HEALTH STATUS

THE HERD:

Panda Holsteins take great pride in its high health-status. Cattle are housed all-year round and the herd is under an annual TB testing regime. Panda Holsteins does routine bloods annually on all cattle on farm, testing for IBR, BVD, Lepto, Neospora and all milking animals are tested for Johnes disease.

There has NEVER been a case of any of the above diseases on farm here at Panda. All cattle are vaccinated against Ringworm and have been vaccinated on the 19th of February 2025 for Botava (for protection against Bluetongue).

SALE ANIMALS:

All animals in the sale will be pre-movement TB tested under 30 days & blood tested for IBR/BVD (test date 3/6/2025) to allow animals to travel directly to Scotland after the sale. Depending on the Bluetongue requirements, Panda Holsteins has in place to blood test all animals prior to the sale date to allow animals to be moved anywhere within the UK immediately after the sale.

CALVES UNDER 3 MONTHS:

Panda Holsteins are happy to house any calf purchased in the sale free of charge until it is safely weaned.

EMBRYOS:

Please read carefully on the individual lot page for clarification on country eligibility and where the embryos are stored. Shipping is at the buyer's expense.

TERMS & CONDITIONS

BUSINESS TRADING TERMS AND SETTLEMENT OF PURCHASES

Payment due on Day of Purchase (This will be strictly adhered to). Interest chargeable from date of purchase at 7.25% over Bank of England base rate at the time. For accounts in default Purchases shall be governed by and construed in accordance with the law in England and Scotland.

ACCEPTED FORM OF PAYMENTS

Debit card, direct bank transfer & cheque. 2% surcharge will apply to Business Credit Card payments. If payment is made by credit card, it must be linked to a business bank account.

METHOD OF SALE

All animals will be sold in guineas (105 pence) and in catalogue order, unless announced by the Auctioneer. Completion of a Buyers Slip is essential for parties following the fall of the hammer. No Lots can leave Ravenscroft Hall Farm without a 'Pass Slip' being issued by the sales office. Please note that all lots must be settled on the day of purchase and prior to clearance of any stock.

CONDITIONS OF SALE

The sale will be held subject to the Auction Sale Rules of Holstein UK, a copy is available on request.

TERMS

The terms of the sale are payment on the day unless arrangements are made prior to the sale.

FROM THE AUCTIONEER

Glyn Lucas
AUCTIONEER

PATHWAY TO PANDA

The Pathway of Panda is such a fitting name for this amazing sale. It's an event that celebrates the passion, skill, knowledge and determination of Molly Westwood as well as her incredible enthusiasm for the Holstein breed.

My first conversation with Molly was back in 2012 when she called me about two special show heifers that she was considering selling on choice in the upcoming Black & White Sale. I met Molly a few weeks later at the National Calf Show were these two heifers, full sisters **PANDA ALEXA FOOLS GOLD** and **PANDA ALLYANDER FOOLS GOLD** were competing in the show.

PANDA ALEXA FOOLS GOLD was named Champion Calf and her full sister placed second in the December Calf class. She went on to sell in the Black & White sale that year selling for 6,000gns to the Belle Holstein herd in Cumbria and this prolific line of the Fools Gold family continues to be successful in Cumbria in the Woodcatt and Petteril herds.

The Panda Holstein herd has quickly developed since then into a world recognised brand renowned for breeding the best Red & White Holstein cattle. As well as the Fools Gold line other legendary cow families have been added to the Panda herd that all feature in this incredible catalogue.

Every pedigree in this SPECIAL sale features either an All American, World Dairy Expo Champion, Royal Winter Fair Champion, Swiss Expo Champion, European Champion, All Britain or National Champion and all have an incredible ability to transmit. I have never been able to say this about any other catalogue before.

The Pathway of Panda has been a success story in many ways and is a great example of what can be achieved when you set goals and follow your dreams. If you have dreams about developing your own herd, Molly's journey to success will hopefully inspire you to invest on the 1st July and start your very own pathway to success.

I look forward to meeting you on the 1st July and I hope your dreams can become a reality just as Molly's have.

Just imagine the possibilities!

Glyn Lucas

INTRODUCTION

WELCOME

Ten years ago, Panda Holsteins came into operation as a father and daughter partnership. We had big dreams to develop the best Holstein genetics in the world to form a future nucleus herd attractable to breeders across the globe, and we hope you see this within our sale line-up.

Our journey started by investing in five embryos and developing the resulting females, reinvesting profits into a new pedigree. Every cow family we have invested in has been carefully selected and researched beforehand to be sure we are adding something unique to our portfolio of females. Whilst building our breeding females we have never been afraid to sell our best. Having sold cattle and embryos in more than 23 countries, we feel truly grateful to our customers and partners around the globe, and we take great pleasure looking on to see Panda females having success with their new owners.

OUR BREEDING STRATEGY

Here at Panda we appreciate that we have smaller numbers, but we have always maximised each individual's full potential through strategic planning and breeding decisions. We have never bred for fashion - that's a trend that comes and goes. We have instead bred for true balanced type, high mammary scores, and correct rumps whilst correctively mating each female. Brood cows which have power throughout, with great udders - built to last - are the kind of cows we aim for. We hope you can see this trend in some of the more mature lots we have to offer.

OUR SUCCESS

Over the last decade we have achieved a lot that we are proud of, and that all comes down to the strong maternal lines we are working with - along with careful management.

Some highlights include:

- ★ **Three All Breeds All-Britain Calf Champions**
- ★ **Champion R&W at the National UK Dairy Day**
- ★ **More than 35 All-Britain Nominees**
- ★ **Becoming the first breeders in history to win the prestigious Royal Burke Trophies with a pair of Red Holsteins**
- ★ **A 2024 Master Breeder Award**

PANDA'S PROMISE

The Pathway of Panda Sale promises to offer our best breeding females at all ages and stages with 90% being Red or RC - an average of 11 generations of VG/EX - and +10 points of Conformation from the 70 lots available. If you are looking for either a chart-topping genomic female, a top-yielding brood cow, a potential All-Britain or National UK Dairy Day winner or an exclusive line to add to your herd then we believe you will be spoilt for choice. We believe all animals will transition into any management system with all in-milk (or in-calf) females being robot and cubicle trained.

Careful planning over the past decade has allowed us to offer what we believe is a true representation of our passion for breeding. Enjoy following our story through this catalogue -which truly shows how the Pathway of Panda has shaped our operation into the breeding business that it is today.

We look forward to your company.

Molly and Andrew
Panda Holsteins

PATHWAY of PANDA

THE

O'KALIBRA

STORY

Decrusaz Iron O'Kalibra EX97

O'Kalibra was the first Swiss cow to score EX-97. When the three-time Swiss Expo's Supreme Champion was crowned Holstein International's All-Time World Champion in 2021 – beating several profile North American cows at the time – she took her place as a breed icon.

O'KALIBRA

All-Time World Champion represents the peak of every mountain

In January 2015 Molly spotted a heifer that had been consigned to a German sale for the following month.

"When I did a little detective work on her pedigree, I found out that she was a red carrier Goldwyn granddaughter of Decrusaz Iron O'Kalibra EX97," Molly said.

"I couldn't forget about her, and I immediately contacted her breeder (Cord Horman, Wilcor Holsteins) asking what else he had from the family."

Turns out, her dam was going to be shown later the following month in Germany at the same venue where the sale was being held.

