

Lockerbie Ram Sale

Tuesday 1st September 2026

Lockerbie Mart

Sydney Place, Lockerbie, DG11 2JA

Viewing of rams from 11:30am

Sale starts at 1:00pm

Performance recorded meat and maternal rams.
Grass bred for efficient, high quality
commercial sheep production.

KNOW YOUR FORAGE.

Feed smarter. Farm better.

Agri Wise Forage Analysis gives you accurate information about the nutrients in your silage, hay or haylage – so you can feed the right diet, not just more.

**TEST IT.
FEED IT RIGHT.
SAVE MONEY.**

Forage analysis takes the guesswork out of feeding and helps you make smarter decisions that benefit your animals, your pocket and the environment.

**INFORMED
DECISIONS
BETTER
RESULTS**

SAVES YOU MONEY

Avoid overfeeding expensive blends and unnecessary supplements. Feed to actual needs, not estimates.

Lower input costs
Higher margins

GIVES THE RIGHT NUTRITION

Balanced diets improve animal health, performance, fertility and milk/meat output.

Healthier animals
Better productivity

PROTECTS YOUR SOIL AND ENVIRONMENT

Overfeeding leads to excess nutrients (like N, P, Cu, Zn) and heavy metals building up in soil and grass. Tested forage helps you apply only what's needed.

Less waste
Healthier soil & waterways
No unnecessary heavy metals

SIMPLE. FAST. RELIABLE.

Our forage analysis is quick, accurate and easy to understand – giving you clear results you can act on.

**KNOW YOUR FORAGE.
MAKE BETTER DECISIONS.
REAP THE REWARDS.**

GET YOUR FORAGE TESTED TODAY

- www.agri-wise.co.uk
- Unit 4, Furnham Close Industrial Estate,
Chard, Somerset. TA20 2HA

Knowledge feeds success.

BETTER INFORMATION. BETTER DECISIONS. BETTER FUTURE.

Forage analysis from Agri Wise & CNS Nutrition – because every mouthful counts.

2026 SALE INFORMATION

We are pleased to be back with the Harrison & Heatherington team at Lockerbie.

Anticipating the restrictions with Bluetongue for 2026, we made the decision early to host the sale over the border in Lockerbie instead of the usual location of Carlisle to enable both our Scottish and English customers to purchase rams freely.

All rams will be coming direct from breeding partner flocks in Scotland.

MartEye will be available at the sale, and if you wish to bid through MartEye, you must register **at least 24 hours in advance of the sale.**

You do not need to register to view the sale.

Go to <https://handh.marteye.ie/> for more information.

If you are unable to visit the sale, contact your regional sales advisers who will help you get the rams you need.

WHAT DO ALL THE NUMBERS MEAN?

CARCASE Trait

EBVs tell you how well a rams' lambs will grow and grade.

INDEX

combines the EBVs for important traits. The most important traits have the biggest influence on the Index.

EWE Trait

EBVs tell you how well a rams' daughters will perform.

ABERFIELD		CARCASS TRAITS			EWE TRAITS			SHEPHERDING			INDEX	GRADE	Breed for Change Index
RAM	BORN	Growth	Muscle depth	Fat depth	Lambing Percentage	Methan. ability	Face weight	ETC	Lambing Ease	Lamb Vigour			
(Known EBVs)		0.0	0.0	0.0	0	0.0	0.0	***Top 5%, **Top 10%, *Top 25%			00		
12430FW	Mar-24	3.2	1.5	-0.5	21	-1.0	0.5	***		*	122	ELITE	*****
58629FF	Mar-23	2.1	0.9	0.0	-4	0.0	-0.1		**		89	SELECT	***
321 SHEN	Mar-25	5.2	-0.1	-0.1	-18	0.8	3.6	*	*		69	COMMERCIAL	**

EBVs (estimated breeding values) for each trait, this is an estimate of the rams' genetic merit that will pass on to its lambs.

Positive values are above average. Negative values are below average.

Ranks sheep on their potential to reduce the carbon footprint of the flock. It includes measures of ewe efficiency and a methane EBV based on PAC measurements.

The star rating indicates the best 20% (*****) to the poorest 20% (*).

