## MAUDLIN HERD

The Maudlin Mill herd was established in 2015, they are now producing show quality animals culminating in the breeding of the Calf of the Year in 2018 and 2019. The two younger bulls are being offered due to them being the best calves from each of my bulls in 2020 - lot s14 and 16 have been in the herd for a number of years and the Maudlin herd is now progressing to embryo transfer and therefore has the ability to access multiple sires using AI. The Maudlin herd has an Elite Health Status and is in a TB4 area with the last full herd test performed in November 2020. The herd benefits from being farmed on the chalk lands of the Southdowns National Park and therefore the herd lives out all year.

**MAUDLIN SAQQARA** was sired by Wellhead Orton Lad out of Wellhead Ouzo, who is the daughter of the prolific show cow Wellhead Kir Royal, one of Nicky Lockett's favourites. Saqqara is therefore very much the stamp of the Wellhead herd. I was lucky enough to winter Stoke Juniper last year and the bull calf at foot to Saqqara (Maudlin U2) is the output. Stoke Juniper is known for his sheer impressive length and scale and this calf at foot at six months old has clearly benefited from those genetics. He has been birth notified so could be a future young bull. They have wintered out well and the heifer has been left empty till the spring so she can concentrate on herself and the calf. She has proven very easy to get in calf as she was my first two-year-old heifer to get in calf.

**MAUDLIN TALLY BOB** was the last calf by my foundation bull Wellhead Orton Lad out of Maudlin Quaglina. She was shown online last year and placed. Tally is the friendliest and most curious of all my young heifers and therefore would be an ideal addition to a small herd as she is so easy to handle.

# **MAJOR REDUCTION SALE FROM THE NEWTON HERD**

## **On behalf of Messrs Walker**

Due to unforeseen circumstances and through no fault of the cattle the very hard and difficult decision has been made to majorly reduce the Newton herd of Longhorns.

The Newton herd is a 4-year TB holding and the last whole herd clear test was January 2020. The herd is annually vaccinated for Lepto, BVD and IBR and all calves born have tested negative for BVD on tag and test since 2016.

All females are sold in there working clothes and have been housed since early November 2020 and been fed just grass silage. All 9 cows with 2021 born calves are sold clear of the bull, along with the 4 senior heifers. 2 cows with 2020 born steer calves at foot are both sold back in calf to Tanfield Quantum, Newton White Lilly due late June/ early July 2021 and Newton Wrapped Up due September 2021.

The Newton herd has been out on the show circuit every year since 2007 up to 2019 and 8 of the cows in sale have been shown at some point in their lives.

6 cows and a bull have been retained to keep a small Newton herd going.

David and Graham Walker