DESTINY SPEAKS

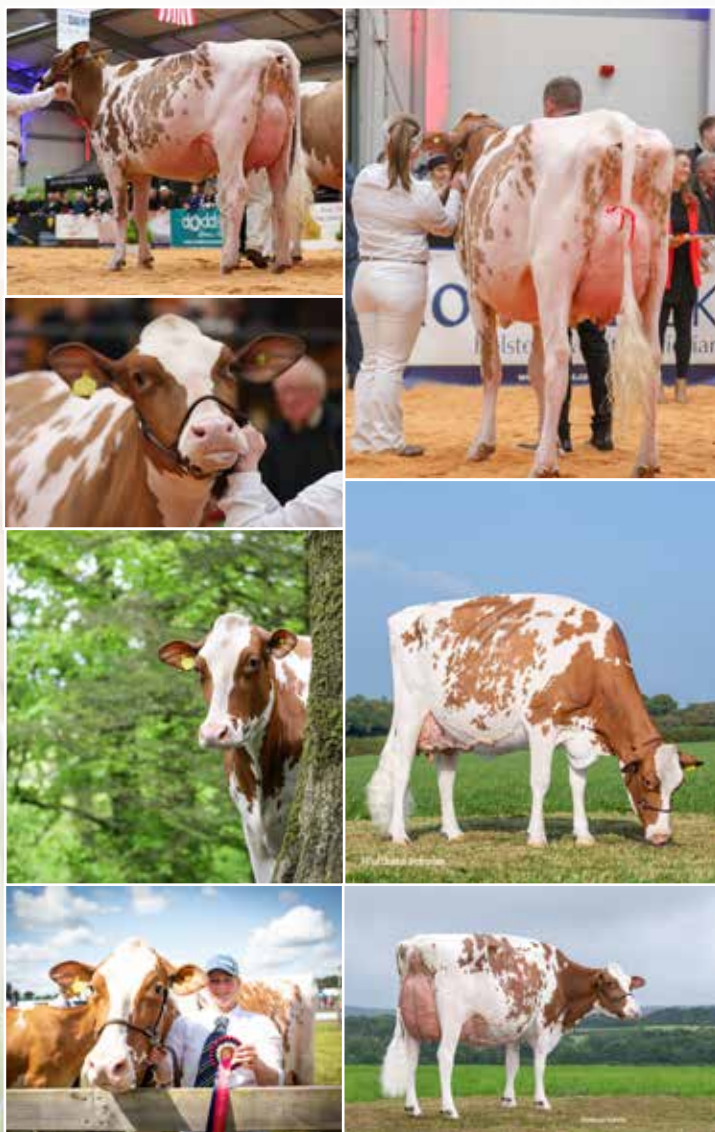

In what seemed an ironic twist, Molly travelled to Germany for a work trip to Shau Der Besten – one of Germany's most competitive shows – hosted and organised by Masterrind. Her job was to look at progeny groups two days before the show and sale.

"But there was only one thing I was thinking about. I wanted to see the dam and daughter descendants of O'Kalibra. When we finally got to the show, I went straight to the Red Carrier Goldwyn and, oh my, she was super pretty!"

"I then went over to her dam (who was tied in with the rest of her show string), and she oozed so much balance that it gave me that 'tingly feeling' you can't escape when you see a great one.

"I knew – one way or another – I was going to start my investment in this incredible family. Two hours later the sale started I had a business partner who was keen to go shares in this Goldwyn, which gave us a bigger budget. It wasn't enough that day because the Goldwyn fetched more than 35,000 Euros. She was out of my league.

"So, after the sale ended, I reconnected with Cord and arranged to buy some embryos from the Goldwyn's dam, sired by Awesome Red."

MAKING DESTINY DELIVER

Later that summer four embryos made their way to the UK. Panda implanted two straight away. They saved two for a later implant because the weather was still warm and they wanted to spread the risk, given of the amount of Molly's investment.

The first two embryos held, and five months later one of the remaining two also held. They were poised to land the FIRST O'Kalibras in the UK.

"I was so excited, I actually turned down an opportunity to help the UK team in Colmar (at the European Championships) because I wanted to make sure these calves were born safely," Molly said.

That June two "beautiful" Red carriers were born.

"I was a little sad I hadn't got a red one, but they were super pretty," Molly said.

FIRST RED O'KALIBRA

The final pregnancy, which was born that November proved to be worth the wait. The very first RED O'Kalibra was on the ground in the UK.

"My grandpa used to come over on Fridays, and he was very excited about this calf because we had been talking so much about the final pregnancy in anticipation. He helped me name her, Autumn."

That December, Molly made the tough marketing call for any big investment close to one's heart. She decided to sell the choice of the two red carriers.

"I remember we had so many visitors in the run-up to the sale come to see these calves, I actually padlocked their gates every night three weeks out from the sale.

"I had a sleepless week making sure the calves were safe, healthy and ready to hopefully bring a decent return on my original investment."

Aged six months, the choice topped the B&W Sale, selling for 18,000gns. Panda sold the sister on the way home to another breeder based in Wales.

"So, we pulled into the farm with an empty trailer, a decent pay cheque and (in my opinion), an even more exciting younger red sister in the barn."

EVERY EGG IN ONE BASKET

She remembers that Autumn always had a "stamp about her". She was a powerful calf and, as she developed, they decided not to flush her as a maiden heifer - to be patient - and to get her in-calf.

A month before she calved, it was clear Autumn was going to shine.

"Her frame was so open, her pins were so wide, and she could easily be described as a tank even at that young age," Molly said.

She calved in safely and her udder showed great promise. Molly didn't hesitate to enter her for the UK Dairy Expo the following month.

DECISIONS, DECISIONS...

But she would have to make another decision first. Autumn was classified VG88-2Yr when she was "a handful of weeks fresh", and that very evening Molly got a phone call from well-known breeder, Rob Kirk (Leedham Holsteins). He asked if Autumn was for sale.

"I wasn't prepared to sell all of her, because she was the very last one of the line we had. So, I offered him a half share," Molly explained.

"We agreed a price, and a few weeks later she went to the Expo, and was first R&W 2Yr Old and Best Udder.

Grandpa Bernard & Autumn as a calf

"I was so proud of her, and of myself for having achieved a dream of winning at the UK's largest show with a milking animal."

ROI ASSURED

Molly says Rob has been an incredible partner. They then flushed her to Amaretto-Red for four eggs each for Panda and Leedham. They then got her in-calf again.

"Autumn has just got better and better with every single calving, and she is now classified EX95 (3 weeks in on her 5th lactation)," Molly said.

"We feel there may be even more scope for her to gain a point or two more in the future."

- ★ Autumn has produced more than 80,000kgs of milk
- ★ All nine of her daughters are classified VG/EX.
- ★ She has bred four All-Britain nominees, two UK Dairy Expo Junior Champions, and three County Show Champions.
- ★ In 2024 her daughter & granddaughter made UK history being the first RED Holstein pair to win the prestigious Royal Burk Trophies.

SELLING is a pair of Autumn's Amaretto Red daughters (fresh on their third lactations), her incredible Willows daughter (fresh on her second lactation), and many granddaughters/great granddaughters.

FAMILY STRENGTHS:

- ★ HIGH CONFORMATION - We have a line from Autum that is creating the highest conformation daughters in the UK & Europe. Watch for the CHRISTMAS line in this sale
- ★ LONGEVITY - They get better with time
- ★ POWER - They're built to last
- ★ PRODUCTION - They love to milk, with plenty of SP*. More than half of the family's milking progeny have won a Superior Production Award.

THE GLORY STORY

GOLDEN-ROSE LADD GLORY RED

GLORY - GLORY FOR A CENTURY

If you're looking for generations of pure excellence, this family traces back to close to a century of breeding.

"When I first spotted a very fresh two-year-old on Facebook one evening, she might have caught my eye on the first pass because she was red, or because there was a pretty barn in the background," Molly said.

"But when I stopped and looked her up, I was fascinated. Not many pedigrees extend for more than 20 generations - let alone 19 of them being Excellent dams. GOLDEN-ROSE LADD GLORY RED wasn't scored at that time, but I could see she was exciting."

