red female we have bred with a perfect udder and lovely deep long body, if you want to breed Red Angus at the top level then don't miss out here then. A total outcross pedigree being the only daughter of Razor in the UK and out of a super red donor in Canada. Her first daughter sold to Gannon Angus last year and two have been retained, she is due to calf again around sale time and to our top young herd sire Black Ice who is a Texas Iceman son.

Gilda can stay to calf and until calf is old enough to travel.

10 EMBRYOS RETAINED.

I must sound like a broken record when I describe these high performance Bannockburn daughters deep bodied, long, wide topped, maternal and good udder and Erica is no exception. Her dam was one of the stand out daughters of Evander and is now at Barningham Angus. Erica's first son was sold to a large commercial herd and two daughters are retained who we rate highly among their year groups.

You know how the Abacus daughters breed with many our five figured priced bulls being out of them in this year's sale, well now you have a chance to own maybe in our eyes the best one. You have a phenotype that you dream of moderate, deep, soft fleshed, big ribbed and a perfect udder, then add in performance of 16 traits in the breeds top 30% before we even talk about pedigree then you know you have something special here. From the famous Madame Pride family X491's dam had an accident when she was only 4 months old but that didn't stop her maturing out into this super female, her granddam was sold to the Raethorn herd for 7000gns and was voted Miss Europe and Runner Up in the World in 2020 and bred so well for us. This pedigree is stacked with bulls who's daughters have left their mark in the breed TC Freedom, SAV Harvester, Millah Murrah Loch Up, Ardrossan Admiral, G13 Steel, Vermillion Dateline and TC stockman 365 it's no wonder this year's heifer calf is the best in the bunch.

24 EMBRYOS RETAINED WHICH THE BUYER CAN CHOOSE 2 FROM SIRES USED ARE MILLAH MURRAH KLOONEY AND HW MR EQUILIBRIUM.

Another top Abacus daughter who at only 5 years has had 4 calves, these females are the ones that pay the bills add in they are out wintered and on a low input system then not only do they pay the bills they leave you profit. Like her dam Lot 1 she is larger framed and full of flesh and depth and would be a great addition to any herd.

You don't get many chances to buy SAV Brave daughters and here's one with lots of eye appeal on a moderate frame this deep sided, fleshy female is another cow who has come forward each calving, fertility is the No 1 trait to make money. Her dam sired by another blast from the past Netherton Mr Brazilian was sold to Palmallet Angus and her granddam sired by the legendary TC Freedom was our pick from the Balmachie Sale a few years back. Add in her great granddam is the Cudlobe Ellen Erica 46D who left her mark in so many herds in the UK.

A tank of a cow her full of flesh with a super udder on a moderate frame. Annie is the last of 3 full flush sisters to sell with the other two selling for 6200gns to Barningham Angus and 6000gns to Westellen Angus in Ireland. She is a Millah Murrah Nugget daughter another hugely popular Genus ABS herd sire from a herd in Australia that has the highest averaging bull sale of any breed most years. Her dam is a full sister to another top sire from Genus Netherton Americano.

This long deep sided daughter of Abacus is full of flesh and style, she has produced top bull calves each year for us with her first selling for 10,400gns Mossburn Angus in this year's bull sale. Again, full of functional, maternal type of bulls in the pedigree that gives you females like this that can have 3 calves by 4-year-old and come forward each year. The karama family is full of performance and know how to breed in any herd they are in and Y584 is no different with 13 traits in the top 30% and all calving traits above breed average.

Again, all calving trait in the breeds top 5%, these are the females you don't need Moo Calls or cameras for just like what the breed was famous for easy calving. This moderate framed feminine female has good muscle expression and top line. Her first son sold for 8400gns to Amo Angus. She is sired by the high-performance Quaker Hill Dead Centre and out of the prolific breeding female Rawburn Duchess Windsor N664 who's progeny can be found in several European Countries she produced over 100 embryos in 3 flushes for us before been sold to Ireland in a 3-way split to Briarhill Angus, Blackfield Angus and Vetembryos.ie. progeny averaged over 6000 and included HW Dawood 7500, HW Dramatist 6000, HW Don Willie herd sire at Housesteads Angus and HW Delightful who was sold to the NCBC Stud in Ireland. This young female has a bright future and will follow in her dams' footsteps and be a top consistent breeder.

