## **MAGNIFICENT MOILIES - FOREWORD**

The Irish Moiled is one of Ireland's most distinctive breeds of cattle native to Ireland and more specifically they are the only surviving breed of domestic livestock to Northern Ireland. A hornless (polled) breed which is also distinctive with its red colouring, marked with a white line on the back. The name of the breed comes from the Gaelic word 'maol' meaning hornless.

The cattle produce high quality meat that has a distinctive flavour and more marbling compared to other beef breeds. They are a hardy breed that can be outwintered due to being able to withstand the cold, wet harsh winters, being of medium size and do not poach the ground. A very milky breed they produce a lively calf at birth.

The Irish Moiled Cattle Society was formed in 1926 and reformed again in 1982 when there were less than 30 females left in the world. A breed that was so close to extinction has made a comeback as people look to native breeds for easy-care.

Irish Moiled cattle are very much in demand and are very often hard to source due to their rarity. The RBST have listed the Irish Moiled breed as Category 4 'At Risk'. Numbers of registrations are increasing year on year, the demand from butchers and restaurants saw the Irish Moiled Society launch the Irish Moilie Beef scheme in 2019. There is a subsidy headage payment on Irish Moiled cattle in Northern Ireland and the Republic of Ireland. Irish Moiled semen for the first time was exported to Australia and New Zealand in 2020.

The 'Magnificent Moilie' sale, will make history for the Irish Moiled breed. This is the first official online sale of Irish Moiled cattle which is open to buyers from Great Britain, Northern Ireland, and the Republic of Ireland. There will be no better way of selecting new bloodlines from some of the top Irish Moiled herds in the breed, with 37 lots up for grabs in this Magnificent Moilie sale we wish to take this opportunity to wish you all every success with both sales and purchases.