Molly was on a mission from that point. She spoke with Glory's breeder, and he agreed to flush her.

It was not quite as simple as it appeared on paper, because only one pregnancy stuck from the small number of eggs that arrived. However, it represented potentially the first calf from this family to land in Europe.

TWISTED UTERUS TWISTS THE STORY

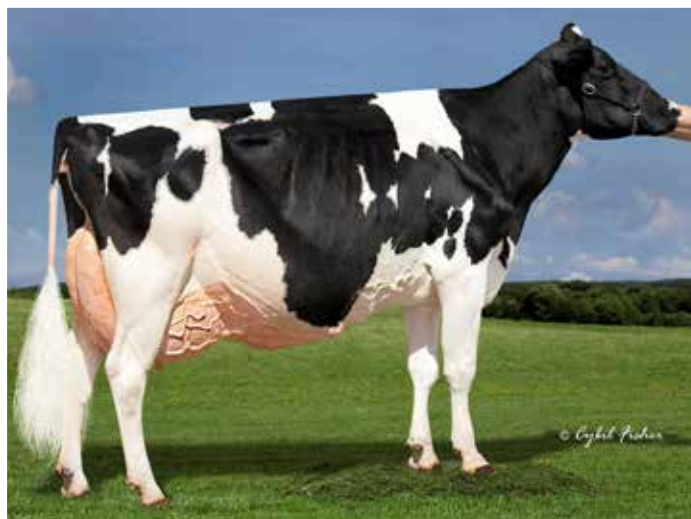

The challenges to achieve this weren't quite over yet. The recipient was due close to New Year's Eve, but when she presented with a twisted uterus things got hectic.

"It was going to take a miracle to get this calf out alive," Molly said. "After the vet had tried for over an hour, the decision was made to do a c-section. At this point the recipient had already been calving a good few hours, and none of us were sure if the calf was still alive."

"It was around 2am when we started the operation and the whole family were out helping. I had scrubbed in the help the vet, my sister, Jess, and Mum had the towels ready, and Dad stayed at the front end of the recipient to keep her calm."

"At first, we reached in, and both grabbed a back leg each - oh boy, they were long. It took all our might to lift and pull this calf out. Amazingly...she had a heartbeat."

"Mum and Jess worked on the calf and managed to get her to cough and take her first breaths, and it was Mum who came up with her name."

GOLDEN-ROSE ABS GINGER EX94

LOT 6: PANDA GLORY HALLELUJAH RED EX92

"I will never forget this night, the night that PANDA GLORY HALLELUJAH RED was born. She was a living miracle to me - and, a true 'one of a kind' for Europe."

In more welcome news, Glory's dam had just scored VG86-2yr.

EX92 HALLELUJAH SELLS

Molly said it has been an incredible journey watching Hallelujah grow and develop into an incredible young heifer.

Covid-19 meant no-one got to see her that show season, so Panda put that frustration aside, and focused on her breeding plan. They successfully flushed her once to Mirand PP, and then put her in-calf to Willows Red P. She calved in the following summer, classified VG87-2Yr and placed 2nd Sr R&W 2Yr Old at the National UK Dairy Day.

"With every lactation Glory has matured and filled out to become a promising young cow, recently classifying EX92 just six weeks fresh in her third lactation," Molly said.

It completes her pedigree with 20 Excellents and 1 VG. [Sadly, her dam died after calving complications in her second lactation, so she never got the opportunity to go EX].

All of Glory's 4 daughters are classified VG or higher as 2Yr Olds, proving the consistency of this special cow family.

Panda's "miracle cow" Hallelujah [or Glory as she's affectionately known at Panda] sells carrying that EX92-point classification - along with her special Ambrose daughter and Red & Polled Blondin Alpha granddaughter - who could be the first 23rd generation VG/EX.

FAMILY FEATURES:

- ★ THE DEEPEST PEDIGREE IN HOLSTEIN HISTORY - Invest in the world's best.
- ★ SHOW ABILITY & DURABILITY - The best of both worlds
- ★ AGGRESSIVE EATERS - They are all the first and the last at the feed fence, and they maintain great condition throughout their lactations.

MUD MEDIA

MUD MEDIA wishes Panda all the very best for a successful sale
Also, congratulations for showcasing the industry in such a positive way.
It doesn't just help your business. It helps everyone.

"We're not here to muck around. We're here to muck in"
If we can't help, we'll know someone who can...
How can we help you?

Mud Media has been proud to have been part of Panda's pre-sale marketing:

- » **Helping refine the family stories in the catalogue**
- » **Connecting Panda with Signature Designs (Australia) for catalogue design.**
- » **Checking in with the (soon to be married) Evie Tomlinson who completed some important photography in the lead-up to the Pathway of Panda.**
- » **Writing a story about Panda's incredible journey.**

NEW website: mud-media.com
FOR GLOBAL STORIES, PHOTOGRAPHY, AND MARKETING SUPPORT

Dianna will be at Pathway of Panda. She looks forward to seeing everyone...

THE

RITA

STORY

GOLDEN-ROSE LADD GLORY RED

RITA - THE FAMILY THAT MADE HOLSTEIN HISTORY

Panda's respect for the Rita family meant it was on its watch-list, because it was threatening to break a new record of straight Excellents.

Homework and research into pedigrees is Molly's guilty pleasure, and after a little digging she found her potential pot of gold. **GOLDEN-ROSE BARBRITZI RED** - a stunning Barbwire - had just completed 20 generations of straight Excellent. And, she was being marketed as part of a herd dispersal for the Golden-Rose herd in the US - along with the two-month-old Jordy Red daughter, **GOLDEN-ROSE J RITA RED**.

"I loved the cross of Jordy x Barbwire x Absolute, it was a corrective mating through and through, and with 20 Excellents, if I was to make a gamble at the time this was the calf I had eyes on," Molly said.

"Yes, she was just a baby, and yes, a lot could go wrong with such a young calf, but sometimes you have to make a gamble, and take the leap if you want to stand out."

A few weeks later, **GOLDEN-ROSE J RITA RED** joined Panda's inventory - owned with a US partner. She was flushed twice as a maiden heifer - once for the partner and once for Panda.

"I chose Army as the mating sire, because I considered him to be a great bull with moderate stature from the heart of the Apple cow family," Molly said. "I was excited this cross could produce a calf that was correct without being too extreme in the hope to breed further generations of excellence."

RISK ON RITA VALIDATED

Rita freshened in the US, and Panda was excited to see how unbelievable she looked with extreme veination on her udder.

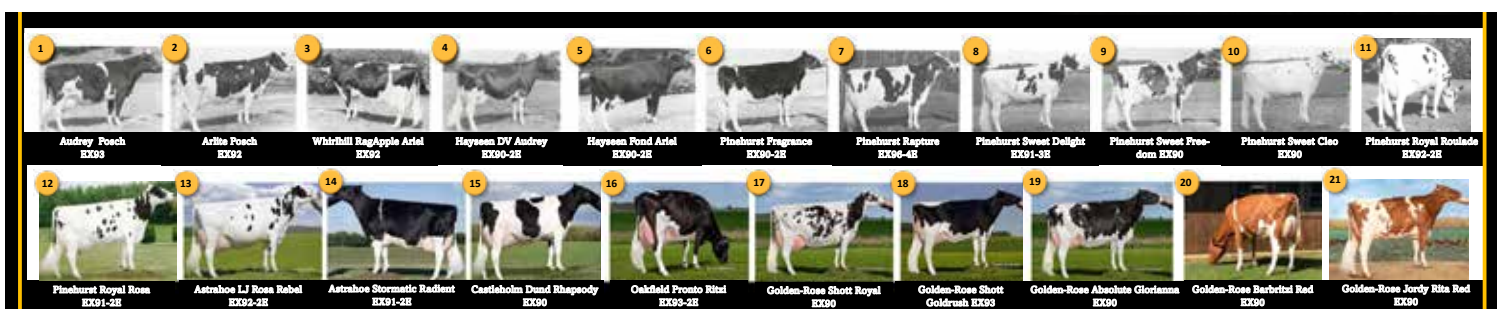

"Despite being housed in a smaller setup, she was able to head out to a couple of county shows against some of North America's finest, winning both her 2Yr Old classes and ending her 2Yr Old year scoring VG89-MAX," Molly said.