This super long, square looking high-performance female is still full of femininity like you would expect from a Bannockburn daughter and like the other knows how to be fertile even with calving at 24 months she has come forward each year. Her dam sold for 6800gns to Wardlaw Angus and was sired by Millah Murrah Kingdom who when sold set a new Australian record for an Angus bull and from a line that goes back to Hoff Angus. Y653's only son sold for 7200gns and we have 2 daughters retained.

I'm sorry if I'm so repetitive but this young female who is a granddam already, again calved at 24 months and has come forward each year, has all calving traits above breed average with still growth in the top 10%, these are the females that have made this herd so successful and genetics desired throughout the UK and Europe and people can be assured that they will work for them, can't praise Bannockburn highly enough what he has done to this female herd and Fleur is another excellent daughter. Dam sold to Ysgawen Angus. This family know how to produce the high sellers.

A big long growthy Abacus daughter that milks so well and puts everything into her calves. Her first son sold for 7800gns this year. Her granddam a SAV Solid Gold daughter is behind many of our top females in the herd. You know how well this Abacus/Mr Equilibrium cross works so next year's calf could be something really special.

Big deep sided cow here with loads of flesh like you would expect with an Annie. If you like figures then take a look a look here. Only the second daughter to sell from HW Blackmore a Rawburn Boss Hogg son out of our 10,000 pick of the Wedderlie heifers, used for one season before being sold to Portugal. Her dam now at Barningham Angus and granddam at Galawater Angus were great donor cows for us, Y698 is a great candidate to flush and build a herd around.

This great young Bannockburn daughter ticks lots of boxes and already is a donor female for us and can be for you, along with a great set of performance figures she is soft fleshed, deep, thick and correct add in her pedigree and you can see why we have retained her first son to use on heifers. Her dam sold to Galawater Angus and was sired by the proven high performance Australian bull Te Mania Emperor, her granddam is one of those original embryos that came in for SAV all sired by SAV Harvester who have all made such an impact in the herd over the last 10 years. In calf to a bull, you are going to hear a lot of as his first calves are just outstanding but that's no surprise when you're sired by \$225,000 Texas Iceman. 2 embryos retained.

Sold as a calf for 6000gns in our 3rd sale to Ireland but unfortunately didn't manage to be exported before the ban. We described her back then as maybe the best calf sired by Bannockburn. She is a hard-working young female who has plenty of growth and length like many of the Bannockburn daughters, her first two calves are exceptional with a son in next year sale right up there with the best and this year's calf will definitely be a keeper. Top performance data here but when you also have Fabulous and Boss in the pedigree then you know they will perform. Dam sold to Ysgawen Angus and granddam to Pallmallet Angus.

A lot of visitors pick this one out as one of the top Abacus daughters for her sheer presence, growth and being so clean fronted and feminine, lots of discussion here whether we should sell Y819 at this age as she has the potential to be one of the best breeding daughters of Abacus. She has the top heifer calf from last year and her dam sired by Netherton Krscker who was renowned for his fleshing abilities was sold to Row Angus. This old family traces back to the original Newhouse lines

Service Details: Ran with HW Ernesto Z897 from the 01/04/2026 until 08/04/2026 then with HW Black Ice A095 from the 08/04/2026 to the 19/05/2026. PD'd 7 weeks in calf on the 19/05/2026

Calving Record: 1. 14-JUL-2025 M

We all know how well the Karama family does in the show and sale ring and here is another big strong, wide female with lots of power. Sired by HW Enforcer who has left great producing daughters with super udders he is sired by the \$900,000 SAV President and out of a Rito 707 daughter it no wonder these females breed. Dam sold to Morpheus Angus and her Granddam was sold to Rawburn Angus and this year a daughter of her sold for a breed record price of 77,000gns to Yester Estate. This is a great chance to get into one of the most sought-after families in the breed right now. Whatever bull she is in calf to you can't lose Ernesto is the full brother to the record price bull in the breed Netherton Eclipse when he sold for 68,600 or a son of the \$225,000 Texas Iceman.

Calving Record: 1. 24-JAN-2026 F

Here's another top young Karama female made in the mould of what we expect of this family long, clean and correct, from the same direct line from the lot before, this time sired by Augustus who was a full brother to Netherton Archie and same way bred as the original Annie's who have done so well. Dam sired by Netherton Black Blizzard who again left super big ribbed daughters but when your dam is the 9500gns Netherton Blackbird N779 who can see why. If you study the back breeding of Z874 then you have lots of famous bulls there from all over the world and dams who have been high revenue earning cows you surely can't go wrong here.

