ROUSSIN

All Roussin pedigrees and breeder contact details can be viewed via
www.signetdata.com

About the breed:

'Roussin de la Hague' sheep are carefully bred in France through a Normandy-based progeny testing centre that require rams to attain eligibility criteria for performance and scrapie status to be considered for nomination. Ram progeny are monitored and graded and sold annually at a sale in Joburg.

The first major influx of Roussin sheep into the UK was around 1990. Since then the breed has grown in popularity, with a reputation for lambing ease, mothering and prolificacy whilst retaining a compact muscular carcass to produce a 'market specification' lamb. Today rams are purchased frequently by many different buyers ranging from outdoor-lambing hill flocks in the Scottish Highlands to lowland terminal cross flocks looking to lamb ewe hoggs with the option of retaining females as replacements.

Today, all UK Roussins are genetically evaluated through a whole breed analysis for traits including prolificacy with some breeders are recording additional traits like growth rate, muscling and fat depth.

Pre sale show:

Roussin entries will be judged at 12.30am on 28th September.

Inspection:

A committee panel is responsible for inspecting entries based on soundness for commercial requirements.

Remote bidding:

Online bidding will be made available for this sale and telephone bids will be taken. Contact details are on the front of this catalogue to register.