In August 2023, Rita made Holstein history, becoming the first cow in the world to complete 21 generations straight excellent.

"We are extremely proud of this achievement and we have had great success with Rita's first offspring here in the UK," Molly said.

"Her first two daughters drew huge interest after Rita's classification achievement, and we showed both at the Southwest National qualifiers. They were unseparated - Rita Order placed 1st and Reserve Jr Champion - and Rihanna placed 2nd to her full sister.

"After the show we agreed to sell Rihanna privately to the renowned Shanael herd, who have continued to develop her so well. Rita Ora resides at Panda, and she is due to calve close to the sale date."

The choice of Rita Ora's first two daughters SELL, in addition to her half-sisters sired by Ambrose, Hulu P, and Architect.

FAMILY FEATURES:

- ★ HOLSTEIN HISTORY MADE IN THIS PEDIGREE -
Become the next breeder to make Holstein history to complete 22 generations or even 23
- ★ HIGH EMBRYO YIELDS - Great return on investment
- ★ SELECT OFFERING - the only line of this kind in Europe

THE LILY RED STORY

Highcroft Absolute Lily Red EX97 (99-MS)

LILY

One door softly closes...another door quietly opens...

This family story came to be because of the deep pain that comes from loving big.

In the late Autumn of 2019, Panda lost its best and first foundation cow too early. The pain still sits with Molly today. Lexy (the original Red Lexander that put Panda on the map) died after post-calving complications on her fifth lactation.

"This was our first ever loss of a cow despite our best efforts - and I mean we gave it our absolute all," Molly said. "She was my best friend. It was gut-wrenching and my dad and I - as soft as it sounds - shed a lot of tears that day."

A couple of weeks after Lexy had passed, the atmosphere remained flat at Panda with Lexy's loss leaving a massive hole in the barn.

"Mum felt we need a 'pick-me-up' to get our heads back in the game, and she encouraged us both to go for a last-minute three-day trip to World Dairy Expo (WDE)," Molly said.

"We agreed. It was Dad's first time to WDE and my fourth (but, my first time as a visitor, because the other three times I'd been working for Morsan). I remember wearing a pair of sunglasses, sat on the plane shedding a tear still about Lexy."

When they arrived in Madison, Molly wisely offered to drive since she had lived in the US, and they had to navigate driving on the opposite side of the road.

"We got in late that evening (the day before the R&W Show), grabbed some supper and went to bed, ready for an early start to walk around the WDE barns first thing," Molly said

"There's nothing better than walking down the lines early, seeing the cows on the pack in their strings. My eye always led me to the reds, and we saw several iconic cows that year. But the one cow we both agreed on was Highcroft Absolute Lily Red EX96 (98 MS).

"She reminded us both of Lexy - not a huge cow, but she was so deep, open, hard-topped and she had so much width. Then, there was her mind-blowing udder. Despite us seeing her five or six hours before her class, we both thought that (for us) she was the cow to beat.

PROMISE FULFILLED

They grabbed the obligatory cheese toasty and milkshake and never left their seats for the rest of the day as the R&W show played out.

"Wow, it was an incredible show. Lily fulfilled our pre-show expectations - winning her aged class and carrying on winning Grand Champion of the R&W show.

"That was it. We had lost a special cow at home, but I was determined to invest in a special cow to honor our Lexy.

"I waited for the dust to settle and sent Aaron Eaton (one of her owners) a message a month later asking if we could purchase some eggs directly from Lily.

"After messages back and forth, we both agreed on a sire in Dempsey - a legendary cow to a legendary proven sire. I knew this mating wouldn't produce a red calf, but it could produce a brood cow - and that's what we were after."

They landed two stunning Dempsey daughters at Panda. To have two direct daughters from Lily - the first in Europe - was an important first step to finding a new foundation cow and quietly healing from Lexy's loss.

INVESTMENT AND WHAT COMES AFTER

With investment comes the return on investment, and coupled with Panda's commitment to offering its best, it sold one of the Dempseys.

Panda Dempsey Lolly Pop stayed at Panda.

"We decided not to show her as a calf," Molly said. "She wasn't huge, and we knew this line performed when in-milk. So, we got her in-calf when the time was right, and she calved at just over 2Yrs scoring VG85-2yr at only 11 days calved.

"She showed us so much promise - developing each week. She had a beautiful udder and a deep powerful frame, and she was later raised an extra point on that lactation. She recently calved for her 2nd lactation scoring VG88."

Meanwhile, Lily has continued to underwrite Panda's Lily story, by scoring EX97 (99-MS), and becoming one of the most successful show cows at WDE:

HIGHCROFT ABSOLUTE LILY RED EX97 (99-MS)

WDE summary:

- ★ 2018 - 1st & Res Grand Champion R&W Cow
- ★ 2019 - 1st & Grand Champion R&W Cow
- ★ 2021 - 1st Production R&W Cow
- ★ 2023 - 1st Production R&W Cow

HIGHCROFT ABSOLUTE LILY (RED) - SCORED EX-97 (99MS)

WHAT TO EXPECT

The **ONLY RED LILY** in the UK & Europe sells in the sale, a Willows red in-calf to sexed semen (two for the price of one). This is a unique offering. Also in the sale, is an eye-catching RC Ambrose daughter.

FAMILY FEATURES:

- ★ **THE ONLY RED LILY** - A one-of-a-kind opportunity
- ★ **MODERATE STATURE & MILK** - This family breeds the kind that fits into any system & pays the bills
- ★ **UNEXPOSED COW FAMILY** - A family that hasn't been over-marketed with very few offspring globally.

THE TANG STORY

MISS POTTSDALE DFI TANG EX94

TANGS

Sweet, with the exciting aftertaste of success

Paying close attention to the young two and three-year-old classes at World Dairy Expo (WDE) has been integral to Panda Holsteins' breeding programme.

And - for this family - that's exactly where Molly first laid eyes on **MISS POTTSDALE DFI TANG EX94**, an incredible Defiant leading back to the great Tinas.

It was WDE in 2016 when Tang placed second in the Senior 2Yr Old class. While many perhaps focused on the winning entry that day, Tang had Molly's attention from the get-go.

Today Tang embodies the modern cow from every angle, but it had to start somewhere, and it had to come from somewhere.

Tang is backed by eight generations of VG or EX (including six EX that averaged more than 92 points across the eight dams). Tang ranks as an elite Genomic Type cow - who has proven herself throughout the American show circuit. She was crowned All-American Sr3 Yr Old in 2017 (and Reserve in 2016). She has also a proven brood cow with more than 10 VG or EX classified daughters across the globe.

OPPORTUNITY KNOCKS

Molly was fascinated by Tang since that WDE, and she started following her progress. In the following summer of 2017, a high PTAT Diamondback daughter came up on Tang's offspring list.

"I thought it was a complimentary mating with the power from Diamondback and Tang's overall dairyness and femininity," Molly said.

When the Diamondback - named Twilight - was three months old, she was the highest PTAT Diamondback daughter in the world.

"I loved the cross and approached the team at Golden-Oaks to see if they'd be interested in selling her," Molly said. "Luckily for me, they had consigned her to a sale that spring. I knew this was a great opportunity for me to invest in my first animal abroad - something I always wanted to do."