Please keep in mind these heifers in the sale have been out wintered on only silage, they might not be the biggest for age but you see how our cows mature out and these will also. We manage our heifers to have the one trait that matters fertility. This Netherton Kenobi daughter is very feminine and smooth she has lots of growth potential. What she is carrying could be something special going by what we have on the ground to a new high marbling bull for everyone he is a GAR Home Town out of an EWA Peyton daughter.

A top HW Red Louisiana daughter here who's daughters sold well last year and his first son sold at auction set a new breed record for a Red Angus bull in the UK when he sold for 13,000gns to Cogent Breeding. Again, a heifer not pushed but in calf to a new outcross sire from Australia Paringa Red Trademark, great potential to breed yourself a new outcross which are always wanted.

A very smart Equilibrium daughter and only one of two in the sale, next year we hope to have over 30% of the cow herd sired by him and we are still using him heavy that's how much we rate him and his daughters, like Evita they are moderate, deep, fleshy, full of breed character with super udders. Three generations of donor cows behind this one as this family knows how to breed the good ones. Take a look at the sires on the dam's side Netherton Trendy Man, Royal Stockman, TLA Northern Samurai, JRM Canadian Prime and Patrick of Breaffy all bulls who have shaped the Netherton herd over the last 50 years into one of Europe's top herds.

The best Rawburn Boss Hogg daughter we have bred by far, her sons have averaged over 6000 and we have retained three outstanding daughters. Out of our most famous line at Netherton producing countless Champions and High sellers over the years. A maternal sister sold for 10,800gns last year and her granddam was Female Champion at the Royal Highland Show in 2013. The growth and performance you get here is exceptional with 11 traits in the breeds top 5%.

Now sell with a super heifer calf at foot sired by HW Black Ice born 24th September.

18 EMBRYOS RETAINED AND BUYER CAN HAVE A CHOICE OF 2 FROM THE MATINGS FROM TEXAS ICEMAN AND HW MR EQUIBRIUM.

This family in the short time we have had them have made a huge impact producing maternal females with growth and good udders and bulls who are usually some of the first to sell each year. They stem from embryos sired by the \$85,000 Sitz Upward out of one of Miller Wilsons top show heifers DMM Top Lass 22W. W947 is big strong female with a deep body, her first son sold for 8400 to Galawater Angus and 3 daughters are retained.

No doubt this is one of the standout cows in the sale she has scale, power, depth and flesh. The best daughter of Netherton Black Blizzard who was a Millah Murrah Klooney son out of the 9500gns Netherton Blackbird who was a Ranui W Impact daughter, Impact was a National Champion Bull in New Zealand. To keep up the international genetics on the sire's side X982's dam was an embryo gifted to Seonaid by Dawn and Lee Wilson for her 18th birthday and wow what a gift this has turned out to be, sired by DMM Stache a SAV Heritage son who bred many Champions for DMM in Canada. The Angus breed is No1 in the world and this female carries an array of top lines from around the world. Two daughters retained and her only son will be one of the top bulls in next year's bull sale.

9 EMBRYOS RETAINED.

Sire HW BLACKBUDDY Y722 (ET)
(UK546977503722)

This is a special pair here again from the Top Lass family and maybe the best to date, this young donor female is oozing style with her depth of body, growth, length, softness and udder she is a female to build a herd around. Likely one of the thickest Bannockburn daughters we have. Her dam sold to Housesteads Angus and her granddam is the super show heifer from Canada DMM Top Lass 22W. Y984's performance is second to none in this sale with 15 traits in the top 20%. Her first son sold to Bardrain Angus, her second was the top calf in his group before selling, but she sells with a bull calf with great potential sired by HW Blackbuddy whose first crop have been easy sold at a young age. This line knows how to produce bulls with Netherton Tango a high selling sire at Genus ABS.

One of my favorite's here, Frances has just weaned twin heifer calves at 353kg and 314kg at 7 months of age. We are only selling this top donor because of the embryos we have from her and these two outstanding heifer calves. Again, another top breeding Abacus daughter, when you see the impact, he's having on our herd and also in Ireland you really should have one in your herd. Dam sold to the Coolermoney herd in N Ireland.