More stars the better

The best of the best (top 25% and above) for lambing ease, lamb vigour, parasite resistance and longevity.

Find out more

DEVELOPED FOR COMMERCIAL SHEEP PRODUCERS

Our own systems are designed for commercial farmers, allowing consistent genetic progress in traits that deliver profit in customers' flocks.

Large breeding flocks measuring 17,000+ lambs every year bringing tangible improvements to your flock.

GENETIC GAIN TRANSLATES TO REAL DIFFERENCES ON FARM

Each Innovis sheep is evaluated using large, robust data sets recorded in flocks like yours...

ABERFIELD

Aberfield is an improved alternative to traditional crossing sires. Producing efficient, profitable, replacement ewes and well conformed, fast growing wether lambs.

Aberfield SR incorporates Lleyn genetics to the Aberfield, creating a ram suited to breed replacements in closed flocks, keeping ewe size at an optimum whilst maintaining prolificacy.

Aberglân is a shedding composite based on the Aberfield. It offers an opportunity to incorporate shedding genetics into the flock combined with the efficiency and conformation of the Aberfield.

ABERTEX

A Texel based ram, recorded for maternal and meat traits. With the ability to breed hardy crossbred, maternal daughters for future replacements as well as quality finished lambs.

HIGHLANDER

100% New Zealand maternal genetics, bred in the UK.

Produces a productive and efficient ewe with a smaller mature weight - a low impact option for a regenerative system.

Highlander ewes scan up to 200% on a grass based system and rear their own body weight in lambs by weaning.

CHEVIOT

A compact ram with good structure and performance records selected under pressure

A ram to breed efficient ewes or as a terminal sire to add value to hill lambs in a hard environment

ABERMAX

Derived from the best Texel and Charollais genetics to produce a powerful meat ram. Bred for prime lamb production, the breeding programme focuses on lambing ease and lamb vigour, improved lamb growth and finished lamb conformation.

ABERBLACK

Bred from specific Suffolk lines with introgression of other important traits from Texel and Charollais.

The breeding programme is focused on rams that produce easy lambing, vigorous lambs that are very fast growing, and well conformed from forage diets. Ideal for outdoor lambing systems.

PRIMERA

100% New Zealand meat genetics, bred in the UK.

Lambs are easy lambing, suited to a low labour, outdoor system. Lambs are fast growing and easy finished on grass and forage.

Find out more about the different breeds

PRICING

Our prices have been set as follows for each sale.

We aim to select a variety of breeds and grades for each sale but some grades may not always be available.

If you have a specific breed and grade you'd like, contact your sales adviser.

Maternal Rams	Elite	Select	Commercial
Aberfield/Aberfield SR Aberglân Abertex Highlander Cheviot	£1000	£900	£800

Meat Rams	Elite	Select	Commercial
Abermax Aberblack Primera	£950	£850	£750

Teasers	£350
---------	------

COMPARATIVE PRICING

The continued work we do to improve genetics and health as well as investment in research and development is reflected in our prices. Although higher than industry averages, below we have demonstrated the value our rams can bring your flock when longevity and mating capacity are taken into consideration.

We have an online mating cost calculator which calculates the cost of getting your ewes in lamb to an Innovis ram vs other industry rams - scan the QR code to try it...

It is important to note that rams' genetic potential has a huge impact on flock performance and is the real driver of profit, it's benefit is not estimated here.

	Sale Price	Ewes per Ram	Working Life (years)	Total lambs reared per ram (135%)	Cost/Lamb Produced
Innovis Elite Ram	£1000	75	4	405	£2.47
Industry Crossing Sire	£700	45	3	182	£3.84
					£1.37 cheaper

MartEye

TERMS AND CONDITIONS OF SALE

SELLING PROTOCOL

Harrison & Hetherington, Lockerbie Mart are clerking the sale to facilitate our sales.

All rams will be sold by Harrison & Hetherington through the ring with the highest bid securing the purchase. The sale will also be live streamed through the 'MartEye' system and online bidding available. Please pre-register with MartEye before the sale if you intend to view and bid online.

Minimum prices are set for each breed and at each grade, shown on **page 7** of the catalogue.