Tang went on to win the Sr3 Yr old class along with Reserve Intermediate Champion at WDE that year. Tang's continued development was

MISS POTTSDALE DFI TANG RED EX94-2E EX95-MS

the "icing on the cake" validation for Molly. Five months later Panda invested in Twilight.

Golden-Oaks continued to house her, and she was flushed later that summer with Unstopabull on the first mating. It yielded a group of exceptional heifers on the ground at Panda in the UK.

All five daughters went on to classify VG or EX, with the highest profile Unstopabull in the group - PANDA TANGO RED - becoming the No.1 R&W PTAT and No.1 R&W Conformation female in Europe.

When Twilight calved in at Golden-Oaks, she scored VG86-2yr (11 weeks fresh).

"I was over the moon," Molly said. "Our very first purchase had calved and classified successfully, and she was also breeding exceptionally well."

DESTINED TO BE BORN IN A STORM

They made two more flushes with Twilight - one to Devour and the other to Amaretto Red. As calves, they were successful in the show ring early on, and buyers snapped them up quickly.

Panda did hold one direct daughter back for themselves, PANDA DESTINED TO B RED.

"I remember the night she was born," Molly said. "We had one of the worst storms hit the UK on record. The power was out for three days, and I slept in my office (which overlooked the calving pens), checking on the recipient every few hours by torchlight."

"In the early hours of one morning, I calved her in with a beautiful red heifer. I couldn't put a heat lamp on her, so I kept her warm with a calf rug, and lots of straw."

"Destiny", as the family likes to call her at home, tested as one of the highest descendants from the family with exceptional mammary scores. She bore that ranking out when she calved in, scoring VG86-2yr. Panda says she has one of the best udders in the barn.

"She's a powerful heifer, and we can see her making a great mature cow for the future," Molly said. "We hope to bring her out after another lactation."

Her dam, Twilight is now EX90 5*, validating the initial investment.

Watch for Destiny's stunning Blondin ALPHA DAUGHTER in the sale, and the first-ever offering of embryos from her sired by SEXED Benjo MEGA P RED (No.1 Conf RED sire in the world).

FAMILY STRENGTHS:

- ★ GENOMICS - Chart-topping offspring on both the US/ Canadian systems
- ★ SHOW-STOPPERS - They are the fancy kind that like red ribbons
- ★ HIGH EMBRYO YIELDS - They flush and IVF exceptionally well

HOLD THE PHONE...

TANG'S HIGHEST PTAT RED DAUGHTER IN EUROPE SELLS

Paying close attention to the young two and three-year-old classes **PANDA TAKE THAT RED** was the result of a mating Panda chose directly from TANG herself.

She was born in November 2021, and by 2022 the writing was on the wall for her future.

"This heifer calf gave us that fuzzy feeling right from the start, and she also really did have everything on paper," Molly said.

She was:

- ★ R&W
- ★ Polled
- ★ 8 generations averaging EX92
- ★ Apple-free pedigree
- ★ Clone-free pedigree
- ★ High genomics
- ★ High type

In 2022, **PANDA TAKE THAT RED** was already stand-out in the calf pens, and that June Panda entered her for the Royal Three Counties Show. She was the youngest heifer there, and she took the top honours - winning her class, Junior Champion, and Supreme Junior Champion of the show.

It was the start of an incredible summer run where "Wilma" (as she was nicknamed) also made history.

She won both the B&W aged class & R&W aged class at the National All-Breeds All-Britain Calf show. She was also crowned the All-Britain Champion R&W heifer of 2022.

Wilma calved down last summer and was Panda's highest scoring 2Yr Old - at VG87-2Yr.

Molly finishes, "She is an extremely unique young cow with high genomics, and a deep R&W cow family with no Apple in the line."

"She will be offered in our sale freshly calved on her second lactation, and we consider her a very exciting 3Yr Old prospect with everything in front of her for any potential buyer."

THE

ADELINE

STORY

Mead-Manor Def Adeline Red EX94-2E

ADELINE

Household legend MS Kingstead Chief Adeen EX942E 11 is the backbone for this incredible family.*

The two-time All-American nominee, Atwood's granddam (with more sires in AI), in addition to producing more than 24 VG/EX daughters, Adeen is also (importantly) the full sister to Shoremar S Alicia EX97-3E 7* - the 2000 RWF Supreme Champion, two-time All-American, and three-time All-Canadian. And, that's just the highlight reel of the Adeline family's global achievements.

PICTURE PERFECT

Mead-Manor Def Adeline Red EX94-2E is one of the very FIRST RED Holsteins from this incredible cow family, and Panda says she is worthy of the family's household name.

"We spotted this special cow whilst at the WDE in 2019," Molly said.

WHY DID SHE STAND OUT?

"I personally could not find a fault on this young cow. Her frame from all angles was picture perfect, she had a beautiful rump, a hard top, depth, and length throughout.

"As always, the udder always has to come first and that was the most impressive part on her. It was beautifully shaped, she had veins like a roadmap, and on show morning she was blooming."

She was being shown by the Moede family - one of the smaller, family-run strings - and they had done an awesome job with this cow, Molly said.

"When she stepped onto the coloured shavings, she was untouchable."

Summary of her 2019 achievements:

- ★ Supreme Champion - WDE Jr Show
- ★ Grand Champion - R&W Int Jr Show
- ★ Supreme Champion - WI State Fair
- ★ Res Int Champion - R&W WDE Show
- ★ R&W Cow of the Year

After WDE, Molly couldn't get Adeline out of her head, and she did what she always does in those situations. She burrowed into the pedigree.

MEAD-MANOR DEF ADELINE RED EX94

"When I did the research, she was a cow who didn't have a huge amount of offspring in North America, and nothing overseas," Molly said. "Her pedigree is what really fired up my engines - a RED ADEEN - WOW.

"I contacted the Moede family and asked if they'd ever sell eggs from her. It took a while to get a response, but luckily for me 12 months later they had seen an article on Panda in the Cowsmopolitan magazine. It was just simply a bit of luck, but they replied saying they'd be happy to discuss things further for a potential flush."

The two parties agreed on the sire, Devour, and the embryo deal was sealed.

JOB DONE

A year later, two stylish red Adelines and two RCs were born at Panda. As always, with its investments Panda was focused on making a return, so it sold two of the sisters that year - one to Scotland and the other to a Danish breeder. It left Panda with two daughters, Panda Angel in Red and Panda Adele.

Adele was the first to calve in. A big open-framed heifer with an incredible rump and udder- she recently scored VG87-2Yr. She will be in the sale, along with her high conformation RED CARRIED BULLSEYE daughter.

Next to calve down was Angel. During that summer Panda's good partner, Rob Kirk, decided to invest in a half share of Panda Angel in Red.

"She was just a picture-perfect heifer and a few months later she gave us a beautiful RED HULU P: HELLS ANGELS which has tested very high on both Conformation & PTAT," Molly said.

"This super-stylish calf has already won at the UK's biggest dairy show, the UK Dairy Expo in March this year - topping her R&W Class. She is definitely shaping up to be a serious All-Britain contender."

Panda confirms that Hells Angels' dam had just classified VG85-2Yr, and that she shows tremendous promise as a young cow for the future.

Also being offered is **PANDA ADORABLE RED** and her natural calf (sired by Architect) on behalf of Minihood Holsteins, Denmark.

FAMILY FEATURES:

- ★ THE FIRST RED ADEENS - Your opportunity to invest in a rare RED ADEEN
- ★ NOT A HEAVILY MARKETING LINE - The ONLY ADELINES in Europe. Huge scope for this underexposed part of the Adeen family tree - easy to market/add value to offspring.
- ★ TOP CONFORMATION - All offspring test extremely well on the Canadian system - another option for your investment

Udder Care

HEALTHY UDDERS GIVE MORE MILK!