A smaller framed female that has lovely flesh and thickness and is so balanced. Sired by HW Eric a high-performance son of Boss Hogg that was used for a season before selling to Luxembourg. Her dam was an imported embryo from MillerWilson in Canada and is now at Barningham Angus she was by the highly maternal sire SAV Heritage and from one of their top donors, she bred many herd sires with sons averaging over 5500.

A real smart Equilibrium daughter with a little more growth and will mature out into the type of female you would expect a Karama to be. Her dam was one of our top donors and progeny can be found throughout Europe and in Canada, her son in last year's sale sold for 6600gns. Her granddam won the Cridlen Cup at the National in 2014 for best cow and calf and won numerous Interbreeds that year she is also the grand dam of the record price Angus is the UK.

One thing for sure we can only sell heifers from this age group if they're from our top end as we don't feed any concentrate and out winter them. This is the first HW Blackbuddy daughter to be offered for sale and we believe they will make great breeding females. Her dam is the granddam of the previous lot and you can see by the Karama's in the sale they are a top performance family for us.

This young donor hit the headlines this year when her son same way bred as these embryos sold for the top price of 38,000gns in our 2nd bull sale to Fordel Angus. This super feminine daughter of Abacus is the granddaughter of one of our original SAV embryos. Add in they will be sired by Equilibrium whose sons are in hot demand both pedigree and commercially and his daughters are maturing into super females then these embryos are really worth a look. The mating predictor on this mating shows all traits above breed average, including 14 in the top 30%.

The only daughter in the UK sired by the \$1.5 million SAV America, then add in the breeds maternal greats like SAV Resource, SAV Pioneer, SAV Final Answer, Leachman Right Time, Coleman Charo and Boyd New Day then you have something special in this young female. Her first calf sold for 12,600gns to Morrison Angus. Ulsterman sold with his dam for the top price of \$140,000 at the Millah Murrah Female Sale in 2023, his dam is recognized as one of the most influential cows in Australia. We feel this bull whose semen only arrived this year in the EU is going to have a major impact on the breed.

Ok you might want to improve her head a little, but this young female has a body that oozes femininity from her smooth frontend to depth of body and super bone and udder structure makes her one of our standout donors this year. She is a full sister to the five figured HW Evolution who is now herd sire at Galawater Angus. His first crop of calves at HW and Galawater are truly impressive and his sons I next year's bull sale will be some of the highlights. SAV Bloodline's progeny I have seen on my travels have been standouts. This mating to another high SAV influenced pedigree Morpheus Aprilrain who adds in some of the greats in the SAV program including a cow who was there No1 income producing female. It's no surprise that SAV is regarded as one of the world's top herds as their genetics have worked so well in many countries.

This mating with another top Australian sire Texas Iceman offers you a chance to buy from a bull who has had daughters to 18,000gns and sons to 7400gns for us already, we have also kept a son after seeing how good his progeny in Australia were at Texas Angus.

We have decided to sell 2 of the embryos we have imported direct from SAV as we have super calves on the ground which I'm sure you are going to hear a lot more off and more implanted, so a unique chance to get direct SAV embryos here in the UK. 9170 is sired by the \$1.5 million-dollar SAV President and is the dam of SAV Beneficial who sold for \$135,000 in 2025. SAV Charisma is one of the standout new sires at SAV who Seonaid saw this year his dam is the No1 beef value cow in the SAV herd and she is the dam of bulls like Bloodline, Emblem, Ajax, Rise N Shine and many other sale toppers and has generated over 3.9 million on 119 progeny sales. Kelly Schaff made this comment about Charisma's flush "They offer one of the greatest phenotypic and genetic packages we have ever produced with the unmatched combination of maternal, muscle, marbling, feet quality and disposition" This is truly a lot you can't afford to miss.

Embryos from this donor topped our sale last year when they sold for 920gns each but when you are sired by the \$200,000 HF Alcatraz whose progeny are now in production and breeding so well, and out of a daughter of DMM Blackbird A105 a multi winning Supreme Champion at several of Canada’s biggest shows, we believe she is the best breeding female in Canada right now with progeny topping sales and winning shows. Y007 is undoubtfully one of the top young females in our herd. These embryos sired by Morpheus Aprilrain one of the thickest and easiest fleshed bulls around, should be eye catching to say the least.