The Innovis 'hat' option will not be available at this sale.

All rams purchased at the live sale must be paid for in full and moved on the day of purchase. Estates, Colleges or Businesses unable to accommodate this should notify our finance department in advance of the sale by email to **accounts@innovis.org.uk** or phone **01970 828236**.

Any queries over accounts must be addressed pre or post the event.

Harrison & Hetherington would like to take this opportunity to thank both Vendors and Purchasers for your support and attendance on the day.

TERMS AND CONDITIONS

All rams are sold in accordance with the Innovis Terms and Conditions for supply of goods and services, available to view on our website at www.innovis.org.uk

Innovis will guarantee the performance of all rams sold at its official sales for the first mating season after purchase, provided that the owner can demonstrate that they have made reasonable efforts to ensure the health, welfare and security of the ram during that period.

Any issues post sale must be raised prior to **1st February 2027** and accompanied by appropriate evidence/supporting documentation in addition to a veterinary report where applicable. In the event that a ram is found to be defective, a replacement ram of equivalent genetic potential will be supplied. A credit note for the value of the ram may be issued against the buyers next purchase if the replacement is not available. **No cash refunds are given.**

NOTES

OUR SALES

Our first ram sale was held in 2011 at Aberystwyth.

2026 will be our 16th season of sales and since our original sale, we are now hosting 8 sales and a number of selection days throughout the UK as well as events for Pilgrim's Europe.

Our rams are bred by 23 breeding partner flocks located throughout the country and recording 10,000+ ewes. Each ram has gone through rigorous selection process before being deemed fit for sale and we regularly cull animals that do not achieve the high standard we and our clients expect.

The Innovis breeding programme remains one of the largest globally.

2026 SALES

Stirling Mart	Caledonian Marts, Stirling Auction House, Stirling, FK7 7LS	2 September
Aberystwyth 2	Peithyll, Aberystwyth, SY23 3HU	10 September
Old Hall Farm	Roughlee, Nelson, BB9 6NL	16 September

Is a low input foraged based production system key to the future profitability of your sheep enterprise?

Stout
Livestock
Consulting

Whether you are looking to change your sheep system or want to review and refine your current flock, Stout Livestock Consulting Ltd is here to help with a focus on data and profit driven decision making.

Sheep services include:

- System design to best match stock feed demand with grass growth.
- Outdoor lambing strategies.
- Flock breeding strategies including performance recording.
- Tup selection and EBV interpretation.
- Grazing and wintering strategies.
- Flock KPI benchmarking.
- Enterprise costings and benchmarking.
- FARMAX scenario modelling.
- Best practice advice on management, health and nutrition.

FAS funding available for specialist advice plans in Scotland (100% funded up to £1,600).

Other services include:

- Forage focused beef systems.
- Carbon audits (£500 PSF funding available in Scotland).
- Whole farm reviews.
- Accounts analysis and budgeting.
- Soil and grassland management.

BLUETONGUE

Bluetongue is now well established in England, Wales and Northern Ireland with cases emerging recently in Scotland too. The potential impact on UK flocks has been widely discussed in the farming press and social media with many commercial flocks in south west England experiencing severe losses.

We do know that if a sheep is infected the disease is severe and very often fatal. Breeding rams are the most valuable animals in the flock and a big financial investment, Innovis vaccinated all breeding rams in 2025 & 2026, to provide maximum protection against BTV-3 before sale.

All rams will be sold with an accompanying health declaration document which details all vaccines the ram has received, including BTV-3. The BTV-3 vaccines currently available are anticipated to provide protection for approximately 1 year so buyers should consult their vet to discuss booster vaccinations next year as part of their annual health planning.

BREEDING EWES FOR SALE

Innovis continue to offer the ability to list your crossbred females for sale on the Innovis website.

To advertise your ewes for sale on the Innovis website, we have 2 options:

Package 1- £20:

- Listing to appear on the Innovis website
- Ewes advertised on all Innovis social media pages on a regular basis
- Innovis staff to contact individuals who may be interested in purchasing crossbred ewes.

Package 2 - £30:

- All items listed above in package 1
- Additional advertising on the Innovis Sell My Livestock portal.