UDDER CARE SPRAY

- Treatment of the entire udder or per quarter.
- Treat hard quarters for 4 days, 2x a day.
- Treat the complete udder around the udder twice a day for 4 days around birth of calf.
- **Udder Care yellow** has a natural color and is suitable for treatment of wounds. The color disappears after about 20 seconds.
- **Udder Care green** has natural ingredients, but the natural dye gives a green marking of treated udders. This marking is visible until the next milking.
- Udder Care consists of essential oils and natural additives.

ADVANTAGES

- Less edema
- Less mastitis
- Less antibiotics
- Lower SCC
- Better milk letdown
- No withhold period

"We have used Udder Care to aid our fresh cows pre and post calving and keep our show cows udders just the best condition. We find this product is the best solution on the market to reduce adema and swelling in the udders."

MISS DIAMOND

STORY

Diamonds are a girl's best friend...

That was Molly's first reaction when she saw Miss Diamond for the first time in Germany being shown as a two-year-old at the Schau Der Besten.

When Molly got home, she went straight to Miss Diamond's pedigree to see what she was potentially dealing with.

With her homework done, over the next two years Molly would again see Miss Diamond fresh on successive calvings - as a three and a four-year-old.

"I wanted to bring back some Diamonds to Panda. My best friend, Stefan Kallas, was actually a part-owner in Diamond so I was lucky enough to be able to make a connection, and convince the partnership to sell me some embryos.

Twelve months later, two beautiful Miss Diamond daughters were born at Panda, sired by Devour.

Panda sold one heifer privately and she became extremely successful in the showing. The remaining sister stayed with Panda, and is a personal favourite in the barn.

"Knowing her dam and maternal line was extremely successful in the show ring in milking form, we decided to calve her fresh for the summer of 2025 - in the hope that if she calved out well she'd make a great Snr 2Yr Old for the National UK Dairy Day in September," Molly said.

LOT 30: PANDA MISS DIAMOND RC V687-2YR

Recently fresh, Diamond has fulfilled her pedigree potential and inherited her mothers genes.

"She is carrying an incredible udder, she also has that black silky frame, she's so feminine and stylish, she will make a super investment for a breeder trying to find a truly special 2yr Old with BIG TIME future," Molly concluded.

KEY FEATURES:

- ★ UNEXPOSED PEDIGREE - A family with the scope and the ability to add value
- ★ HUGE SHOW PROSPECT - Enter her for The National UK Dairy Day
- ★ SOLE CHANCE - The only opportunity in the UK to invest in this pedigree
- ★ UDDER PERFECTION - The udders don't miss. They are welded on generation after generation.

THE

FOOLS GOLD

STORY

STONEDEN FOOLS GOLD VG88 3YR 9*

FOOLS GOLD

Is the real deal ...

Late one evening in Canada, Molly was helping Morsan Farms' Chris Parry unload a handful of new arrivals that had been bought in PEI.

That load included a future WDE and RWF Supreme Champion - but it was a deep, dark red heifer that caught Molly's eye. **STONEDEN FOOLS GOLD** was heavily pregnant at the time, and Molly remembers her power and her balance from all angles.

Molly says she was a little stronger than the typical show cow in North America, but she thought she had brood cow stamped all over her. And, she knew a brood cow was what she needed if she wanted to replicate a family in the UK.

"After seeing her first offspring born and develop with time, my love for this special cow continued to grow," Molly said. "I finally agreed a deal with a sire of my choice to buy five embryos before I went home to the UK."

FIVE FROM FIVE

They all stuck, thanks to Molly's father, Andrew, who had strict instructions from Molly. Three weeks before the calves were due to be born, Molly returned to the UK fulltime, ready to commit to Panda Holsteins' programme. They landed a red heifer, two black heifers, and two bulls (one red, and one black).

One of the bulls, **PANDA REFACTOR-RED** went to AI. The red heifer, LEXY, stayed at home and Molly showed her two black sisters, ALLY and ALEXA. They would become an unbeatable one-two combination across the UK that show season - winning first and second at every show - and often Champion and Reserve Champion. They took Panda on to win the National All Breeds All-Britain Calf Show, the National Dairy Event, and the All-Britain Awards.

At the end of the year, Panda offered the two heifers on choice. ALEXA sold for 6,000gns to Northern family (Carlisle). The original three heifers ended up scoring VG88-3Yr, EX90-4Yr 4* & EX93-2E 5Yr 14*.

ALLY was later sold in-milk, and Panda kept LEXY (the red Alexander) to develop the family. Lexy calved out going VG88-2yr, and winning HM R&W Champion at the National UK Dairy Day. She also gave Panda 32 grade A embryos, sired by Mr Atwood Brokaw. Panda sold

PANDA LEXANDER FOOLS GOLD RED EX93-24 14*

PANDA SPARKLES OF GOLD RED

PANDA LAMBORGHINI RED VG86 2YR

its first embryos outside the UK and implanted its first home-grown embryos.

The flush would yield the 2018 All Britain R&W Champion: **PANDA HEART OF GOLD RED** [affectionately known as “Hearty” at home]. She went to win the National UK Dairy Day R&W Champion.

“This was a dream come true for us,” Molly said.

Hearty was flushed to Emilio before that victory and Panda kept her red natural calf by Crushabull. Hearty was sold to Slatabogie Holsteins (Northern Ireland). She would go on to score EX92 8* for her new owners. Her five Emilio daughters were sold to other breeders, with four of the five classifying to EX and the sixth to VG89-3Yr.

Slatabogie did an outstanding job with the family, and several of their Avatar and Lambda daughters directly from “Hearty” all scored VG or EX. Recently at the Baileys Championships Slatabogie Lambda Gold won and continued through to be All-Britain nominated for 2024.

UNCRUSHABLE CRUSHABULL SOLD TO ITALY

As to the remaining Crushabull daughter at Panda, **PANDA PURE GOLD RED VG89-3Yr MAX.**

She would prove how special she was.

She won the two-year-old class and HM Intermediate Champion at the National UK Dairy Day and went on to win the 2022 All-Britain Champion R&W 2Yr Old. A complex first calving cost Panda her first calf, but when she re-calved with a Red Lambda – Panda Lamborghini Red – things started to heat up.

That summer Goldie was spotted by an international visitor a few days fresh. Three months later she was sold to Italy.

Molly travelled with Goldie on the cargo plane that was ultimately bound for Dubai – with a stopover for her in Italy. Molly stayed for two days to settle her and then returned to the UK.

It left Panda with the Red Lambda. At the 2024 National UK Dairy Day – as a young two-year-old – she won the class and best udder. It made her the fourth consecutive generation to win at the National UK Dairy Day.

The Fools Gold family continues to thrive at Panda, and it is excited to share offspring descending back to the foundation cow, Lexy (who has so far produced 13 VG or EX classified daughters, and 23 VG or EX granddaughters in more than seven countries) along with lots from arguably its most modern elite show cow, Goldie.

FAMILY STRENGTHS:

- ★ HIGH EMBRYO YIELDS – Return on Investment
- ★ SHOW SUCCESS AT THE TOP LEVEL – Countless All-Britain Champions
- ★ ANY REDS CARRY THE VRC GENE – Makes unique REDS

PANDA PURE GOLD RED VG89-3YR MAX.

UNIQUE DEMPSEY CHEERS EX95 4*

CHEERS *We'll drink to that...*

UNIQUE DEMPSEY CHEERS EX95 4* needs no introduction.

This incredible "peoples' cow" was a crowd favourite, and she is recognised by most breeders not only for the incredible chrome she had smothering her udder and that silky black frame. She also had that special X-factor that makes the All-American kind that everyone with this kind of passion dreams of.

Cheers started off her North American show career when Ferme Blondin & partners bought her for CAD\$155,000 in the summer of 2017 as a Jr 2Yr Old. She went on to win 1st & HM Intermediate Champion at the Ontario Summer Show then 2nd at the World Dairy Expo going on to be crowned Res. All-American and Res. All-Canadian Jr 2Yr Old.