Lilie is the flush siter to HW Red Russian the first Red Angus to sell for over £10,000 at public auction in the UK, this is a total outcross genetics for the EU with Lilie sired by the Australian bull Milwillah Marble Bar who is in a league of his own when it comes to performance in Australia for reds and out of some exciting older proven lines that can be found at Red Rush Angus in Canada. Combine this with Morpheus Red Lightning who has the exciting new red genetics in Canada and out of a top female at Six Mile one of Canada's great herd of females. If you're a Red Angus breeder then this might be your next herd sire in this package.

This young Bannockburn daughter who is breeding extremely well for us is a daughter of the much admired multi winning show heifer Missie P820 who was Reserve Junior Female Champion at the Royal Highland Show at just over 12 months of age, her daughters have sold to 18,600gns topping our sale last year and high selling sons to Genus (Machua), Greenacres Angus (Mr McLaren) and Luxemburg (Mattie) who was also placed in the Mr Europe Competition. Add in that these Embryos are sired by HF El Tigre who was yearling champion at the world Angus Forum show in Canada 2009 and a full brother to HF Tigre who was supreme champion that day. EL Tigre left great females and one of his daughters went on to be all Ireland champion in Northern Ireland.

QR CODES

QR CODES

QR CODES

In this catalogue we have printed QR code for each animal, this will take you to the web page which will give you full information on pedigree, bar charts and photographs if available

Step 1

Download and install a QR code app on your smartphone if you don't yet have one. Open your App Store, Market, Marketplace or App World application (for the iPhone, Android, Windows Mobile and BlackBerry platforms, respectively).

Step 2

Search for "QR code reader," and then download and install a free app. The app should be named something to the effect of "QR Code Scanner" or "QR Scanner." There are paid versions of these kinds of apps, but the free ones work just as well.

Step 3

Open the QR barcode app on your smartphone, and choose "scan from camera" or "scan QR code" from the main menu. A new window should open with a square in the middle of it.

Step 4

Center the QR code in the middle of the square that's currently displayed by your QR barcode app. The app should automatically take a picture of the QR code for you when it has finished scanning the code. A new pop-up menu will appear, with the QR code information on it.

Step 5

Click the link that was embedded in the QR code, this will direct you to the Society website.

UNDERSTANDING THE BREEDPLAN PERFORMANCE RECORDING INFORMATION IN THIS CATALOGUE

Only Aberdeen-Angus GROUP BREEDPLAN EBVs or INTERIM EBVs with Accuracy (Acc) can be validly compared between herds.

ESTIMATED BREEDING VALUES (EBVs)

The EBV is the best estimate of an animal's genetic merit for that trait.

ACCURACY

An accuracy value (Acc) is presented with every EBV and gives an indication of the amount of information that has been used in the calculation of that EBV. The higher the accuracy the lower the likelihood of change in the animal's EBV as more information is analysed for that animal or its relatives.

CALVING EASE

Calving Ease EBVs are based on calving difficulty scores, birth weights and gestation length information. More positive EBVs are favourable and indicate easier calving.

DIR: Direct calving ease indicates how this animal influences the birth of its progeny. Using a bull in the Top 1% for CE direct (+7.0) is predicted to result in approximately 15% fewer assisted calvings in 2 year old heifers compared with using a bull in the Bottom 1% (-10.2). This range is predicted to be smaller in cows.

Remember that the dam's genetics and management are significant factors influencing calving ease in any mating.

DTRS: Daughter's calving ease indicates how well the animal produces daughters that have easier calving.

BIRTH AND FERTILITY

GL: Gestation Length EBV (days) is based on AI records. Lower (negative) GL EBVs indicate shorter gestation lengths which generally relate to easier calving and increased growth after birth.

BWT: Birth Weight EBV (kg) is based on the measured birth weight of animals, adjusted for dam age. The lower the value the lighter the calf at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers.

SS: Scrotal Size EBV (cm) is an indicator of male fertility in regards to semen quality and quantity. Higher (positive) EBVs indicate higher fertility. There is also a small negative correlation with age of puberty in female progeny.

GROWTH

MILK: 200-Day Milk EBV (kg) is an estimate of an animal's milking ability. For sires, this EBV is indicative of their daughter's milking ability as it affects the 200-day weight of their calves.

200: 200-Day Growth EBV (kg) is calculated from the weight of animals taken between 80 and 300 days of age. Values are adjusted to 200 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for growth to early ages.

400: 400-Day Weight EBV (kg) is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for yearling weight.

600: 600-Day Weight EBV (kg) is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

MWT: Mature Cow Weight EBV (kg) is an estimate of the genetic difference in cow weight at 5 years of age. Smaller, or more moderate EBVs are generally more favourable.