GENETIC UPGRADE VOUCHER

Here at Innovis we work hard to make sure we are constantly improving the genetics we offer to our customers so that our flock performance can continue to improve. For the rams we offer for sale this means that the average index and threshold to qualify as an Elite grade (Top 25%) gets higher each year.

Once again this year we are offering a Genetic Upgrade Voucher to customers who have a live Innovis ram **born on or before 2021**.

Terms & Conditions:

- Vouchers must be claimed **before 12pm on Friday 28th August** to redeem your voucher at this sale.
- One voucher to be offered per live ram e.g., a customer who bought 3 x 2020 born rams can receive 3 x £50 vouchers.
- Each voucher can only be used on one ram e.g., a customer receiving 3 x £50 vouchers must purchase 3 new rams to be able to use all 3 vouchers.
- Each voucher must only be redeemed when buying an Elite or a Select grade ram.
- Vouchers must be used in the same year as when it is received, it will expire at the end of the year.

Please note:

No vouchers can be issued on the day of the sale. If you have qualifying rams, please ensure that all vouchers have been redeemed prior to the date above.

Health Protocol

Innovis understand that when selecting sheep for breeding, health is vitally important in order to protect the productivity of your flock. Therefore, we operate a unique programme to maximize health and biosecurity of our whole ram production system, from the source flocks, through to growing units and finally the rams for sale.

All breeding partner flocks are part of a health screening programme where ewes are blood sampled and some culled and screened for the major production limiting iceberg diseases through a partnership with 'Farm Post Mortems'. Further strategic screening is undertaken throughout the year and tailored flock health plans ensure that all ram lambs have had a similar start to life.

The five main Iceberg diseases:

Maedi Visna (MV)

Our breeding partner flocks are either MV accredited with PSGHS or monitored on a proportional testing programme in line with the MV accreditation scheme but operated by Innovis. Please contact our office if you specifically want MV accredited (PSGHS) stock. Innovis would implement a test and cull protocol across the whole flock if one of our breeding flocks tested positive for MV until two clear tests were achieved.

Borders Disease

In a ground-breaking initiative for our Sheep Industry, each ram has been bled and certified as Borders Disease (PI) Negative. Any PI positive ram would be culled albeit that none have been identified since we started testing in 2017.

Caseous lymphadenitis (CLA)

All our breeding flocks are monitored for CLA and any suspect abscesses on rams tested. Vaccination would be introduced if a flock were identified with CLA.

Ovine pulmonary adenocarcinoma (OPA)

As there is no robust validated test, we monitor condition score of ewes on a regular basis and post-mortem fallen stock or any ill-thrift animals where possible. We are actively involved in trying to develop a more robust approach to diagnosis and screening.

Johnes Disease

All retained ram lambs are vaccinated with 'Gudair' vaccine before five months of age, irrespective of the flock Johnes status, to safeguard their working life to customers. We also monitor for Johnes disease at multiplier flock level annually through faecal samples and post-mortem reports.

Ram lambs move on to grower units, selected for good biosecurity and management systems - each farm runs a grass and forage-based system and has a tailored health plan, meaning that each ram for sale is grown under similar conditions.

Finally, to ensure our rams are fit for purpose, each ram undergoes a pre-sale MOT to examine its suitability for breeding. This includes a clinical examination together with palpation and visual inspection of the external genitalia. Rams will leave our sales having had a quarantine drench of either 4-AD = Monepantel (Zolvix™) or 5-SI = Derquantel / abamectin (Startect™) in line with SCOPS guidelines. The rams will have also received a trace element bolus and Pasteurella vaccination booster pre-sale.

Sheep Scab - rams will have either been screened for exposure to Scab (Psoroptes ovis antibody ELISA test) at a group level or treated with a 2% Moxidectin injection at 1mg moxidectin/kg bodyweight pre-sale.

For information on **Bluetongue**, see **page 32**.

ARE YOU PREPARING YOUR FLOCK FOR THE BEST RETURN?

Ideal to use at:

PRE-TUPPING:

- Maintain ewe health through winter and lambing
- Optimise conception rates and lambing percentages

SCANNING:

- Maintain ewe health through pregnancy
- Support lamb vitality and optimise colostrum quality