She developed into a real crowd favourite the following year when she was crowned Reserve Intermediate Champion as a Jr 3Yr old at the World Dairy Expo.

"When you consider the pedigree behind Cheers, it's clear that she is the result of countless years of calculated breeding that extends back over 10 generations of VG/EX dams," Molly said.

So, it should come as no surprise that Panda wanted "in" on this family.

STRAIGHT TO THE SOURCE

In 2019, Panda went to the heart of the conversation. Molly approached Blondin's Dann Brady when she spotted an eye-catching Unstopabull daughter, Blondin Unstopabull Cheers.

"I asked Dann if we could purchase a flush, and we mutually agreed a sire in Kcck Amaretto Red," Molly confirmed.

UNIQUE DEMPSEY CHEERS EX95 12*

"I had a dream to breed the first RED CHEERS in the UK/Europe. Sure enough 12 months down the line in 2020, the very first RED CHEERS in the world at that time was born at Panda."

Panda got two red heifers and one red carrier and, later in the year it sold Cheerleader in the Borderway Black & White Sale as one of the top prices of more than 10,000gns to Peter Prior.

Cheerleader went on to qualify for the National ABAB Calf show the following year for her new owners, and she recently scored EX91 fresh on her third lactation with her first daughter calved in with a VG87-2Yrs score.

LOT 41: PANDA UNIQUE CHEERIO RED EX91 (EX92MS)

PANDA CHEESECAKE RED P VG86

UNIQUE DEMPSEY CHEERS EX95 12*

CHEERIO IMPACTS

CHEERIO RED has remained at Panda and has made a huge impression on its programme.

Her Willows daughter, Cheesecake, was Nominated All-Britain R&W Heifer in 2024. Her full sister recently sold to Maverick Holsteins (after she placed 2nd at the UK Dairy Expo this year).

Cheerio has always been a strong cow, with plenty of power and an exceptional udder," Molly said.

Now scored recently EX91 (EX92-MS), Cheerio recently freshened on her fourth lactation, and she SELLS - along with her "mouth-watering" Hulu P daughter, Hot Chocolate.

FAMILY FEATURES:

- ★ **POWER & STRENGTH** - They can fit into any system and look after themselves
- ★ **RED CHEERS** - The ONLY Red Cheers line available in the UK & EUROPE
- ★ **BREEDING ALL-BRITAIN WINNER** - a family that has bred top show winners across the UK

Galebreaker[®]

AGRI

Proudly supporting Panda Holsteins and their high health herd

We've been working alongside Molly to help create the best possible environment for her calves – one where they can stay healthy and thrive.

As part of her housing upgrade, Molly chose to install a Galebreaker **VentTube Fresh** system to give her calves consistent, controlled ventilation. Since then, things have been going really well – no sick calves at Panda Holsteins!

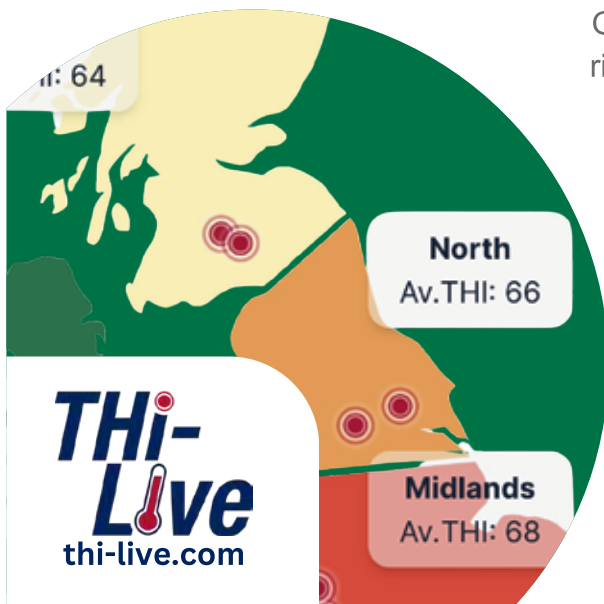

Galebreaker offers a complete range of products to improve livestock housing with better ventilation, weather protection and door solutions.

View the case study here!

Come and speak to Chloe Rodriguez our Animal Welfare Specialist, who will be here today to talk to you about how you can improve your dairy and calf housing.

Galebreaker also offers advice on understanding **heat stress** risk and practical solutions for combatting the costly impact of increased temperature and humidity.

Farmers seeing changes in their herd such as increased standing times, fertility issues or drop in milk yields could benefit from our **Heat Stress Monitoring Service** - get in touch to find out more or speak to Chloe today.

THE

NATALIE

STORY

FG MADMAX NATALIE 189 VG89

NATALIE

The dark horse from Germany

By her own admission, Molly has always been drawn to “pin-hooking” two-year-olds. And, after some return visits to Germany she uncovered a cow family that demanded her attention.

It was in the spring of 2019 that Molly first spotted R&W exponent, **FG MADMAX NATALIE**. Molly remembers her as a “beautiful two-year-old” in the Schau Der Besten on Henrik Willies’ show team.

“She was really special,” Molly said. “She had a snug, tidy udder that was welded on, with a tonne of veins. She was hard-topped, she had a long frame, and it was clear that with a little more time she would fill and develop even more.

“She came second in her class that day – which was a very respectable placing against the B&W opposition. I believed she would be at the top of the line at some point in her show career. You could just see it in her.”

Natalie would indeed fulfill her early potential, winning the Senior Red and White Championship at the 2019 National German Holstein Show.

When Molly got home after her initial finding, she immediately looked into Natalie’s family,

“I soon realised that this was a family whose roots were founded in Europe, with a long list of accolades, and I was amazed that I hadn’t seen or heard much of it until I saw her,” Molly said.

Natalie’s outcross pedigree was backed by eight generations of VG and EX dams, including **FG DIESTER NATALIE RED EX93** – a dual-National Champion – who lived to 20 years of

FG DIESTER NATALIE RED EX93

FG NATALIE 186 VG89

Three other dams produced more than 100,000kgs of milk in their lifetime.

"I felt I was looking at a truly iconic individual, within a family that featured solid maternal high-producing dams with longevity and the ability to show at both national and European level. I was also excited that it also hadn't been marketed in many countries outside of Europe.

"It gave me the hunger to invest," Molly said.

PANDA NATIONAL VELVET was born at Panda in 2020, sired by Avatar Red (Army x Awesome from the renowned Blondin Redman Seisme Red EX9

Molly says the "stunning" direct daughter of FG Madmax Natalie has so much more to offer than her conformation and her pedigree. In her first two lactations at Panda, she has averaged more than 9500kgs at 4.7% fat, 3.2% protein in under 260 days.

"She has developed and shaped into an incredible young cow, and because of her incredible fertility she makes up time with every lactation," Molly said.

"She is a true herd and brood cow in the making. Her daughters carry her stamp of dairy strength. They are traits that this family is outstanding at transmitting."

National Velvet SELLS, along with her exceptional RED ALPHA and RC Ambrose daughters.