CARCASE

CWT: Carcase Weight EBV (kg) estimates the genetic difference in carcase weight at a standard age of 650 days.

EMA: Eye Muscle Area EBV (cm²) estimates genetic differences in eye muscle area of a 300kg dressed carcase. More positive EBVs indicate better muscling on animals.

FAT: Rib Fat EBV (mm) estimates the genetic differences in fat depth at the rib in a 300kg dressed carcase. More positive EBVs indicate more subcutaneous fat and earlier maturity.

RBV%: Retail Beef Yield Percent EBV (%) represents total (boned out) meat yield as a percentage of a 300kg dressed carcase. A more positive EBV indicates higher percentage yield for the 300kg carcase size.

IMF%: Intra-muscular Fat Percent EBV (%) is an estimate of the genetic difference in the percentage of intra-muscular fat at the 12/13th rib site in a 300kg carcase. Depending on market targets, larger more positive values are generally more favourable.

Indexes combine the EBVs with economic information for specific market and production systems to rank animals based on relative profit values.

Terminal index

The Angus Terminal index is aimed at a commercial herd using Angus bulls over dairy cross cows to breed steers and heifers to turn off at 16 months of age. All progeny are destined for slaughter and no replacement females are selected from within the herd. There is some emphasis on calving ease while finishing steers at around 600 kg live weight (330 kg carcase weight) using a pasture based production system.

Use this index in a commercial herd to produce progeny for slaughter. The index has moderate emphasis on easier calving (ie getting a live calf with minimal human interference) while producing calves that will then grow quickly to market specifications at around 16 months of age. The index is focused on slaughter animals and does not account for maternal traits and is therefore not suited to breeding replacement females.

If you are using smaller framed cows or heifers in your herd, then you should also put extra emphasis on a higher Calving Ease Direct EBV when selecting a sire using this index.

Self Replacing index

The Angus Self Replacing index is aimed at an Angus herd selecting replacement females from within the herd while breeding steers and excess heifers to turn off at 18 months of age. There is emphasis on calving ease and maternal traits while also looking to finish steers for slaughter at around 615 kg live weight (330 kg carcase weight) using a pasture based production system supplemented with extra rations during the finishing phase.

This Self Replacing index is also suitable to using Angus sires over mixed breed cows where replacement females are sourced from within the herd. There may be some hybrid vigour expressed in the progeny depending on the breed type of the cows used. Therefore you should consider placing extra emphasis on the Calving Ease EBVs (more positive) of the sire to allow for possible heavier birth weights of his calves due to hybrid vigour.

Use this index in both commercial and pedigree herds where you are balancing the requirements of selecting replacement females while also producing animals for slaughter.

The Aberdeen-Angus GROUP BREEDPLAN Estimated Breeding Values contained in this Sale Catalogue were compiled by the Agricultural Business Research Institute (ABRI) from data supplied by the breeders. Neither the Aberdeen-Angus Cattle Society nor the ABRI oversee or audit the collection of this data.

All bulls entered at official Society sales have their Myostatin status displayed in the catalogue.

Myostatin Status No Carrier, means the bull does not carry the Myostatin variance gene.

Myostatin Status Single Version Carrier means the bull carries a single version either Myostatin NT821 or F94L genes, but still accepted for registration by the Aberdeen-Angus Cattle Society

HEALTH AND SAFETY RULES HARRISON & HETHERINGTON LIMITED NOTICE TO ALL VISITORS AND TRADERS PLEASE READ AND OBSERVE THE FOLLOWING

All visitors and traders on site will be responsible for ensuring that they and their employees or sub-contractors engaged by them comply with all legal requirements, including the Health and Safety At Work etc., Act 1974, The Management of Health and Safety At Work Regulations, The Provision And Use of Work Equipment Regulations, etc.

All visitors and traders will be responsible for ensuring that their operations in no way affect the integrity of the company or its fire, safety or security arrangements and in no way compromise the health and safety and welfare of other visitors to and or employees of Harrison & Hetherington.

Although it is the visitors and traders responsibility to ensure that plant, equipment and systems in work are safe, Harrison & Hetherington Limited reserve the right to ask any visitor or trader to leave the market for any breaches in the Health and Safety Rules and/or Regulations.

Vendors must inform Harrison & Hetherington Limited of any livestock due to attend the market whose temperament, behaviour or condition may call for additional precautions for its safe handling.

When loading or unloading livestock handlers must ensure that the dock and vehicle gates are securely fixed so as to prevent the escape of animals.

Traders are responsible for providing and maintaining suitable livestock handling equipment. They should ensure that livestock handlers are fit, experienced in livestock handling and familiar with the livestock in their charge.

Children must not be permitted in any area where they may be at risk from livestock or machinery.

In the case of bulls, during the period when the show/sale is open to visitors, bulls in stalls or pens should not be left unattended. If the handler is temporarily absent, arrangements should be made with another vendor, steward or member of Harrison & Hetherington staff to oversee the bull until the handler returns.

Handling of Livestock at shows and sales: Harrison & Hetherington Limited recommend that an adult person should accompany any junior person during the showing/sale of livestock in the ring and reserves the right to intervene at any point if, in the company's opinion, the person showing the livestock is at risk in undertaking that activity.

Passageways must be kept clear at all times during the auction sale. **PLEASE DO NOT STAND IN THE SALE RING ENTRANCE AND EXIT PASSAGES.**

The auction ring man escapes and refuges must be kept clear at all times.

All portable electrical equipment supplied and/or used by visitors and traders must be safe and fit for the purpose and should have a valid portable appliance test certificate.

AUCTIONEER'S TERMS & CONDITIONS OF SALE

(Incorporating the Auctioneer's
Terms and Conditions)

1. The biddings to be regulated by the Auctioneers and the highest bidder, subject to the Vendor's reserve (if any), to be the purchaser. No bid shall be retracted and if any dispute should arise between two or more bidders, the Lot in dispute to be put up again and resold, or the Auctioneers may determine the dispute at their own discretion and their decision shall be final. The Auctioneers reserve the right to refuse the bid of any person without being called upon to give reason for such action.
2. The Purchaser to give his full name and dwelling place and pay for all Lots purchased immediately at the close of sale. No Lot or Lots shall be removed from the sale premises until paid for and a pass-out slip obtained from the Auctioneer's clerk but each and every Lot shall immediately at the fall of the hammer be considered as delivered and be and remain in every respect at the absolute risk and expense of the respective purchaser or purchasers thereof and shall be removed from the sale premises at the purchaser's expense. The right of property shall not pass until the full purchase price is paid.
3. Purchasers paying by cheque must be prepared, if required, to produce a banker's reference. As a result of the Money Laundering Regulations (2003) the auctioneers are unable to accept cash payments in excess of nine thousand pounds sterling for any any single or linked purchase transaction.
4. All statements in the catalogue, or made by the Auctioneers at the time of sale, also the correct identification of the animals, are the entire responsibility of the Vendors. The Auctioneers take no personal responsibility for the correctness of such statements or identities.
5. All statements in the catalogue, or any made by the Auctioneers at the time of sale relating to any veterinary or other tests are to be taken as statements of fact only. No such statements shall guarantee the purchaser of any animal against loss arising from the subsequent reaction of such animal to any test administered after the sale and the Vendors shall not be liable in any way should this occur.
6. All stock is sold subject to the Conditions of Sale recommended for use at markets by the Livestock Auctioneers' Markets Committee for England and Wales except in so far as these conflict with any Special Conditions applicable to the sale of pedigree stock, when the latter Conditions shall prevail.
7. Neither the Vendors nor the Auctioneers will be responsible for any accident or injury to persons or property, through fire or any other cause whatsoever, nor for any damage by animals prior to, during or after the sale.
8. No undertaking by the Auctioneers or their servants to take charge of any Lot or Lots after the sale or to forward them to their destination shall be held to impose upon the Auctioneers any legal obligation or vitiate any of these Conditions.
9. Inasmuch as the Auctioneers act as agents for a disclosed principal they shall not be considered personally responsible for any default on the part of either purchasers or Vendors and the remedy shall be against them only and not against the Auctioneers.
10. If these conditions are unfulfilled, the Vendors or Auctioneers shall have the power to resell the Lots, retaining any surplus and charging any deficiency and expense to the defaulter.
11. You have a right to know how we will use the information you have provided to us. We may share the information with other members of our group and may make this information available to relevant media groups and other interested parties on request. We and other members of the group may contact you by telephone, e-mail, post or fax to inform you of products or services available. If you do not want to be contacted for marketing purposes or do not wish your information to be made available to any other parties please notify us in writing.