LOT 44: PANDA NATIONAL VELVET RED V689

FAMILY FEATURES:

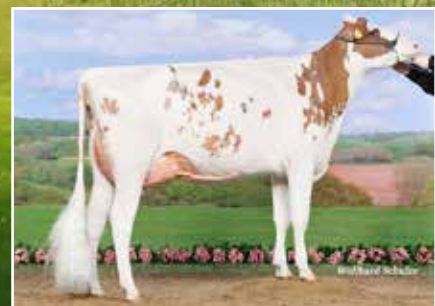

- ★ **POWER & STRENGTH** - A family that consistently breeds strength throughout
- ★ **HIGH COMPONENTS** - Exceptional butterfat and protein
- ★ **FERTILE/LONGEVITY** - You can see why the females in this line last, because they're so fertile and easy to breed back!
- ★ **UNEXPOSED EUROPEAN PEDIGREE** - Lots of scope to breed and market.
- ★ The first opportunity in the UK of FG MadMax Natalie EX93- German National R&W Champion 2019.
- ★ * 7th Dam: **FG DEISTER NATALIE EX93** - Reserve European Champion, she completed over
- ★ 100 Tonnes of milk and over 100 VG/EX descendants living to 20 years of age
- ★ **SHOW POTENTIAL**

A Brood cow to suit any system

THE IVY RED STORY

PAMPRD-ACRES AB IVY RED EX94-2E

IVY

Never judge a book by its cover...

PAMPRD-ACRES AB IVY RED EX94-2E is one of North America's most successful R&W show cows.

Most breeders recognise the signature chrome on her udder. However, not everyone knows there is more to this story, and that it explains why this family transmits.

Ivy's pedigree includes a line full of All-American dams and granddams, including:

- ★ Second dam: **CHERRIE-KREEK BEULAH RED EX92**
- ★ **Grand Champion R&W WDE in 2008.**
- ★ Fifth dam: **PINEHURST BEAUJOLAIS RED EX94-3E**
- ★ **SIX-TIME All-American Nominee.**
- ★ Ninth dam: **JAN-COM FON MATT MATILDA EX97-5E**
- ★ **Completed more 110,000kgs of lifetime milk [the third cow in this family to achieve this production milestone].**
- ★ Her pedigree includes **nine generations of EXCELLENT dams**
- ★ Ivy herself carries exceptional Type on both the Canadian and American systems

FROM GERMANY TO PANDA

How did this family make it through Panda's doors?

"It was early November in 2021 when an exciting six-week-old calf caught my eye in a sale in Germany," Molly said.

"I really liked her sire stack - she was an early Red Mirand PP granddaughter of Ivy, in between a VG87-2Yr Jordy Red.

"This stunning calf was only just getting weaned, but I could see the potential she had with that modern complementary sire stack and proven pedigree.

"I knew on paper that she was special, and thankfully I had some life-long friends who were keen to join us in a partnership if the right animal ever came along."

Molly believed she had found that individual in RZB INDIANA RED P.

PARTNERSHIP DECIDED

She contacted Mike and Lynn Robertson (Olympic Holsteins) that evening. At the end of the conversation - followed by some messages back and forth - they decided Ivy presented the perfect opportunity to ignite their partnership.

"We agreed on our budget, and that Lynn would do the bidding online," Molly said. "It was nerve-racking, I watched the sale live on my laptop, but I had no idea if she got her or not."

She had. A phone call minutes later confirmed it. The following spring - after a 48-hour transit from Germany - Ivy stepped into Panda's barn for the first time.

"I was so excited to meet her after such a long wait, and even more excited to see her in the flesh," Molly said.

"As a partnership we all decided to give her plenty of time until we brought her out to any shows, and it was 12 months later that we entered her for the UK's biggest show, the UK Dairy Expo."

Ivy finish second.

"It's so easy when you get the animals that want to eat and want to do their job. Ivy is one of those. She's such a 'good doer', and we were incredibly proud of her," Molly said.

Ivy scored VG87-3Yr (VG88-MS) and Panda is confident that she will be an easy EX cow for the future.

PANDA OLYMPIC ICON RED

LOT 52: PANDA BLACK IVY

RED, POLLED AND DIFFERENT

Being a red, polled granddaughter from Pamprd-Acres AB Ivy Red, means the family offers Europe some exciting options.

Ivy's first daughter from Icon Red resides at Panda, and she has upheld the family's reputation winning Honourable Mention All Britain R&W Heifer in 2024.

Look out for the very FIRST embryos to be offered directly from Icon Red, sired by sexed Architect. A maternal high-conformation sister, sired by Ambrose, also sells

These are two incredible offerings which should not be missed.

FAMILY STRENGTHS:

- ★ POLLED, RED & SHOW TYPE - the full package
- ★ LOW MAINTANANCE - the easiest animals in the barn to manage being aggressive feeders
- ★ HIGH CONFORMATION - Elite genomics that can rank in the top end of Europe

THE GEM STORY

PANDA APPLEPIE GEM EX93-3E

GEMS

No pressure, no diamonds

This family speaks to the heart of Panda Holsteins first footprint on the registered industry, and how sliding doors can swing one way...or the other.

The Gems are - as the family name suggests - a traditional precious bloodline. It was rescued by a single embryo, and it has since kept pace with Panda's modern and marketable pedigrees.

This is the first family Panda owned, making it a crucial part of Molly's founding story. The Gems ignited Molly's childhood dream to own registered cattle, after Molly was gifted a calf at Christmas by her father, Andrew. **HONESBERIE CHARLES GEM** was her reward for working weekends and after school on the family farm.

Gem was a Boulet Charles daughter - who was backed by nine generations of VG/EX with six decades of breeding - right back to the original lines in Canada of the great Youelldene & Saanwood prefixes.

"It was this very calf that gave me my first taste in the showing when I was 12," Molly said.

The eighth dam of Panda's line calved for the first time at 24 months, and she had her 15th calf when she was aged 17 years and one month. That longevity gene has been passed down through the family.

A SINGLE EMBRYO LEFT

When Molly's parents sold their farm in 2007, Molly was aged 16. She refused to sell Gem and Anne Harrison "kindly took Gem on". Four years later, when Molly returned from living and working in Canada, she found that Anne had flushed Gem for her before it was Gem's time to exit Anne's herd.

Gem had left Molly a single embryo. That could have been the end of the story.

"But luck was on my side, and that embryo held, giving me a healthy heifer sired by Gillette Jordan," Molly said.

Aware that the family was hanging by a thread, Molly flushed the Jordan - who went on to score VG88 6* - to Barbwire.

It was a great cross, resulting in Panda breeding and owning the 2015 R&W National All-Breeds All-Britain Champion Calf.

Rhubarb Gem who went on to win the 2Yr Old class at the National UK Dairy Day, Reserve All Britain R&W Cow, and

Honourable Mention All Britain Champion Jr two-year-old in 2017. She was sold to Southern Ireland after the National Holstein Show, and she is now also EX90 6*.
"Rhubarb proved the line wasn't a fluke when all three of her daughters classified Excellent or above," Molly said.

STRIKE IT RICH GIVES BACK

Further to that a Devour daughter, **PANDA STRIKE IT RICH-RED**, was placed second at the National UK Dairy Day, and was subsequently bought by Slatabogie Holsteins. She recently scored EX95-2E for the Paul family, and she has produced countless All-Britain offspring with all milking daughters.

Molly confirms that the line continues to thrive at Panda.

"An Absolute daughter in **PANDA APPLEPIE GEM EX93-3E**, has four daughters that are all scored VG or above as two-year-olds," Molly said. "She has produced more than 60,000kg and with two production awards under her belt she is shaping up to become a future iconic brood cow for Panda."

PANDA PEPSI GEM, one of her Devour daughters won Champion Cow at the 2023 New Forest Show. Now fresh on her second calf, she shows great promise as a future show cow.

This is a family that has done everything asked of it - not only for Panda - but for the breeders who have invested in it through Panda.

Watch for offspring by Ambrose from this enduring pedigree that is stamped with longevity and components.

PANDA APPLEPIE GEM RED EX93-3E SP2 LI50

FAMILY STRENGTHS:

- ★ **POWER** - Every female born from this line has plenty of engine
- ★ **MILK AND SOLIDS** - They love to milk & FAT & PROTEIN percentages are a feature
- ★ **MODERATE STATURE** - These small beauties suit any system
- ★ **MATURE WELL** - Like a fine wine, they all seem to look/get better with age
